Cost Accounting provides a practical knowledge of systems and procedures and will prepare students for many of the career opportunities available in cost accounting. The text opens by giving students an overview of the nature and purpose of cost accounting. Building on these notions students will then learn the basic concept that cost flow matches work flow. Afterward students are led throughout the major areas of cost accounting: job order cost accounting, process cost accounting, budgeting, standard costs, direct costing, and non-manufacturing costs. Each new segment of instruction is carefully explained and illustrated. A summary at the end of each chapter reviews the basic principles and procedures covered. Questions which require review and/or managerial analysis, along with application activities in the form of exercises, problems, alternate problems, Excel problems, and cases help students integrate their learning while everything is fresh in their minds.

*Cost Accounting Fundamentals* Thomson

This book has been written specifically for the students of BCom (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book *Cost Accounting—Principles and Practice*, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.
