AN INSTANT NEW YORK TIMES BESTSELLER!! Named a Best Book of 2019 by TIME, Amazon, and The Washington Post A Wired Must-Read Book of Summer “Gretchen McCulloch is the internet’s favorite linguist, and this book is essential reading. Reading her work is like suddenly being able to see the matrix.” —Jonny Sun, author of *Everyone’s a Liebn* when ur a aliebn too Because Internet is for anyone who’s ever puzzled over how to punctuate a text message or wondered where memes come from. It’s the perfect book for understanding how the internet is changing the English language, why that’s a good thing, and what our online interactions reveal about who we are. Language is humanity’s most spectacular open-source project, and the internet is making our language change faster and in more interesting ways than ever before. Internet conversations are structured by the shape of our apps and platforms, from the grammar of status updates to the protocols of comments and @replies. Linguistically inventive online communities spread new slang and jargon with dizzying speed. What’s more, social media is a vast laboratory of unedited, unfiltered words where we can watch language evolve in real time. Even the most absurd-looking slang has genuine patterns behind it. Internet linguist Gretchen McCulloch explores the deep forces that shape human language and influence the way we communicate with one another. She explains how your first social internet experience influences whether you prefer “LOL” or “lol,” why ~sparkly tildes~ succeeded where centuries of proposals for

irony punctuation had failed, what emoji have in common with physical gestures, and how the artfully disarrayed language of animal memes like lolcats and doggo made them more likely to spread.

In this thesis, we discuss an important issue in computational linguistics: distinguishing between formal and informal style of texts, in document classification and in text generation. There is a need to identify formal texts and informal texts automatically. In addition, there is a need of having a computer system that could generate correct English texts in formal or informal style.

Therefore, we propose to use two main techniques in order to solve the two tasks. The first technique is to build a model that can be used to classify any text or sentence as having formal or informal style. The second technique is based on natural language generation (NLG) and it generates correct English sentences with formal or informal style. In order to achieve our goals, we start by studying the main differences between formal and informal style and summarize their characteristics. In addition, we manually collect parallel lists of formal versus informal words, phrases, and expressions from different sources that will be used for our proposed work. Then, we build our model for the classification task by using machine learning technique in order to classify texts and sentences into formal and informal style. The evaluation results show that our model is able to predict a class of formal/informal for any text or sentence with high accuracy. After that, we build our system that can generate formal and informal sentences by using NLG techniques. The evaluation results on a sample of generated sentences show that our NLG system can produce high-quality sentences in formal or informal style. The main contribution of this work consists in designing a set of features that led to good results for both tasks: text classification and text generation with different formality levels.

Your Literacy Standards Companion, Grades K-2 Scholastic Inc.

A Co-publication of the National Council of Teachers of English and Routledge. How can teachers make sound pedagogical decisions and advocate for educational policies that best serve the needs of students in today’s diverse classrooms? What is the pedagogical value of providing culturally and linguistically diverse students greater access to their own language and cultural orientations? This landmark volume responds to the call to attend to the unfinished pedagogical business of the NCTE Conference on College Composition and Communication 1974 Students’ Right to Their Own Language resolution. Chronicling the interplay between legislated/litigated education policies and language and literacy teaching in diverse classrooms, it presents exemplary research-based practices that maximize students’ learning by utilizing their home-based cultural, language, and literacy practices to help them meet school expectations. Pre-service

teachers, practicing teachers, and teacher educators need both resources and knowledge, including global perspectives, about language variation in PreK-12 classrooms and hands-on strategies that enable teachers to promote students' use of their own language in the classroom while also addressing mandated content and performance standards. This book meets that need. Visit <http://www.ncte.org> for more information about NCTE books, membership, and other services.
