[Maps of Singapore](#) Insight Flexi Maps

Ever since Singapore became an independent nation in 1965, its government has been intent on transforming the island's environment. This has led to a nearly constant overhaul of the landscape, whether still natural or already manmade. Not only are the shape and dimensions of the main island and its subsidiary ones constantly modified so are their relief and hydrology. No stone is left unturned, literally, and, one could add, nor is a single cultural feature, be it a house, a factory, a road or a cemetery. Given one of Singapore's unique feature, namely that the state is the sole landlord, all types of property in all parts of the island, rural as well as urban, were and remain subject to expropriation, fortunately always with due compensation. This atlas illustrates, essentially through diachronic mapping of the changing distribution of all forms of land use, the universality of what has become a tool of social management. By constantly "replanning" the rules

of access to space, the Singaporean State is thus redefining territoriality, even in its minute details. This is one reason it has been able to consolidate its control over civil society, peacefully and to an extent rarely known in history.

A vibrant city and country nestled at the foot of the Malaysian peninsula, Singapore has long been a crossroads, a stopping point and a cultural hub where goods, inventions and ideas are shared and traded. Though Singapore was home to a flourishing Chinese and Malay film industry in the 1950s and 1960s, between independence in 1965 and the early 1990s, few movies were made in Singapore. A new era for cinema in the sovereign city-state started with the international recognition of Eric Khoo's first features, followed by a New Wave comprised of graduates from local film schools. In recent years the Singapore film industry has produced commercially successful fare, such as the horror movie *The Maid*, as well as more artistic films like *Sandcastle*, the first Singaporean film to be selected for International Critic's Week at Cannes and *Ilo Ilo*, which won the *Caméra d'or* at Cannes in 2013. Covering the myths that surround Singaporean film and exploring the realities of the movies that come from this exciting city, *World Film Locations: Singapore* introduces armchair travellers to a rich, but less known, national cinema

*Singapore* Walter de Gruyter

Since 1965, when it became a fully independent city-state, Singapore has been an effervescent laboratory of economic, social and environmental transformation and innovation. The government of the small island republic, which currently covers about 720 sq km, has thoroughly transformed and extended the lands under its control to serve the needs and ambitions of its citizens. The systematic overhaul of the Singaporean environment reflects a deliberate policy of social transformation, a revolution controlled and monitored from above. While Singapore's achievements in the realm of economic and social development have been carefully observed, little has been said about the close connections between these accomplishments and territorial management. Based on an extended series of diachronic maps, this book illustrates the nature and depth of the territorial changes that have occurred since the early 1960s. The commentary that accompanies the maps shows how Singapore has used this ongoing territorial transformation to support its position in a globalized economy, and also as a tool of social and political management. *Singapore Travel Map Thirteenth Edition* Periplus Editions (HK) Limited
