SAP BW/4HANA has introduced a new era in data warehousing at SAP. Further steps towards simplification, flexibility, and performance are now possible with SAP HANA as the proven technological basis. SAP BW/4HANA offers modern concepts for data management, operation, and modeling and thus

opens the door for fully innovative application scenarios. This book will show you how the SAP HANA database influences the Business Warehouse and how you can optimize your system. As a practical guide, the book is aimed at experienced SAP BW experts as well as decision makers who need a well-grounded overview. The authors address the versions SAP BW/4HANA 1.0 and SAP BW 7.5 in equal measure, highlighting new functions and differences. The book also focuses on the migration options and conversion tools for moving to SAP BW/4HANA. Use this reference book to enter the world of SAP BW with SAP HANA as the database platform! - Migration, sizing,

operation, data management with SAP BW/4HANA and SAP BW 7.5 on HANA - The new central source Systems SAP HANA and ODP - New modeling options, mixed scenarios, LSA++, and differences compared to SAP BW 7.5 - The role of BW in operational SAP reporting

Espresso Tutorials GmbH  
"SAB BW 'All-in-One' Reporting Solutions" is an in-depth and comprehensive guide to building the SAP BW reporting platform. The author includes the steps and procedures for the "Out-of-the-Box" Business Content activation, installation,

configuration and implementation. Each chapter concisely details the processes involved with building blocks of BW and its supporting tools and components. "SAP BW 'All-in-One' Reporting Solutions" provides a thorough tour through all of the important aspects and considerations relative to the SAP BW. It gives the novice a broad understanding, as well as going into considerable technical depth for the more advanced and experience BW developer. It would be an excellent handbook and reference for the managers of the SAP BW projects, as well as a worthwhile investment for those whose companies are just considering in bringing SAP BW into

their ERP and data warehousing environment.

**SAP BusinessObjects BI 4.0 The Complete Reference 3/E** SAP Press

Companies are leveraging the power of big data and are tasked with putting an infrastructure in place that will allow for the analysis of this data. One essential piece of that infrastructure is the data warehouse (DWH). This book offers a comprehensive introduction to SAP Business Warehouse (BW). You'll learn about the primary features and functions of SAP NetWeaver BW, including architecture, data modeling, data extraction, data staging, and reporting. Learn about the different types of InfoProviders available

in SAP BW and get a detailed understanding of InfoObjects and InfoCubes. Walk through the ETL process and best practices for administering InfoCubes and DataStore objects. Get tips on how to optimize data access using aggregates and statistics. By using practical examples, tips, and screenshots, the author brings readers new to SAP BW up to speed on the fundamentals and best practices for providing reports to users. • Tips for loading data from a source system to SAP BW with SAP ETL • How to automate ETL tasks using process chains • Using SAP BW Business Content to accelerate the design of your BW objects • Leverage BEx Query Designer and

BEx Analyzer

"This book is the definitive guide for SAP NetWeaver BI professionals. Based on their extraordinary expertise with the product, the authors provide deep insights about key innovations in the areas of user experience, query performance, integrated planning, and enterprise-wide data warehousing."

—Stefan Sigg, Vice President, SAP

NetWeaver Business Intelligence The long-anticipated publication of this second edition reflects the growing success of SAP NetWeaver as well as the various Business Intelligence (BI) capabilities that are embedded with SAP BW version 7.0.

Written by SAP insiders, this comprehensive guide takes into account the ever-changing features, functionality, and toolsets of SAP NetWeaver to bring you the most updated information on how to use SAP BW to design, build, deploy, populate, access, analyze, present, and administer data. You'll discover the options that are available in SAP NetWeaver and uncover a new means to improve business

performance. This book reflects the process an organization goes through during an implementation of the software. The authors begin with an introduction to BI and SAP NetWeaver and quickly progress to information modeling and enterprise data warehouse concepts. You'll learn how to access and deliver meaningful analytic information to the organization, as well as perform integrated planning functions. Finally, the authors share invaluable insight on warehouse administration, performance, and security. With more than 50 percent new or revised material, this second edition of *Mastering the SAP Business Information Warehouse* shows you

how to: Extract data from online transaction processing systems  
Store transformed data in a way that best supports reporting and analysis  
Use the various Business Explorer tools such as BEx Report Designer, BEx Analyzer, BEx Broadcaster, and BEx Web Application Designer  
Schedule, monitor, troubleshoot, and archive data loads

Managing your SAP data in Microsoft Excel? This is your guide to using SAP Analysis for Microsoft Office! Get started with the basics, from creating your first workbook to navigating through reports. Then, follow step-by-step instructions to process data, analyze data, develop planning applications, customize reports, and work with tools such as formulas and macros. Including details on troubleshooting, UI customization, and more, this book is your all-in-one resource! In

this book, you'll learn about: a. Reporting and Data Analysis Learn to work with reports in SAP Analysis for Microsoft Office: define parameters with prompts, adjust formatting and styles, and extend reports with local data. Filter, sort, and display your data using hierarchies, and refine data analysis with simple and advanced calculations. b. Planning Use your SAP data to develop planning workbooks. Plan your data both manually and with functions and sequences. Understand key settings for cell locking, the planning model, and more. c. Advanced Features Take your skills to the next level. Write formulas to use in your reports, and create and

use macros in your workbooks, including steps to use API methods, callbacks, and design rules. Highlights include: 1) Workbook creation 2) Report navigation 3) Prompts 4) Data processing, organization, and analysis 5) Planning applications 6) Report customization and formatting 7) Formulas 8) Macros 9) Configuration 10) Troubleshooting

**An Introduction** Argir Hristoforov Yuliyarov SAPr BEx Simplified: Business Explorer for End-Users covers both Excel and web-based reporting. The topics covered include an overview of data warehousing and the Business Warehouse (BW), how to launch reports (via the Analyzer, web or

Portal), how to specify report selection criteria, anatomy of Excel and web reports, tools and techniques (Excel and web), working with the BEx Browser, navigation and analysis functions, and customizing query properties. The execution of various functions is demonstrated in a step-by-step manner, with liberal use of screenshots. "The best and most realistic work on using Business Warehouse that I have ever read." Keenan Malinich, Strategic Projects Manager DaimlerChrysler "If you are looking for a step-by-step guide with detailed screen shots and clear explanations - then this is it! I recommend this book for the libraries of all BW consultants and

users." - Desh Kapoor,

Get tips for setting default values for frequently used transactions. Obtain an introduction to how to view and process jobs, schedule and monitor background jobs, and access and view your print spools. By using practical examples and screen-shots, the

author brings readers quickly up to speed to get the most out of their SAP system. - Navigate in SAP ERP efficiently and effectively - Configure your user interface - Streamline frequently used transactions - Quick reference guides to menu bars, commands, and shortcuts

**SAP BW/4HANA and BW on HANA** McGraw Hill Professional

This book is brief information on how to use SAP Data Services Designer for a beginner who want to get hands on in the tool and get used to it. A BW consultant with BODS knowledge is an invaluable asset for the company. Today, there are openings asking for multiple skills and this book helps a BW developer to get used

to the new tool and its functionality. BODS is mainly an ETL tool which does a lot of things in a simple way which might be very complicated in a BW scenario. It is a tool mainly to transfer data from one database to another transforming it in the way. Thus, it adds flexibility by connecting various forms of source and targets and also

utilizing SQL transformation to play with the data. The author has also included important short notes from SAP help document which will bring more clarity and makes it easier to learn complicated concepts like CDC and multiuser development in BODS. The book includes screenshots of the SAP software which are copyright of SAP AG.
