World Report 2018 IFES

Today a general mood of pessimism surrounds Western efforts to strengthen elections and democracy abroad. If elections are often deeply flawed or even broken in many countries around the world, can anything be done to fix them? To counter the prevailing ethos, Pippa Norris presents new evidence for why programs of international electoral assistance work. She evaluates the effectiveness of several practical remedies, including efforts designed to reform electoral laws, strengthen women's representation, build effective electoral management bodies, promote balanced campaign communications, regulate political money, and improve voter registration. Pippa Norris argues that it would be a tragedy to undermine progress by withdrawing from international engagement. Instead, the international community needs to learn the lessons of what works best to strengthen electoral integrity, to focus activities and resources upon the most effective programs, and to innovate after a quarter century of efforts to strengthen electoral integrity.

"Agroforestry is a dynamic, ecologically based, natural resources management system that, through the integration of trees on farms and in the agricultural landscape, diversifies and sustains production for increased social, economic and environmental benefits for land users at all levels (ICRAF). Yet it is still considered a peripheral activity of agriculture and many farmers and other land users are ignorant of its benefits. This paper is a guide for policy-makers, advisers and other technocrats who wish to include agroforestry in the national agenda. It aims to assist countries to

develop policy, legal and institutional conditions that facilitate the adoption of agroforestry and recognize its contribution to national development. Part I explains the benefits of agroforestry systems, the necessary conditions for its development, the barriers that have prevented its adoption so far, and the drivers, contextual and internal, that make it possible. Part II outlines 10 tracks for policy action, which if followed correctly will facilitate the development of national policies designed to promote the agroforestry concept and practices at plot, farm and landscape scale. Illustrated with case studies and examples of good practice from around the world, these guidelines are an invaluable addition to the agroforestry global agenda."--Page 4 of cover.

The role of money in politics is an issue of daily debate in old and new democracies alike. The ways that parties get access to money can influence the outcome of elections, determine the relationship between party leaders and members, affect the number of women elected and condition the level of public trust as a whole. The IDEA Handbook is designed to encourage informed public debate. It looks at the strengths and weaknesses of the different national laws and regulations from a regional perspective. It analyses the problems of enforcement and the opportunities for effective public disclosure of funds.
