Das wunderbare Comeback nach über 55 Jahren seit der Präsentation der Compact Cassette ist schon erstaunlich! Denn Bandsalat, Azimut-Fehler und weitere Probleme mit Cassetten, begleiteten uns alle über Jahrzehnte. Aber die liebevoll zusammengestellten Mix-Tapes und die herrlichen Erinnerungen lassen oder ließen die Probleme vergessen. Aber wer seine Technik pflegte und wartete, den verließ der Recorder nie! Und mit den Schlachtschiffen Tri Tracer und Dragon von NAKAMICHI wurde alles perfekt aufgenommen und abgespielt. Auch andere Hersteller müsste ich erwähnen, aber wir als SÜLTZ ELEKTRONIK haben uns seit 1973 auf NAKAMICHI und ELAC spezialisiert, also sage ich "SORRY", denn auch SONY, DENON, usw. haben Klasse Recorder. In diesem Fotobuch, auf 200g-Brillant-Papier, gedruckt, wird kurz die Geschichte ab 1963, von MONO über STEREO zu HiFi, behandelt. Viele Cassetten werden gezeigt, vor allem Mess-Cassetten. Es werden Tipps gegeben und mit Bildern ein Service am Recorder gezeigt. Ebenso der Selbstbau eines Tonkopfes aus Einzelteilen, bei nicht mehr zu findender gesuchter Eintauchtiefe. Zu sehen sind die nie veröffentlichte Einlochcassette (auch zerlegt), ein Tri-Corder (Star Trek), die erste Werbung vom PHILIPS EL 3300, die erste Cassette EL 1903 (auch zerlegt), die erste Werbung vom ELAC CD 400, erste Werbung von THE FISHER und HARMAN KARDON, der Recorder ADVENT 200, das alte Logo von NAKAMICHI, die weltersten MusiCassetten, einen Kalender 100 Jahre Compact Cassetten (2063), sowie ein Auszug vom NAKAMICHI 700 und 1000 Tri Tracer aus dem Jahr 1973.

Comer and Gould's Psychology Around Us demonstrates the

many-often surprising, always fascinating-intersections of psychology with students' day-to-day lives. Every chapter includes sections on human development, brain function, individual differences and abnormal psychology that occur in that area. These "cut-across" sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life. Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior. This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant. The text presents psychology as a unified field the understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies (research methodology, cutting edge studies, the application of critical thinking).

The Rough Guide to Japan Edmunds Publications

Brave New Digital Classroom examines the most effective ways to utilize technology in language learning. The author deftly interweaves the latest results of pedagogical research with descriptions of the most successful computer-assisted language learning (CALL) projects to show how to implement technology in the foreign-language curriculum to assist the second language acquisition process. This fully updated second edition includes new chapters on the latest electronic resources, including gaming and social media, and discusses the realities and potential of distance learning for second language acquisition. The author examines the web, CALL applications, and computer-mediated

communication (CMC), and suggests how the new technologically assisted curriculum will work for the foreign-language curriculum. Rather than advocating new technologies as a replacement for activities that can be done equally well with traditional processes, the author envisions a radical change as teachers rethink their strategies and develop their competence in the effective use of technology in language teaching and learning. Directed at all language teachers, from the elementary school to postsecondary levels, the book is ideal for graduate-level courses on second language pedagogy. It also serves as an invaluable reference for experienced researchers, CALL developers, department chairs, and administrators.
