 Claude Shannon: A
 Mathematical Theory of
 Communication
 Voiceover: Shannon had just
 finished developing his
 theories related to
 cryptography and
 therefore was well
 aware that human
 communication was a
 mix of randomness and

statistical
 dependencies. Letters
 in our messages were
 obviously dependent
 on previous letters to
 some extent. In 1949,
 he published a
 groundbreaking paper,
 "A Mathematical
 Theory of
 Communication". In it,
 he uses Markov models
