The BiPAP autoSV

Advanced system helps you support optimal patient management even for patients with Complex Sleep Apnea or Periodic Breathing (such as Cheyne-Stokes respiration<sup>1</sup>). It also includes virtually all of the features and programs that make System One the most prescribed sleep therapy system by US sleep centers.

Complex Sleep Apnea occurs when a person is identified as having Obstructive Sleep Apnea, but develops Central Sleep Apnea when using a CPAP machine. The REMstar BiPAP AutoSV (automatic Servo Ventilation) Advanced delivers optimal therapy for complicated sleep-disordered breathing cases. The 'Advanced'

updates include an improved Digital Auto-Trak Algorithm, auto

EPAP capabilities and Bi-Flex technology that enhances patient comfort.
