How far would you go to find yourself? Imagine everything you thought you knew about yourself turned out to be a lie, and you didn't know who was telling the truth. Imagine you possessed a secret so dangerous that, if it were exposed, it would reshape the entire world. What would you do if that secret were your very identity? In almost every way, Palo Vista seems like a typical California

city, with office buildings, schools, and homes sprawled out across suburbia, filled with families making a life for themselves at the dawn of the new millennium. But two seniors at Mt. MacMurray High are about to find out that nothing is as it seems. Jason Nix is a star athlete and honors student who can't seem to remember anything about his childhood. Elyse Van Auten is a budding artist from a broken home whose father left her mother two years ago - or so she's been led to believe. Like most teens entering adulthood, Elyse and Jason just want to find out who they really are. For them, however, the stakes go far beyond their own personal quest. Join them on a journey of self-discovery that becomes a desperate fight for survival against enemies determined to conceal the truth ... and find out what happens when that fight becomes personal.

The memoir of a man and woman who escaped into the forest, joined the Jewish partisans—and fell in love—as Hitler laid waste to their Polish hometowns. Jack and Rochelle first met at a youth dance in Poland before the war. They shared one dance, and Jack stepped on Rochelle's shoes. She was unimpressed. When the Nazis invaded eastern Poland in 1941, both Jack (in the town of Mir) and Rochelle (in the town of Stolpce) witnessed the horrors of ghettoization, forced labor, and mass killings that decimated their families. Jack and Rochelle managed, in their separate ways, to escape into the forest. They reunited, against all odds, in the winter of 1942–43 and became Jewish partisans who fought back against the Nazis. The couple's careful courtship soon blossomed into an enduring love that sustained them through the raging hatred of the Holocaust and the destruction of the lives they had known. Jack and Rochelle's story, told in their own voices through extensive interviews with their son, Lawrence, has been in print for twenty years and is celebrated as a classic of Holocaust memoir literature. This is the first electronic edition. "A story of heroism and of touching romance in a time of fear and danger." —USA Today

Written within a cloistered environment to protect sources that have yet to be identified, TOO LATE TO SAY GOODBYE is a chilling portrait of two beautiful, successful women whose murders were made to look like suicides. Jenn Corbin appeared to have it all: two little boys, a posh home in the suburbs of Atlanta, and a husband - Dr Bart Corbin, a successful dentist - who was handsome and brilliant. Then, in December 2004, Jenn was found dead with a bullet in her head, apparently by suicide. Only later would detectives learn that another woman in Dr Corbin's past had been found years earlier with nearly the exact same wound to the head, also ruled a suicide. In TOO LATE TO

SAY GOODBYE, Ann Rule - working in cooperation with victims' families, police investigators, and sources from Georgia to Australia - unravels the now-sensational deaths. What emerges is an incredible tale of jealous rage; of stunning evidence that runs from the steamy to the macabre; and of a fateful, mind-boggling coincidence that appears to have motivated the killings. The definitive unravelling of one of the strangest murder investigations of our time, this is the greatest achievement of a truly great writing career.

Through the use of careful explanation and examples, Berry demonstrates how to consider whether the assumptions of multiple regression are actually satisfied in a particular research project.

Beginning with a brief review of the regression assumptions as they are typically presented in text books, he moves on to explore in detail the substantive meaning of each assumption; for example, lack of measurement error, absence of specification error, linearity, homoscedasticity, and lack of auto-correlation.
