The purpose
of this action
research
project was to
explore

literacy assessments that are developmentally appropriate for kindergarten students, are accurate measurements of assessment, provide a positive learning experience for students, and help guide instruction for the teacher. Specifically, the study looked at the classroom of Native American kindergarten students from an Indian Reservation in northern Minnesota.

The literacy assessments that were used as part of the study were Treasures Reading Assessments (Macmillan/McGraw-Hill,), the Tile Test (Calfee & Norman, 2004), and the Teacher Rating of Oral Language and Literacy (TROLL) (Dickenson, McCabe & Sprague, 2001). Data was collected from students as well as teacher participants. Analysis of the survey questions

showed that most of the teacher participants rely on quarterly assessments in which they have developed to be the most accurate instrument to assess students and guide instruction. Baby Bears McGraw-Hill Education Provides information and directions for administering and scoring the multiple-choice form of the progress assessments each level. It also provides
