Scalar Waves Meyl

Scalar waves are capable of passing through the earth from one side to another with no loss of field strength as Tesla showed in one of his experiments.

Traveling faster than the speed of light (superluminal), Scalar Waves are not electromagnetic but composed of pure zero point energy. They also have the potential to be used as a power source.

Scalar Wave Experiment - Scalar Wave Healing

There are two type of scalar waves: the electric scalar waves and magnetic scalar wave. The top of the antenna where the metal ball is has the strongest electric

strength and so exit the electric scalar waves (Tesla Waves).
