A Wall Street Journal Bestseller A prescriptive and timely guide to finding success and happiness without a college degree by Ken Rusk, the Ohio-based entrepreneur and “million-dollar ditch digger” who believes it is time to celebrate the possibilities and financial opportunities that a Blue-Collar life can bring. A BLUE-COLLAR APPROACH TO CREATING A LIFE YOU LOVE In a period of skyrocketing student loan debt without the promise of high-paying employment, and in an economy in desperate need of skilled tradespeople, many are seeking new paths. Ken Rusk, the “million-dollar ditch digger,” is here to show you that blue-collar trades are a source of pride and that you can—and will—find your version of happiness by pursuing a good old-fashioned craft. In Blue Collar Cash, Ken shares his insights from over 30 years working in blue collar trades as an entrepreneur, mentor, and life coach. Ken knows from his own experience—first as a young kid digging ditches, and then as the owner of a successful concrete construction business—that working with your hands at a job that takes skill and practice can be monumentally rewarding and life-affirming. Since then, he has built a multi-million-dollar business and gone on to mentor hundreds of employees in how to manage their money and set achievable goals. Using the stories of those who have discovered lives of comfort, peace, and freedom, Ken creates a step-by-step, interactive guide—including financial planning and savings advice—to creating alternative and realistic routes to success and fulfillment.

The Journal of the American Society of Mechanical Engineers

Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the

two-volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process. The first volume, Human Factors and Ergonomics in Consumer Product Design: Methods and Techniques, outlines the how to incorporate Human Factors and Ergonomics (HF/E) principles and knowledge into the design of consumer products in a variety of applications. It discusses the user-centered design process, starting with how mental workload affects every day interactions with consumer products and what lessons may be applied to product design. The book then highlights the ever-increasing role of information technology, including digital imaging, video and other media, and virtual reality applications in consumer product design. It also explores user-centered aspect of consumer product development with discussions of user-centered vs. task-based approach, articulation and assessment of user requirements and needs, interaction with design models, and eco design. With contributions from a team of researchers from 21 countries, the book covers the current state of the art methods and techniques of product ergonomics. It provides an increased knowledge of how to apply the HF/E principles that ultimately leads to better product design.
