### **The Identification of Gems and Gem Minerals, and an Account of Their Scientific, Commercial, Artistic, and Historical Aspects** Penguin

A brilliant and provocative exploration of the interconnection of private life and the large-scale horrors of war and devastation. A Pulitzer Prize and National Book Critics Circle Award finalist, and a

winner of the Bay Area Book Reviewers Association Award, Susan Griffin's *A Chorus of Stones* is an extraordinary reevaluation of history that explores the links between individual lives and catastrophic, world-altering violence. One of the most acclaimed and poetic voices of contemporary American feminism, Griffin delves into the perspective of those whose personal relationships and family histories were profoundly influenced by war and its often secret mechanisms: the bomb-maker and the bombing victim, the soldier and the pacifist, the grand architects who were shaped by personal experience and in turn reshaped the world. Declaring that "each solitary story belongs to a larger story"—and beginning with the brutal and heartbreaking circumstances of her own childhood—Griffin examines how the subtle dynamics of parenthood, childhood, and marriage interweave with the monumental violence of global conflict. She proffers a bold and powerful new understanding of the psychology of war through illuminating glimpses into the personal lives of Ernest Hemingway, Mahatma Gandhi, Heinrich Himmler, British officer Sir Hugh Trenchard, and other historic figures—as well as the munitions workers at Oak Ridge, a survivor of the Hiroshima bombing, and other humbler yet indispensable witnesses to history.

In an absorbing mystery thriller, a teenage girl with a past arrives in a city: new name, new identity, new foster family. She has chosen the city herself, and is fascinated by its harmony and beauty, but is clearly in fear of discovery. She is nursing a secret from her early childhood, a secret that produces new terrors for her the moment she fears her identity has been spotted. A parallel narrative tells of a young architect's apprentice, Zak, in 1750 - working with Jonathan Forrest, a man obsessed with past Druidic mysteries and a new architectural vision for the city. He plans to create the world's first circular terraced street, the King's Circus - a plan greeted with scorn and derision. Zac soon realises there's more than just obsession with an architectural vision; there is some secret associated with building a hidden chamber in the centre of the Circus. But Zac himself has his own confused and highly destructive agenda ... These narratives are framed by the voice of Bladud - mythical first builder of the city, destined to die in trying to fly. And ultimately his narrative brings all together in a clever and brilliantly intriguing climax.

In order to attract readers, it was not uncommon for magical texts of the 16th century to take on the name of a notable figure. Such is the case with *The Book of Secrets of Albertus Magnus*, whose secrets are, in fact, a compilation from a number of different sources by an anonymous author who was, according to editors Best and Brightman, probably one of Albertus Magnus' followers.

Bestselling author Barbara Walker debunks the tall tales surrounding crystal mysticism and offers instead an intelligent alternative that includes a complete guide to minerals and their histories. Because of her profound admiration for the beauty and mystery of crystals, Barbara Walker reveals in this two-part examination what crystals truly are, what they can -- and cannot do, and what they have meant to cultures down through the ages. She exposes the crystal mystics' grotesque ignorance of the very subject of which they claim expertise and presents detailed discussions on crystal "vibrations," healing, and energies. She points with humor and insight to the incomprehensible "word salad" crystal mystics use to explain their notions. Then, featuring an illustrated A to Z listing of all the minerals used in esoteric studies, Walker presents the true history, mythology, and attributes of each stone. This invaluable reference is for anyone interested in the facts and fiction of crystal mysticism.

From the author of the acclaimed *Insectopedia*, a powerful exploration of loss, endurance, and the absences that permeate the present When Hugh Raffles's two sisters died suddenly within a few weeks of each other, he reached for rocks, stones, and

other seemingly solid objects as anchors in a world unmoored, as ways to make sense of these events through stories far larger than his own. A moving, profound, and affirming meditation, *The Book of Unconformities* is grounded in stories of stones: Neolithic stone circles, Icelandic lava, mica from a Nazi concentration camp, petrified whale blubber in Svalbard, the marble prized by Manhattan's Lenape, and a huge Greenlandic meteorite that arrived with six Inuit adventurers in the exuberant but fractious New York City of 1897. As Raffles follows these fundamental objects, unearthing the events they've engendered, he finds them losing their solidity and becoming as capricious, indifferent, and willful as time itself.
