Foreword The Collected Poems of Lucille Clifton 1965-2010 combines all eleven of Lucille Clifton's published collections with more than fifty previously unpublished poems. The unpublished poems feature early poems from 1965-1969, a collection-in-progress titled the book of days (2008), and a poignant selection of final poems. An insightful foreword by Nobel Prize-winning author Toni Morrison and comprehensive afterword by noted poet Kevin Young frames Clifton's lifetime body of work, providing the definitive statement about this major America poet's career. On February 13, 2010, the poetry world lost one of its most distinguished

members with the passing of Lucille Clifton. In the last year of her life, she was named the first African American woman to receive the \$100,000 Ruth Lilly Poetry Prize honoring a US poet whose "lifetime accomplishments warrant extraordinary recognition," and was posthumously awarded the Robert Frost Medal for lifetime achievement from the Poetry Society of America. "mother-tongue: to man-kind" (from the unpublished book of days): all that I am asking is that you see me as something more than a common occurrence, more than a woman in her ordinary skin.

Do you want to sit out

your retirement in a stinky chair in a state-run care home or use the next 20-40 years to pursue your passions, travel and have fun with the people that matter to you? We are living longer and retirement needs redefining. Unlike our grandparents, who collected their pension for a few years before passing away, we have got decades worth of having fun to plan for. The mistake most people make is thinking that their pension and the NHS will somehow provide them with everything that they need. The fact is, the government can't cope with the effect of an increasing and ageing population, combined with the fact that many pension pots were wiped out during the last financial crisis.

It's time for you to take back financial control and start planning a strategy to create the Non-Traditional Retirement that you want. It's never too early to start planning. Sadly, most people just don't know how to. Successful entrepreneur, Vicki Wusche, shares her tried and tested 3-stage system for getting your finances in order, planning an investment strategy that works for you, and gradually reducing the proportion of your monthly expenses covered by your wages. She clearly explains how these expenses need to be reduced until they are totally covered by your investments, allowing you to step out of full-time work and ease into a Non-Traditional

Retirement. Using the principles, tools and valuable resources that she shares in this book, you will be able to plan and build the retirement you want - whether that involves scuba diving in warm blue waters, setting up a business or charity, sharing your skills with younger people or even helping your community.

Retirement should be where real life begins. Named as one of The Telegraph's top 25 most influential people in property, Vicki Wusche went from being a single mum on benefits to retiring wealthy at 48 because she created her Non-Traditional Retirement Plan. Find out more at www.vickiwusche.com

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than

the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing

exploration of the secrets our brains keep from us—and how they are revealed.
