Cengage Learning

A book that brings the habits of reading to life Great readers are not made by genetics or destiny but by the habits they build—habits that are intentionally built by their teachers. The early formal years of education are the key to reversing the reading gap and setting up children for success. But K-4 education seems to

widen the gap between stronger and weaker readers, not close it. Today, the Common Core further increases the pressure to reach high levels of rigor. What can be done? This book includes the strategies, systems, and lessons from the top classrooms that bring the habits of reading to life, creating countless quality opportunities for students to take one of the most complex skills we as people can know and to perform it fluently and easily. Offers clear teaching strategies for teaching reading to all students, no matter what level. Includes more than 40 video examples from real classrooms. Written by Paul Bambrick-Santoyo, bestselling author of *Driven by Data* and *Leverage Leadership*. *Great Habits, Great Readers* puts the focus on:

learning habits, reading habits, guided reading, and independent reading. NOTE: Content DVD and other supplementary materials are not included as part of the e-book file, but are available for download after purchase.

Island of the Blue Dolphins: An Instructional Guide for Literature Alfred Music

This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or

quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.
