It's Only Too Late If You
Don't Start Now Henry

Traditional thinking habits
of businesses need to be
greatly improved. Analysis
and judgement are no
longer enough to make
important corporate

decisions; you can
analyse the past but you
have to design the future.
Corporate decisions
depend on values.
Disputes and conflicts
often arise because of a
clash of those values;
each party in the dispute
wants to pursue its own
values, often at the
expense of the other
party. It is therefore
essential that companies,

managers and employees
have a full understanding
of the values of everyone
involved to design a way
forward that benefits all
parties. From the
bestselling author of How
to Have a Beautiful Mind
and Six Thinking Hats, this
groundbreaking business
book provides a basis for
value assessment, an
essential tool in decision-
making for 21st century

corporations. De Bono demonstrates that values come into all areas of thinking, behaviour and decision-making and outlines a framework to focus employees' attention on a variety of values including human values, organisational values, cultural values and perceptual values. By introducing a scoring system to rate different values as strong, sound, weak or remote de Bono helps readers to prioritise and make executive decisions that count. Plan the Celebration of a

into practice, but at least I hope to make this process easier for you, by letting you to avoid committing the same mistakes as I did. The standards you have today determine the life you will have in a few years People are extremely good at succeeding at their priorities and extremely dishonest about them. Your problems aren't different. Listening is about not projecting your own world-views. ... and 86 more.

It's Too Late to Die Young Now answers the question: what became of the rock writer the day the music died? There is no field of journalism more mythologised or more derided than rock journalism - with good reason, according to Andrew Mueller. And he'd know. Starting out writing for the Sydney music street press in his teens, by his early twenties, Mueller was working for the legendary UK music

weekly Melody Maker, earning a living by listening to records, going to gigs, hanging out in seedy pubs and travelling the world with his favourite rock groups. In barely two years, he went from a childhood bedroom with a poster of Robert Smith to The Cure's tour bus. Though it didn't seem like it at the time, the years Mueller was living the dream - the late-eighties to the mid-nineties - were actually the last hurrah for the music scene as we knew it. The era of flourishing

live pub venues and record stores, and rock journalists as cultural arbiters and agitators, is now long gone. Featuring cameo appearances from luminaries of the Seattle grunge boom and the Britpop response to it, and encounters with the likes of U2, The Cure, Pearl Jam, The Fall and Elvis Costello, *It's Too Late to Die Young Now* is an *Almost Famous* for Generation X, and a hilarious and heartfelt eulogy to a life that seems even less probable now than it did at the

time.

 Bestselling author Pastor Rob Morgan provides ten Bible-based laws for productive people by answering the question: How do I gain control over my life right now? A lifelong student of the Bible, Rob Morgan has spent forty years reading thousands of pages about maximizing each day and becoming purposeful and productive. Now he has found a simple plan that

works—featuring ten biblical principles that transcend human wisdom. These life patterns can be implemented today whether you're a student or a senior adult, a novice or an executive. They can help anyone, anytime, anywhere develop a perpetually effective life.

1. Listen to a twelve-year-old: Jesus' first statement was: Be about your Father's business.
2. Redeem the time: Wasted hours can never be regained.
3. Clear the decks: God isn't disorganized; why should

we be? 4. Maximize the morning: Schedule a standing appointment with God. 5. Pull off at rest stops: Routinely replenish your inner resources. 6. Operate on yourself: Diagnose and treat yourself spiritually. 7. Live "As If": Act by faith even when your emotions aren't cooperating. 8. Bathe in the Dead Sea: Experience the buoyancy of biblical joy. 9. Practice the power of plodding: Effectively complete major tasks by persistently working in small increments. 10.

Remember there are two of you: It's Christ in you Who's achieving significance. Based on actual Scriptures, this simple, hope-filled plan for mastering life before it's too late will put you on the path toward a lifetime of success.

Too Late... I Love You is the new novel from best-selling, award-winning author Kiki Archer. Connie Parker isn't convinced by this falling in love lark. Falling hurts, you end up with bruises and scars.

She has the perfect answer: she'll write about love instead. But what happens when the novel-in-progress describes more about Connie's own dull existence than she wants to admit? And when will she realise that her hero is beginning to resemble her new best friend Maria - a woman who seems to turn every simple outing with their 3-year-olds into a fun-filled adventure for them all? In trying to make sense of the puzzle of her life, Connie learns there is no perfect person. Just that

person who'll fit you perfectly. "The twists and turns and surprises just keep coming - read it now!" - Diana Simmonds, Curve Magazine. "Kiki Archer excels when portraying the behaviour of the human heart. A page-turner written with honesty and warmth." - Vg Lee, Author and Comedienne.

 "A badass debut by any measure—nimble, knowing, and electrifying." —Colson

Whitehead, Pulitzer Prize-winning author of The Nickel Boys and Harlem Shuffle "...My Monticello' is, quite simply, an extraordinary debut from a gifted writer with an unflinching view of history and what may come of it." — The Washington Post
 Winner of the Weatherford Award in Fiction A young woman descended from Thomas Jefferson and Sally Hemings driven from her neighborhood by a white militia. A university professor studying racism by conducting a secret

social experiment on his own son. A single mother desperate to buy her first home even as the world hurtles toward catastrophe. Each fighting to survive in America. Tough-minded, vulnerable, and brave, Jocelyn Nicole Johnson's precisely imagined debut explores burdened inheritances and extraordinary pursuits of belonging. Set in the near future, the eponymous novella, "My Monticello," tells of a diverse group of Charlottesville neighbors fleeing violent white

supremacists. Led by Da'Naisha, a young Black descendant of Thomas Jefferson and Sally Hemings, they seek refuge in Jefferson's historic plantation home in a desperate attempt to outlive the long-foretold racial and environmental unravelling within the nation. In "Control Negro," hailed by Roxane Gay as "one hell of a story," a university professor devotes himself to the study of racism and the development of ACMs (average American Caucasian males) by

clinically observing his own son from birth in order to "painstakingly mark the route of this Black child too, one whom I could prove was so strikingly decent and true that America could not find fault in him unless we as a nation had projected it there." Johnson's characters all seek out home as a place and an internal state, whether in the form of a Nigerian widower who immigrates to a meager existence in the city of Alexandria, finding himself adrift; a young mixed-race woman

who adopts a new tongue and name to escape the landscapes of rural Virginia and her family; or a single mother who seeks salvation through "Buying a House Ahead of the Apocalypse." United by these characters' relentless struggles against reality and fate, *My Monticello* is a formidable book that bears witness to this country's legacies and announces the arrival of a wildly original new voice in American fiction. *What Higher Education Is and What It Can Be*

There is a high risk that someone will use, by accident or design, one or more of the 17,000 nuclear weapons in the world today. Many thought such threats ended with the Cold War or that current policies can prevent or contain nuclear disaster. They are dead wrong—these weapons, possessed by states large and small, stable and unstable, remain an ongoing nightmare. Joseph Cirincione surveys the best thinking and worst

fears of experts specializing in nuclear warfare and assesses the efforts to reduce or eliminate these nuclear dangers. His book offers hope: in the 1960s, twenty-three states had nuclear weapons and research programs; today, only nine states have weapons. More countries have abandoned nuclear weapon programs than have developed them, and global arsenals are just one-quarter of what they were during the Cold War. Yet can these trends continue, or are we on the

brink of a new arms race—or worse, nuclear war? A former member of Senator Obama's nuclear policy team, Cirincione helped shape the policies unveiled in Prague in 2009, and, as president of an organization intent on reducing nuclear threats, he operates at the center of debates on nuclear terrorism, new nuclear nations, and the risks of existing arsenals.

Will you, your loved ones be safe at work, school or when shopping or at the

10k race? That's what the victims of terror thought before the deaths and injuries in the San Bernardino terrorist attack by a foreign trained couple that killed 14 and injured 22 fellow Americans. It could have been prevented-if people knew what to look for and how to report it. The Boston Marathon bombings-that killed three and wounded 260 innocent people could have been prevented too, at least one of them. A victim who lost his legs from the bombings, NAME

HERE, saw one of the bombers ignoring the race and tending suspiciously to a backpack. Had NAME known what to look for and reported what he saw, before it was too late-he might still have his legs and there might have been no deaths and no devastating injuries. These examples of terrorist caused death and devastation right here in our Homelands point clearly why we all need to read the and know How To Spot A Terrorist - Before Its' Too Late written by just-retired FBI

Special Agent, John Iannarelli. Government agencies including Homeland Security and law enforcement make clear that terrorists are here and plotting and thus may well be in your neighborhood and mine, near our workplaces and where we play. They are planning, preparing, doing test runs. There can never be enough police to see everything. That's why we ALL need to know what to look for, why we all need to know how to spot terrorists during their attack preparations and

how to report it to police, the FBI, etc. To empower all Americans to be ready and know to spot terror activity and report it to help protect themselves, loved ones and co-workers former FBI Special Agent Iannarelli has taken his extensive and sophisticated FBI training and field experiences and adapted them into 10 easy things every American can do To Spot A Terrorist - Before Its' Too Late. How To Spot A Terrorist - Before Its' Too Late is written to help prevent and stop terror

before it happens. Yet, terror may still find us and we need to know what to do if it happens (if the innocent workers at the site of the San Bernardino attack had read this book, maybe there would have been less carnage). Iannarelli has devoted an entire chapter on what to do if terror finds you and he's included a resource guide in the book to enable readers to get more information and guidance on things like creating a family disaster plan. Change your attitude, change your life. We're very good at explaining why we're unhappy: bad job, bad relationships, bad luck. But there's probably a better reason: bad attitudes. In Lord, Change My Attitude, James MacDonald shows us just how much our attitudes affect our lives. One of his bestsellers, this book is classic James: It's clear, it's inspiring, and it packs a punch. Drawing from the experience of the Israelites who grumbled

through the wilderness, MacDonald shows how bad attitudes rob us of joy. Coveting, complaining, and being critical are not what our hearts were made for. They were made for thankfulness, contentment, and love. Is your heart straining under the weight of a bad attitude? Don't read this book if you're looking for a quick fix. Don't read this book if you're unwilling to change. Read it if you're ready for a serious, inside-out attitude adjustment.

Why higher education in the United States has lost its way, and how universities and colleges can focus sharply on their core mission. For *The Real World of College*, Wendy Fischman and Howard Gardner analyzed in-depth interviews with more than 2,000 students,

alumni, faculty, administrators, parents, trustees, and others, which were conducted at ten institutions ranging from highly selective liberal arts colleges to less-selective state schools. What they found challenged characterizations in the media: students are not preoccupied by political correctness, free speech, or even the cost of college. They are most concerned about their GPA and their resumes; they see jobs and earning potential as more

important than learning. Many say they face mental health challenges, fear that they don't belong, and feel a deep sense of alienation. Given this daily reality for students, has higher education lost its way? Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission. Fischman and Gardner, both recognized authorities on education and learning, argue that higher education in the

United States has lost sight of its principal reason for existing: not vocational training, not the provision of campus amenities, but to increase what Fischman and Gardner call "higher education capital"—to help students think well and broadly, express themselves clearly, explore new areas, and be open to possible transformations. Fischman and Gardner offer cogent recommendations for how

every college can become a community of learners who are open to change as thinkers, citizens, and human beings. *Fahrenheit 451* Penguin
