Debates in Modern Philosophy: Essential Readings and Contemporary Responses provides an in-depth, engaging introduction to important issues in modern philosophy. It presents 13 key interpretive debates to students, and ranges in coverage from Descartes' *Meditations* to Kant's *Critique of Pure Reason*. Debates include: Did Descartes have a developed and consistent view about how the mind interacts with the body? Was Leibniz an idealist, or did he believe in corporeal substances? What is Locke's theory of personal identity? Could there be a Berkeleian metaphysics without God? Did

Hume believe in causal powers? What is Kant's transcendental idealism? Each of the thirteen debates consists of a well known article or book chapter from a living philosopher, followed by a new response from a different scholar, specially commissioned for this volume. Every debate is prefaced by an introduction written for those coming upon the debates for the first time and followed by an annotated list for further reading. The volume starts with an introduction that explains the importance and relevance of the modern period and its key debates to philosophy and ends with a glossary that covers terms from both the modern period and the study of the history of philosophy in general. *Debates in Modern Philosophy* will help students evaluate different interpretations of key texts from modern philosophy, and provide a model for constructing their own positions in these debates.

Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more, with analytical rigor as well as

engaging examples and policy discussions. They take a broad approach to theoretical analysis, using both standard economic and ecological analyses, and developing these both from theoretical and practical points of view. It assumes a background in basic economics, but offers brief review sections on important micro and macroeconomic concepts, as well as appendices with more advanced and technical material. Extensive instructor and student support materials, including PowerPoint slides, data updates, and student exercises are provided.

In the previous two volumes of this series, we presented classic problems in internal medicine as illustrated by actual cases cared for in our institution. It has been gratifying for us to see the interest that these volumes have generated with students and trainees. We remain committed to the case method of instruction, and believe that there is no better method to learn medicine than to have an individual patient problem as the basis for study of pathophysiology, natural history, diagnosis and management. We hope that our readers find this third

volume as enjoyable and instructive as the editors found it. Juan M. Bowen, MD Ernest L. Mazzaferri, MD, FACP xiii

The publication of this anthology marks the first survey that collects, substantiates, and demonstrates the importance of the religious and spiritual imagination within Western Modern and contemporary architecture. Going beyond the ideas of "sacredness" and "sacred place making" that are a common theme for symposia, conferences, and architectural periodicals, the essays, interviews, and meditations offered here take a critical look at the relationship between religion and architecture in the twentieth century. --

Although a large body of work has emerged which addresses neoliberal

representations of the family in other cultural forms (such as parenting advice programmes) little has been written specifically on the family and contemporary literature. This book examines the growing body of autobiographical and fictional writing on family and parenting issues in Anglo-American culture from the late 1990s to the present day. The book looks closely at six distinct genres which have arisen during this time frame: the misery memoir, the mum's lit popular novel, the maternal confessional, 'dads' lit, the dysfunctional domestic novel and the family noir. Writing the Modern Family will examine the way these burgeoning areas of British and American writing respond to a neoliberal public discourse in which a 'parenting deficit' rather than economic and structural disadvantage, is responsible for increasing inequality in child welfare and achievement. In evaluating these forms and their relationship to neoliberal culture, the book will also consider the complex interrelationship between these genres.

ingredients. In keeping with its local approach to global flavors, Modern Spice includes a guide to the modern Indian pantry and Monica's thoughtful, charming essays on food, culture, and family. Eight pages of gorgeous color photographs showcase the recipes.

Much misunderstood, Mormonism had a colorful beginning in the 19th century, as a visionary named Joseph Smith founded and built a community of believers with their own unique faith. In the late-20th century, the church had to come to terms with its own growth and organization, as well as with the increasing pervasiveness of globalization, secularization, and cultural changes. Today Mormonism is one of the major religions in America, and continues to grow internationally. However, though the church itself remains strong, it is elusive to those of other faiths. Here, a seasoned author and third-generation Mormon sheds light on the

everyday lives and practices of faithful Mormons. Bushman's readers will come away with a more thorough appreciation of what it means to be Mormon in the modern world. Following Brigham Young into the Great Basin and founding communities that have endured for over 100 years, Mormons have forged a rich

history in this country even as they built communities around the world. But the origins of this faith and those who adhere to it remain mysterious to many in the United States. Bushman allows readers a vivid glimpse into the lives of Mormons—their beliefs, rituals, and practices, as well as their views on race, ethnicity, social class, gender, and sexual orientation. The voices of actual Mormons reveal much about their inspiration, devotion, patriotism, individualism, and conservatism. With its mythical history and unlikely success, many wonder what has made this religion endure through the years. Here, readers will find answers to their questions about what it means to be Mormon in contemporary America.

Understanding Contemporary Air Power
New World Library

Translated into English for the first time, *On Contemporary Art*, a speech by the renowned novelist César Aira, was delivered at a 2010 colloquium in Madrid dedicated to bridging the gap between writing and the visual arts. On Aira's dizzying and dazzling path, everything comes under question—from reproducibility of artworks to the value of

the written word itself. In the end, Aira leaves us stranded on the bridge between writing and art that he set out to construct in the first place, flailing as we try to make sense of where we stand. Aira's *On Contemporary Art* exemplifies what the ekphrasis series is dedicated to doing—exploring the space in which words give meaning to objects, and objects shape our words. Like the great writers Walter Benjamin and Hermann Broch before him, Aira operates in the space between fiction and essay writing, art and analysis. Pursuing questions about reproducibility, art making, and limits of language, Aira's unique voice adds new insights to the essential conversations that continue to inform our understanding of art.

Playing Changes Hachette Go

This ambitious study explores how important darkness--artificial darkness--

was, as an actual technology, in producing not just photographs but visual novelties and experiments in cinema in the nineteenth century. The study plays out against a backdrop of urban history, where most scholars have focused on the growth of artificial light and the electrification of cities. Elcott's study challenges that approach. In considering zones of darkness, it ranges from the sites of production (darkrooms, studios) to those of reception (theaters/cinemas/arcades) that shaped modern media and perceptions. He argues that, in the nineteenth century, the avant-garde was

often less interested in the filmed image than in everything surrounding it: the screen, the projected light, the darkness, the experience of disembodiment. He argues that darkness has a history separate from night, evil, or the color black, and has a specifically modern manifestation as a media technology. We are all aware of the "velvet light trap" in photography, but at the heart of this book are technologies of darkness crucial to cinema that were commonly known as "the black screen," but have, over time, faded from the storied discourse.
