Methods and Methodologies for Language Teaching Society Publishing
 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those entering postgraduate studies and language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms, and an annotated further reading section. Exploring English Language Teaching provides a single volume introduction to the field of ELT from an applied linguistics perspective. The book addresses four central themes within English language teaching: 'Classroom interaction and management'; 'Method, Postmethod and methodology'; 'Learners'; and the 'Institutional frameworks and social contexts' of ELT. For each, the book identifies key dilemmas and practices, examines how teachers and other language teaching professionals might intervene and deal with these concerns, and explores how such issues link to and inform applied linguistic theory. This second edition has been extensively revised and updated to explore the latest practical developments and theoretical insights in the field of ELT. With new material, including expanded discussions of CLIL, the role of new technologies in ELT, and the teaching of large classes in difficult circumstances, and with an updated glossary and suggestions for additional reading, this is an indispensable textbook for language teachers and students studying in the areas of Applied Linguistics, Language Teacher Education, and ELT/TESOL.

Changing Language Teaching Through Language Testing Psychology Press

This book offers insights into the concept that a test can be used to encourage innovation in the classroom.

Fundamental Concepts of Language Teaching Oxford University Press

This book traces the historical development of major language teaching methods in terms of theoretical principles and classroom procedures, and provides a critical evaluation of each. Drawing from seminal, foundational texts and from critical commentaries made by various scholars, Kumaravadivelu examines the profession's current transition from method to postmethod and, in the process, elucidates the relationship between theory, research, and practice. The chief objective is to help readers see the pattern that connects language, learning, teaching methods, and postmethod perspectives. In this book, Kumaravadivelu: *brings together a critical vision of L2 learning and teaching--a vision founded at once on historical development and contemporary thought; *connects findings of up-to-date research in L2 learning with issues in L2 teaching thus making the reader aware of the relationship between theory, research and practice; *presents language teaching methods within a coherent framework of language-, learner-, and learning-centered pedagogies, thus helping the reader to see how they are related to each other; *shows how the three categories of methods evolved historically leading ultimately (and inevitably) to the emergence of a postmethod condition; and *provides the reader with a solid background in several interconnected areas of L2 pedagogy, such as concepts of competence, input factors, intake processes, interactional modifications, and instructional design. Understanding Language Teaching: From Method to Postmethod is intended for an international audience of teacher educators, practicing teachers and graduate students, researchers, curriculum planners, and materials designers in the field of second and foreign language teaching.

Providing an introduction, this work contains sections on the British Empire.

The Use of First and Second Language in Chinese University EFL Classrooms Atlantic Publishers & Dist

Foreign language teaching is social interaction, subject to the influences and forces of the societies in which it takes place. This text argues that geo-political changes have an effect on language teachers in their beliefs about their work and in the everyday methods they use in their classrooms. Based on empirical research in Denmark and England, the book explores the effects of major contemporary changes as they are perceived and understood by language teachers.

Language Disorders in Children Bloomsbury Publishing

This encyclopedia is divided into three sections: individual bilingualism; bilingualism in society and bilingual education. It includes many pictures, graphs, maps and diagrams. The book concludes with a comprehensive bibliography on bilingualism.

Becoming a Language Teacher Oxford University Press

This text goes back to basics by investigating fundamental assumptions about the way English should be defined and taught as a foreign language. It looks at different attitudes to English teaching, and critically examines proposals for course content.

Fundamental Concepts of Language Teaching Springer

Authenticity is one of the most rampant buzzwords in ELT (English Language Teaching). Many have weighed in on what authenticity should mean and on how it may be achieved. The book at hand is an extensive analysis of authenticity as a term and as a concept within the academic field of ELT. The research data comprises virtually all definitions and conceptualizations of authenticity in the international ELT literature. However, only a limited number of texts contributes to what can be called an explicit negotiation of authenticity. A discourse analytical approach is taken to disentangle the hubbub of commentaries and to eventually extrapolate from it six distinct concepts which are attached to the term 'authenticity'. Michel Foucault's seminal theories are invoked, affording additional insights into discourse dynamics and power structures among individuals and institutions in ELT.

Defining Issues in English Language Teaching Psychology Press

This book presents empirical research on teaching, learning and assessment, and teacher development practices in Pakistan. Despite extensive academic research conducted in Pakistan over the last decade, there is a dearth of internationally published literature on English language teaching in the country. This book covers current research priorities and initiatives concerning English language teaching, learning and assessment, empirical developments, and major professional development initiatives, both in Pakistan and involving the work of Pakistani scholars based in abroad. It highlights the impacts that development efforts are having in the ELT world in Pakistan. The respective chapters cover a diverse range of topics, including: continuous professional development (CPD), identity construction, English language policy, curriculum development, and innovative ELT approaches and methodologies used in Pakistan. This volume provides valuable insights for TESOL and applied linguistics scholars and practitioners working in the field of ELT, both in Pakistan and elsewhere in the globalized world.

Encyclopedia of Bilingualism and Bilingual Education Courier Corporation

This reference work deals with all aspects of language teaching and learning and offers a comprehensive range of articles on the subject and its history. Themes covered include: methods and materials; assessment and testing and related disciplines.

Language Education and Emotions Multilingual Matters

This book investigates first language (L1) and second language (L2) use in Chinese university classrooms, focusing on the experiences of four Chinese EFL teachers who were teaching non-English major students at four different proficiency levels. It examines these four teachers' actual use of L1 and L2, including the distribution of their L1 and L2 use; the circumstances, functions and

grammatical patterns of their language use; and their language use across different frames of classroom discourse. It also explores their attitudes and beliefs regarding this issue in depth, as well as their own perceptions of and reasons for their language use and possible influencing factors. Through its detailed analysis of the teachers' language use, as well as their respective beliefs and decision-making techniques, this book contributes to L2 teachers' professional development and L2 teaching in general, especially with regard to establishing a pedagogically principled approach to L1 and L2 use.

Authenticity in English Language Teaching Routledge

Fundamental Concepts of Language Teaching discusses about the basics of teaching a language, concept of learning and teaching a second language. This book explains the theories of linguistic and language learning, the different strategies that are a part of teaching a language, the onset of online language teaching and the emerging trends in the linguistic theory. This book gives an insight into community language teaching and learning along with the future scope of language teaching. A complete idea of the fundamental concepts of teaching a language is given in this book.

English Language Teaching in Pakistan Cambridge Scholars Publishing

An essential guide for pre-service and in-service English language teachers. There are countless theories and approaches to language teaching, and with so many different methodologies available it can be difficult for teachers to weigh up the pros and cons of each - or even to know where to start. Written by an experienced teacher and researcher, *Methods and Methodologies for Language Teaching* takes a fresh look at ten approaches to classroom language teaching and learning. Each chapter includes suggested activities and further reading, presenting the origins and key features of each methodology before discussing its relation to assessment and learning outcomes. This is a clear, concise and context-driven introduction to teaching methods which reasserts the significance of methodology as a central pillar of language learning.

A History of ELT, Second Edition Psychology Press

Language Education and Emotions presents innovative, empirical research into the influence of emotions and affective factors in language education, both in L1 and in foreign language education. It offers a comprehensive overview of studies authored and co-authored by researchers from all over the world. The volume opens and ends with "backbone" contributions by two of the discipline's most reputed scholars: Jane Arnold (Spain) and Jean-Marc Dewaele (United Kingdom). This book broadens our understanding of emotions, including well-known concepts such as foreign language anxiety as well as addressing the emotions that have only recently received scientific attention, driven by the positive psychology movement. Chapters explore emotions from the perspective of the language learner and the language teacher, and in relation to educational processes. A number of contributions deal with traditional, school-based contexts, whereas others study new settings of foreign language education such as migration. The book paints a picture of the broad scale of approaches used to study this topic and offers new and relevant insights for the field of language education and emotions. This book will be of great interest to academics, researchers and postgraduate students in the field of language education, psycholinguistics, sociolinguistics, and applied linguistics.

Understanding Language Teaching Springer Nature

Professor Stern puts applied linguistics research into its historical and interdisciplinary perspective.

He gives an authoritative survey of past developments worldwide and establishes a set of guidelines for the future. There are six parts: Clearing the Ground, Historical Perspectives, Concepts of Language, Concepts of Society, Concepts of Language Learning, and Concepts of Language Teaching.

Routledge Encyclopedia of Language Teaching and Learning Universal-Publishers

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

The Routledge Handbook of Spanish Language Teaching Oxford University Press, USA

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. English Language Teaching in Its Social Context Pergamon

This book focuses on the emotional complexity of language teaching and how the diverse emotions that teachers experience while teaching are shaped and function. The book is based on the premise that teaching is not just about the transmission of academic knowledge but also about inspiring students, building rapport with them, creating relationships based on empathy and trust, being patient and most importantly controlling one's own emotions and being able to influence students' emotions in a positive way. The book covers a range of emotion-related topics on both positive and negative emotions which are relevant to language teaching including emotional labour, burnout, emotion regulation, resilience, emotional intelligence and wellbeing among others. These topics are studied within a wide range of contexts such as teacher education programmes, tertiary education, CLIL and action research settings, and primary and secondary schools across different countries. The book will appeal to any student, researcher, teacher or policymaker who is interested in research on the psychological aspects of foreign language teaching.

Process Drama for Second Language Teaching and Learning Cambridge University Press

An easy-to-read book which takes a fresh look at a range of language teaching methods.
