language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer

Peacekeeping. Despite efforts to relegate it to the past, what was once a central pillar in Canada's national identity has been making a comeback in recent years. *Creating Canada's Peacekeeping Past* illuminates how participation in the United Nations' peacekeeping efforts from 1956 to 1997 became central to national self-identification in both English and French Canada. Delving into four decades' worth of political rhetoric, newspaper coverage, textbooks, and more, Colin McCullough outlines continuity and change in the production and reception of messages about peacekeeping. He demonstrates that those who produced messages about peacekeeping often overlooked the particularities of individual missions, preferring to link their cultural products to political discourses about national identity. Engaging in debates about Canada's international standing, as well as its broader national character, this book is a welcome addition to the history of Canada's changing national identity.

This book illustrates the latest developments in literacy and language assessment in the digital context, and subsequently presents a rigorous validation study on a newly proposed form of assessment (scenario-based assessment, SBA) that seeks to respond to the contextual change of literacy activities. It combines theories and innovative practices in both the literacy and language assessment sectors. The empirical validation study on SBA, presented here, can help readers understand how digital scenarios can be realized in assessment practices with the aid of computer technology, and how the scenario settings in the digital context can affect EFL learners' reading-to-writing performance. In this way, it can facilitate the reconceptualization of L2 literacy in the digital context. Moreover, the evidence and critical examination presented here can offer readers more comprehensive insights into the value or validity of a given innovative approach before it is adopted in their contexts.

Inhaltsangabe:Introduction: In Germany, education matters lie within the scope of each of the 16 German federal states. Consequently, there is no unique educational system which is valid for the entire Federal Republic of Germany, but 16 individual ones. However, a German-wide basic framework, including regulations about the compulsory school attendance for instance, does exist. The duration of compulsory schooling until passing the Abitur at the Gymnasium, however, is not regulated by this framework, but belongs to the power of decision of each federal state. For instance, in Thuringia and Saxony, the duration of compulsory schooling at the Gymnasium has been limited to eight years, as it was already the case before the reunification of Germany in 1990. In the other federal states, like North-Rhine Westphalia for example, the duration of compulsory schooling at the Gymnasium included an additional ninth year, resulting in the fact that the students attended the Gymnasium from grade 5 until grade 13. Nevertheless, in 2001, the ministry of education of the federal state Saarland decided for a reduction of the duration of compulsory schooling at the Gymnasium by one year. By now, all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium. After many heated discussions, also the North-Rhine Westphalian ministry of education decided for a reduction of the

duration of compulsory schooling at the Gymnasium. As a consequence of this decision, students of two grades (G8 and G9 students) entered the upper secondary level at all North-Rhine Westphalian Gymnasien on August 31st, 2010 (Ministerium für Schule und Weiterbildung des Landes Nordrhein-Westfalen, n.d.a). The students of this so-called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams. Hence, it must be guaranteed that G8 students have the same preconditions as G9 students, despite having one year less of general schooling before graduating. Since no students have entered the upper secondary level after only five years at the Gymnasium in North-Rhine Westphalia before 2010, empirical research in this area is hardly available by now. Nevertheless, this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not. Especially in the context of learning [...]

A devoted high school history teacher, Mr. Besserian enjoys motivating his students at the highly diverse Fillmore High School and tries hard to make his subject matter interesting. His efforts

have earned him the Teacher of the Year Award and the respect of the faculty, not to mention the students themselves. But at a staff meeting, Besserian learns of the proposed academic improvement plan for Fillmore High that may fundamentally alter the school not for the best. Simply named the Reform Plan, it calls for community involvement on such a large scale that it will virtually turn the school into its own independent city, as well as impose corporate values on the students themselves. Besserian isn't at all sure this is such a wise idea and decides to unearth the truth behind the project by assigning his history class to research it. Besserian and his students start digging into the plan and uncover disturbing and dangerous information that underscores the precarious level of academic instruction in the school. The more they uncover, the more Besserian realizes that greed and corruption are the backbone of the supposed Reform Plan. But can a lone teacher and a group of students possibly stop the juggernaut of Fillmore High's reform before it destroys the school's very foundation?
