 Von Kremer sC ulturgeaehichte des  
 Orients will be welcome to all English-  
 knowing lovers of Islamic history and  
 culture. Von Kremer still stands  
 unsurpassed. He has had no competitors;  
 he alone occupies the field. His researches  
 patient, laborious, thorough have  
 illumined every aspect of Muslim life. He is  
 the most trustworthy interpreter of the  
 social, political, economic, literary, and  
 legal problems of I slam. The volume  
 before us opens with an account of the  
 death of the Prophet, and the trouble that  
 arose over the question of succession.  
 Paction fought faction. Heavy banks of  
 cloud loomed up menacingly on the

political horizon of A rabia. The spirit of  
 tribal faction theretofore checked and kept  
 in restraint asserted itself; and, in its very  
 infancy, I slam was threatened with  
 division, disunion, ruin and disruption.  
 Omar saw the danger, and felt the need of  
 prompt and vigorous action. He did as a  
 practical and sagacious statesman would  
 do. He settled the question of succession  
 at a stroke ;and with that the clouds rolled  
 away, and the danger which had  
 confronted I slam was at once averted. --

 After many waves of feminism, where are  
 we? Are young women really either  
 massive sluts or helpless dolls? And  
 anyway, what's the definition of a slut?  
 Young women have a lot of questions. In  
*Your Skirt's Too Short: Sex, Power, Choice*

a revised young adult edition of her book  
*Princesses and Pornstars*, Emily Maguire  
 ignites discussion on issues relevant to  
 teenagers. Drawing on her adolescence  
 and the experiences faced by teens today,  
 Maguire looks for answers and a way  
 forward. This personal and illuminating  
 book is a bridge to enable young women  
 and men to understand the issues behind  
 them and those ahead of them. Guided by  
 the wisdom born of experiences, both  
 good and bad, Maguire offers advice  
 without lecturing in this engaging and  
 frank book that will inform and equip  
 readers of all ages.

*Poor Fellow My Country* is an Australian  
 classic, perhaps THE Australian classic' -  
 The Times Literary Supplement. From  
 Australia's oldest publisher comes the  
 longest Australian novel ever published.

The winner of the 1975 Miles Franklin Award is now back in print with a new introduction by Russell McDougall. In *Poor Fellow My Country*, Xavier Herbert returns to the region made his own in Capricornia: Northern Australia. Ranging over a period of some six years, the story is set during the late 1930s and early 1940s; but it is not so much a tale of this period as Herbert's analysis and indictment of the steps by which we came to the Australia of today. Herbert parallels an intimate personal narrative with a tale of approaching war and the disconnect between modern Australia and its first inhabitants. With enduring portraits of a large cast of local and international characters, Herbert paints a scene of racial, familial and political disparity. He lays bare the paradoxes of this wild land, both old and wise, young and flawed. Winner of the Miles Franklin award on first publication in 1975, *Poor Fellow My Country* is masterful storytelling, an epic in the truest sense. This is the decisive story of how Australia threw away her chance of becoming a true commonwealth and it is undoubtedly Herbert's supreme contribution to Australian literature. Will we ever reach the dream of 'Australia Felix' - the happy south land?

*Your Skirt's Too Short* OUP Oxford  
Shortlisted for the ARA Historical Novel Prize 'Cold Coast summons the raw beauty of Svalbard with achingly evocative prose. At once visceral and lyrical, I was totally absorbed in the story of Wanny Woldstad and her yearning for wilder freedoms.' - Hannah Kent, author of *Burial Rites* In 1932, Wanny Woldstad, a young widow, travels to Svalbard, daring to enter the Norwegian trappers' fiercely guarded male domain. She must prove to Anders Sæterdal, her trapping partner who makes no secret of his disdain, that a woman is fit for the task. Over the course of a Svalbard winter, Wanny and Sæterdal will confront polar bears, traverse glaciers, withstand blizzards and the dangers of sea ice, and hike miles to trap Arctic fox, all in the frigid darkness of the four-month polar night. For Wanny, the darkness hides her own deceptions that, if exposed, speak to the untenable sacrifice of a 1930s woman longing to fulfil a dream. Alongside the raw, confronting nature of the trappers' work, is the story of a young blue Arctic fox, itself a hunter, who must eke out a living and navigate the trappers' world if it is to survive its first Arctic winter.

Parkinson's Disease (PD) is a neurodegenerative disorder that manifests

with motor and non-motor symptoms. PD treatment is symptomatic and tries to alleviate the associated symptoms through an adjustment of the medication. As the disease is evolving and this evolution is patient specific, it could be very difficult to properly manage the disease. The current available technology (electronics, communication, computing, etc.), correctly combined with wearables, can be of great use for obtaining and processing useful information for both clinicians and patients allowing them to become actively involved in their condition.

**Parkinson's Disease Management through ICT: The REMPARK Approach** presents the work done, main results and conclusions of the REMPARK project (2011 - 2015) funded by the European Union under contract FP7-ICT-2011-7-287677. REMPARK system was proposed and developed as a real Personal Health Device for the Remote and Autonomous Management of Parkinson's Disease, composed of different levels of interaction with the patient, clinician and carers, and integrating a set of interconnected sub-systems: sensor, auditory cueing, Smartphone and server. The sensor subsystem, using embedded algorithmics, is able to detect the motor symptoms associated with PD in real time. This information, sent through the Smartphone to the REMPARK server, is used for an efficient management of the disease.

Shortlisted for the Saltire Society Non Fiction Book of the Year Award Almost every adult and child is familiar with his Treasure Island, but few know that Robert Louis Stevenson lived out his last years on an equally remote island, which was squabbled over by colonial powers much as Captain Flint's treasure was contested by the mongrel crew of the *Hispaniola*. In 1890 Stevenson settled in Upolu, an island in Samoa, after two years sailing round the South Pacific. He was given a Samoan name and became a fierce critic of the interference of Germany, Britain and the U.S.A. in Samoan affairs - a stance that earned him Oscar Wilde's sneers, and brought him into conflict with the Colonial Office, who regarded him as a menace and even threatened him with expulsion from the island. Joseph Farrell's pioneering study of Stevenson's twilight years stands apart from previous biographies by giving as much weight to the Samoa and the Samoans - their culture, their manners, their history - as to the life and work of the man himself. For it is only by examining the full complexity of Samoa and the

political situation it faced as the nineteenth century gave way to the twentieth, that Stevenson's lasting and generous contribution to its cause can be appreciated.

A dazzling debut from one of Australia's most gifted young writers "Maguire keeps the prose crackling and the dialogue lively ... from the first page to the last." Publishers Weekly Sarah Clark's life is irrevocably changed at the age of 14 when her English teacher, Mr Carr, seduces her after class. Their affair is illegal, erotic, passionate and dangerous - a vicious meeting of minds and bodies. But when Mr Carr's wife discovers the affair, he has to choose between them and moves to another city with his family. Sarah is devastated and from that day on her life is defined by a series of meaningless, self-abasing sexual encounters, hoping with each man that she will experience the same delicious feelings she had with Mr Carr. Seven years later Daniel Carr walks back into Sarah's life and she is drawn once again into the destructive relationship. Is Sarah strong enough to "tame the beast"? PRAISE FOR EMILY MAGUIRE "At the heart of ... Emily Maguire's work lies an urgent need to pull away at the interconnecting threads of morality, society and human relationships." WINNER OF THE SMH BEST YOUNG AUSTRALIAN NOVELIST 2013 Six years ago, Mischa Reese left her abusive husband and suffocating life in California and reinvented herself in steamy, chaotic Hanoi. In Vietnam, she finds satisfying work and enjoys a life of relative luxury and personal freedom. Thirty-five and single, Mischa believes that romance and passion are for teenagers; a view with which her cynical, promiscuous expat friends agree. But then a friend introduces Mischa to his visiting eighteen-year-old son. Cal is a strikingly attractive Vietnamese-Australian boy, but he's resentful of his father, and of the nation which has stolen him away. His beauty and righteous idealism awaken something in Mischa and the two launch into an affair that threatens Mischa's friendships and reputation and challenges her sense of herself as unselfish and good. Set among the louche world of Hanoi's expatriate community, *Fishing for Tigers* is about a

woman struggling with the morality of finding peace in a war-haunted city, personal fulfilment in the midst of poverty and sexual joy with a vulnerable youth. Chagas disease causes severe socioeconomic impact and a high medical cost in Latin America. WHO and the World Bank consider Chagas disease as the fourth most transmittable disease to have a major impact on public health in Latin America: 120 million persons are potentially exposed, 16 to 18 million of whom are presently infected, causing 45,000 to 50,000 deaths per year. It has been calculated that approximately 2.4 million potential working years are lost because of incapacity and mortality due to the disease, for an annual cost estimated at 20 billion Euros. American Trypanosomiasis provides a comprehensive overview of Chagas disease and discusses the latest discoveries concerning the three elements that compose the transmission chain of the disease: The host: human and mammalian reservoirs The insect vectors: domestic and sylvatic vectors The causative parasite: *Trypanosoma cruzi* Informs and updates on all the latest developments in the field Contributions from leading authorities and industry experts

SHORTLISTED: Miles Franklin Literary Award SHORTLISTED: Stella Prize SHORTLISTED: Ned Kelly Prize for Best Crime Novel When 25-year-old Bella Michaels is brutally murdered in the small town of Strathdee, the community is stunned and a media storm ensues. Unwillingly thrust into the eye of that storm are Bella's beloved older sister, Chris, a barmaid at the local pub, and May Norman, a young reporter sent to cover the story. Chris's ex-husband, friends and neighbours do their best to support her. But as the days tick by with no arrest, her suspicion of those around her grows. And as May attempts to file daily reports, she finds herself reassessing her own principles. An Isolated Incident is a humane and beautifully observed tale of everyday violence, the media's obsession

with the murder of pretty young women and the absence left in the world when someone dies.

Shri Mataji writes that "India is a very ancient country and it has been blessed by many seers and saints who wrote treatises about reality and guidelines on how to achieve it." This is just such a book. This book is both an introduction to Sahaja Yoga, describing the nature of the subtle reality within each of us, and a step-by-step handbook on how to be a good Sahaja Yogi, the nature of Sahaj culture, how to be a leader and how to raise children. "The knowledge of Sahaja Yoga cannot be described in a few sentences or one small book, but one should understand that all this great work of creation and evolution is done by some great subtle organization, which is in the great divine form."

This book discusses novel research on and practices in the field of physics teaching and learning. It gathers selected high-quality studies that were presented at the GIREP-ICPE-EPEC 2017 conference, which was jointly organised by the International Research Group on Physics Teaching (GIREP); European Physical Society - Physics Education Division, and the Physics Education Commission of the International Union of Pure and Applied Physics (IUPAP). The respective chapters address a wide variety of topics and approaches, pursued in various contexts and settings, all of which represent valuable contributions to the field of physics education research. Examples include the design of curricula and strategies to develop student competencies—including knowledge, skills, attitudes and values; workshop approaches to teacher education; and pedagogical strategies used to engage and motivate students. This book shares essential insights into current research on physics education and will be of interest to physics teachers, teacher educators and physics education researchers around the world who are working to combine research and practice in physics teaching and learning.

Using a multidisciplinary approach, this book describes the biochemical mechanisms associated with dysregulation of proteases and the resulting

pathophysiological consequences. It highlights the role and regulation of different types of proteases as well as their synthetic and endogenous inhibitors. The role of proteases was initially thought to be limited to general metabolic digestion. However, we now know that the role of protein breakdown is much more complex, and proteases have multiple functions: they are coupled to turnover and can affect protein composition, function and synthesis. In addition to eliminating abnormal proteins, breakdown has many modulatory functions, including activating and inactivating enzymes, modulating membrane function, altering receptor channel properties, affecting transcription and cell cycles and forming active peptides. The ubiquity of proteases in nature makes them an important target for drug development. This in-depth, comprehensive is a valuable resource for researchers involved in identifying new targets for drug development. With its multidisciplinary scope, it bridges the gap between fundamental and translational research in the biomedical and pharmaceutical industries, making it thought-provoking reading for scientists in the field.

*Suicide: Phenomenology and Neurobiology* Georgetown University Press

This work is a guidebook for clinicians who are involved in treating depressive patients and also serves the research scientists who are working on the psychopharmacological mechanisms of antidepressant actions and psychopathological mechanisms underlying mood disorders. Mood disorders such as major depressive disorder (MDD), bipolar disorder (BPD) and seasonal affective disorder (SAD) are the most disabling disorders that are among the most expensive of all medical illnesses. The pathophysiology of mood disorders is very complex and involves many mechanisms like circadian rhythm disruption, sleep abnormalities, melatonin rhythm abnormalities and alterations in melatonin receptor mechanisms, abnormalities in monoaminergic neurotransmitter mechanisms, glutamatergic release mechanisms, hippocampal neurogenesis, and abnormal immune and cytokine release mechanisms. Many antidepressants that are in clinical use today including the recently introduced novel agents like agomelatine or other antidepressants cause clinical remission by resynchronizing disrupted circadian rhythms and melatonin receptor functions, enhancing monoaminergic neurotransmission, promoting

hippocampal neurogenesis, and regulating immune mechanisms. This book explains various etiological factors that are involved in the pathogenesis of mood disorders and the mechanisms of therapeutic actions of antidepressants including the recently introduced agomelatine and other antidepressants that exhibit rapid onset of action with greater efficacy and fewer side effects. .

 This practically oriented book provides an up-to-date overview of all significant aspects of the pathogenesis of sepsis and its management, including within the intensive care unit. Readers will find information on the involvement of the coagulation and endocrine systems during sepsis and on the use of biomarkers to diagnose sepsis and allow early intervention. International clinical practice guidelines for the management of sepsis are presented, and individual chapters focus on aspects such as fluid resuscitation, vasopressor therapy, response to multiorgan failure, antimicrobial therapy, and adjunctive immunotherapy. The closing section looks forward to the coming decade, discussing novel trial designs, sepsis in low- and middle-income countries, and emerging management approaches. The book is international in scope, with contributions from leading experts worldwide. It will be of value to residents and professionals/practitioners in the fields of infectious diseases and internal medicine, as well as to GPs and medical students.

 'A woman writes a story for her married lover. Something she always thought of as a fairy tale. A fairy tale with a dark side, like the best of fairy tales...' Occupied France, 1943. France's most shameful hour. In these dark times, Dominique

starts an illicit affair with a distinguished publisher, a married man. He introduces her to the Resistance, and she comes to have a taste for the clandestine life - she has never felt more alive. Shortly after the war, to prove something to her lover, she writes an erotic novel about surrender, submission and shame. Never meant to be published, *Story of O* becomes a national scandal and success, the world's most famous erotic novel. But what is the story really about - Dominique, her lover, or the country and the wartime past it would rather forget? From one of our foremost writers, the acclaimed and multi-award-winning Steven Carroll, comes *O*, a reimagining of what might have been, the story of a novel that took on a life of its own and mirrored its times in a way the author never dreamt of. 'He is one of the best we've ever had.' Geraldine Brooks
