Tumor Board Reviews provides comprehensive coverage of all topics in oncology. Each of the 32 chapters focuses on a specific major disease. A brief overview of epidemiology and risk factors is followed by a sequence of specific presentations organized by tumors stage or disease classification. Each discussion features a case presentation that mimics the format of a tumor board presentation and thus illustrates key diagnostic and management decisions. There is also a discussion of the evidence that supports the clinical management decisions taken in the case, based on current expert panel guidelines. Algorithms and decision tree graphics are used extensively to provide visual support of the decision process. The combination of case presentations and evidence-based management discussions make this volume a unique tool for keeping current with clinical guidelines and provides the reader with a clear understanding of applications of new information for use in daily practice.

This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.
