Making Media Taylor & Francis

The RDS-1 was created as a prototype for evaluation of a complex, portable, turnkey, video / audio recording studio for today's Concert Video Producers, TV Producers, industrial Media departments, high end Videographer, or well-funded Band that wants to produce their own video segments. The 24 track 24 bit hard disk recording deck from Mackie takes the 24 tracks from the 2 on board retractable Mackie 1604 VLZ mixing boards and cleanly records them onto a removable computer hard disk. This unit also provides equipment to direct a 6 video camera crew including video screens, preview and program out switchers and an intercom system. Even though major pieces of equipment like the Makie 24/96 hard disk recorder are out of production there are a number of even better recorders that can take its place when you decide to make your own recording console. This book will be an invaluable tool at the design stage as well as a guide to write your own OPERATIONS MANUAL. Captain Willy

The latest hot camera is pretty irrelevant if one can't understand what's happening on screen. The key to any narrative is in the dialogue and voice over, but if this is unintelligible or difficult to hear, viewers will soon lose interest. With real world applications and a narrative to keep the reader's interest, *Production Sound Mixing* is the indispensable guide for film and video audio recording. Written by veteran sound mixer John J. Murphy, the book

offers a step by step collaborative journey through the basic physics of sound, concluding with a practical guide of the latest techniques and equipment available to all who are interested in the best audio for their projects. Structured to mimic a 14-week semester, each chapter begins with an audio problem to be solved and ends with a solution drawn from information gleaned from past chapters. Suggested movie scenes that demonstrate the relevant audio techniques will also be included. Equally applicable to studio and location recording, the book is oriented toward commonly accessible environments such as conference rooms, hallways, beaches, car interiors, bathrooms, and so on. The intent is to allow the student to make the best of a location no matter how challenging it might be. Most importantly, this book will make one aware of the potential of sound on screen, for it is truly 50% of the viewing experience.
