Air Transportation: A Management Perspective by John Wensveen is a proven textbook that offers a comprehensive introduction to the theory and practice of air transportation management. In addition to explaining the fundamentals, the book transports the reader to the leading edge of the discipline, using past and present trends to forecast future challenges and opportunities the industry may face, encouraging the reader to really think about the decisions a manager implements. Written in an easy-to-read, easy-to-understand style, the Eighth Edition modernizes the text focusing on newly emerging management trends, innovative technology, and an increased emphasis on global changes in the industry that will change the future of aviation. New and updated material has been added throughout the text including mini case examples and supplemental presentation materials for each chapter. Air Transportation: A Management Perspective is suitable for almost all aviation programs that feature business and management. Its student-friendly structure and style make it highly suitable for modular courses and distance-learning programs, or for self-directed study and continuing personal professional development.

Now in its sixth edition, Air Transportation by John Wensveen is a proven textbook that offers a comprehensive introduction to the theory and practice of air transportation management. In addition to explaining the fundamentals, this book now takes the reader to the leading edge of the discipline, using past and present trends to forecast future challenges the industry may face and encouraging the reader to really think about the decisions a manager implements. The Sixth Edition contains updated material on airline passenger marketing, labor relations, financing and heightened security precautions. Arranged in sharply focused parts and accessible sections, the exposition is clear and reader-friendly. Air Transportation is suitable for almost all aviation programs that feature business and management, modular courses and distance learning programmes, or for self-directed study and continuing personal professional development.

Aviation Week & Space Technology Causey Enterprises, LLC

The current conditions of the Air Transport industry, as well as expectations for the future, are presented in sections covering the historical and present status of air transportation, regulation and administration of air transportation, air carrier aircraft (Boeing, McDonnell Douglas, Lockheed Martin, Airbus, and National Aero-space), and general aviation. The final legislation of the General Aviation Revitalization Act (1994) is presented in a new chapter. The included disk contains a DOS-based summary of the chapters.
