stayed in Jamaica until his death in 1786. He wrote a diary, which eventually ran to some 10,000 pages, and this diary became an important historical document on slavery and history of Jamaica.

Pidgin and Creole Linguistics

Karoma Publishers, Incorporated
This 1803 work outlines the background to, and conduct of, the war between the British and

Maroon rebels in Jamaica. *Towards a Social Science of Language* University of Alabama Press
The topic of dialectal variation in Basque, a language isolate and the last remaining descendant of the pre-Indo-European languages of Western Europe, has long been a contentious issue in both academic and wider social circles. In *The Dialects of Basque*, the first major work of its kind in English

and a revised version of his bestselling work in the Basque Country, Koldo Zuazo makes two significant contributions to the study of Basque dialects: on the one hand, he introduces a new classification scheme for the different dialects of the Basque language, thereby breaking with the influential categories established by the renowned philologist Louis Lucien Bonaparte in the nineteenth century. On

the other, following the pioneering work of experts like Koldo Mitxelena, he contends that the origins of dialectal variation in Basque are not as old as many scholars--including the celebrated Basque specialist Julio Caro Baroja--have argued. Zuazo also observes that, while there is rich dialectal variation in Basque, comprehension among native speakers is not as difficult

as has been previously contended. Moreover, he includes in the work more in-depth case studies of the dialects spoken in the Baztan Valley of Navarre and the area around Irun and Errenteria in Gipuzkoa, respectively, as well as a critical examination of theories suggesting the existence of a hybrid Basque dialect in the Americas. *Language in Exile* Westminster Creolistics The songs,

sermons and other materials collected in this anthology thoroughly characterize and demonstrate the distinctive language and culture that developed when African and European exiles came together on the plantations of Jamaica. Accounts of planters, slave-trading captains, and other testimonies from both the colonial and indigenous population effectively illustrate the

unfolding of
this unique
culture.

Lalla and D'Costa offer interesting insights into Creole genesis, not only through their careful mapping of the migrations from Europe and Africa, which

constructed the Jamaican society but also through extensive documentation of early texts. . . . Highly valuable to linguists, historians, anthropologists, psychologists, and anyone interested in the Caribbean or in the history of mankind." -- New West Indian Guide **St. Kitts and the Atlantic Creoles** John Benjamins Publishing This collection in honor of Charlene

Junko Sato (1951-1996) brings together contributions by leading specialists in pidgin-creole studies in three primary areas: Pidgin-Creole Genesis and Development; Attitudes and Education, and Creole Discourse and Literature. The varieties covered come from English, French and Spanish lexical bases and from places as far apart as Africa, Australia, Hawaii, and the Caribbean.

Editors Rickford and Romaine introduce each of the papers and provide a biography and bibliography of Sato. A short story and poems in Hawaiian Creole, Sato's native language and the variety which was the focus of her

research and writing, round out the collection. *Out of Africa* Center for Basque Studies Press "Modern translation and original Basque version of the first book printed in the Basque language in Baiona in
