Velocity
 definition is - quickness of motion : speed. How to use velocity in a sentence. Velocity | Definition of Velocity by Merriam-Webster
 The velocity of an object is the rate of change of its position with respect to a frame of reference, and is a function of time. Velocity is equivalent to a specification of an object's speed and direction of motion (e.g. 60 km/h to the north). Velocity is a fundamental concept in kinematics, the branch of classical mechanics that describes the motion of bodies. Velocity - Wikipedia
 Like speed, velocity refers to the at which an object is moving—the distance per unit of time. But velocity in physics also

includes the direction in which the object is moving, whereas direction has no bearing on an object's speed. For example, if two cars were driving at a of 50 miles per hour, and both headed due north,... Velocity - definition of velocity by The Free Dictionary
 rapidity of motion or operation; swiftness; speed: a high wind velocity. Mechanics. the time rate of change of position of a body in a specified direction. the rate of speed with which something happens; rapidity of action or reaction. Origin of velocity. Mark ignores his birthday, and realizes that a car lined up for restoration may not be worth the effort. MotorTrend - Official Site Velocity, a division of Butler Electric Cooperative, continues to make strides to provide high-speed internet to all of Butler County. Velocity High Speed Internet Service Velocity Is an Important Concept in

Physics. Velocity is defined as a vector measurement of the rate and direction of motion or, in simpler terms, the rate and direction of the change in the position of an object. The scalar (absolute value) magnitude of the velocity vector is the speed of the motion. In calculus terms, velocity is the first derivative of position with respect to time. What Is Velocity in Physics? - thoughtco.com Velocity is the global frequent flyer program of the Virgin Australia group of airlines, providing many easy, everyday ways to earn Velocity Points.
