Marine Industry Characterization Report Marine Diesel Basics 1 Maintenance, Lay-up, winter Protection, Tropical Storage, Spring Recommission
 High Performance Marine Vessels (HPMV) range from the Fast Ferries to the latest high speed Navy Craft, including competition power boats and hydroplanes, hydrofoils, hovercraft, catamarans and other multi-hull craft. High Performance Marine Vessels covers the main concepts of HPMVs and discusses historical background, design features, services that have been successful and not so successful, and some sample data of the range of HPMVs to date. Included is a comparison of all HPMVs craft and the differences between them and descriptions of performance (hydrodynamics and aerodynamics). Readers will find a comprehensive overview of the design, development and building of HPMVs.

Yachting World's Greatest
 "In 1776, American Patriots attempted to destroy the British flagship Eagle using a man-operated semi-submersible, the Turtle, in New York harbor. The attack failed, but the idea stuck. Almost 90 years later, the CSS Hunley successfully attacked the Federal sloop USS Housatonic by ramming into it with a 59-kilogram (130-pound) spar torpedo. The Housatonic became the first ship in naval history to be sunk by a submarine and so submarine warfare was born. Urea-SCR Technology for deNOx After Treatment of Diesel

Exhausts presents a complete overview of the selective catalytic reduction of NOx by ammonia/urea. The book starts with an illustration of the technology in the framework of the current context (legislation, market, system configurations), covers the fundamental aspects of the SCR process (catalysts, chemistry, mechanism, kinetics) and analyzes its application to useful topics such as modeling of full scale monolith catalysts, control aspects, ammonia injections systems and integration with other devices for combined removal of pollutants.
