 Springer

« C'est ainsi qu'au fond d'un strip-club de Bratislava, je décidais qu'en lieu et place d'un travail acharné pour réussir tout ce que j'entreprends et y trouver un sens, j'allais surfer sur un tsunami de résignation face à tout ce que la vie me jette au visage tout en souriant le plus souvent possible. J'allais accepter les choses telles qu'elles sont. Ivre, je découvrais la non-ambition. » À l'heure où les réseaux sociaux, les médias ou encore nos parents nous poussent à avoir un destin exceptionnel, Paul Douard cultive la non-ambition. Pourquoi être extraordinaire alors que l'on peut être parfaitement banal ? Pourquoi s'épuiser alors que l'on va tous mourir ? Pourquoi s'infliger les mariages et les enterrements des autres ? Ou plus généralement pourquoi supporter les autres tout simplement ? Paul Douard, à travers de nombreuses thématiques et un humour grinçant, offre un large aperçu de ce qu'est une vie guidée par la non-ambition.

The Citroen DS launched in 1955 and continued for 20 years. It remains highly collectible and desirable for enthusiasts of European auto. As with all of our Original titles, this book aims to guide collectors, restorers, and enthusiasts through the various production changes between model years to make sure their restoration or prospective purchase is correct, original, and legitimate. With thorough text and detailed photography, every part of the car is cataloged.

Diagnostics: Test don't guess. Learn all the skills you need to pass Level 3 and 4 Vehicle Diagnostics courses from IMI, City & Guilds, and BTEC, as well as ASE, AUR, and other higher-level qualifications. Along with 25 new real-life case studies, this fifth edition of *Advanced Automotive Fault Diagnosis* includes new content on diagnostic tools and equipment: VCDS, decade boxes, scanners, pass through, sensor simulators, break out boxes, multimeter updates for HV use, and more . It explains the fundamentals of vehicle systems and components, and it

examines diagnostic principles and the latest techniques employed in effective vehicle maintenance and repair. Diagnostics, or faultfinding, is an essential part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Ideal for students, included throughout the text are useful definitions, key facts, and 'safety first' notes. This text will also assist experienced technicians to further improve their performance and keep up with recent industry developments.

Max Milo

Jamais le mot « compétitivité » n'a été si présent dans le langage des économistes et des politiques. Jamais l'entreprise n'a été autant mise en avant, en dépit des restructurations industrielles devenues aujourd'hui permanentes. Pour les collectivités territoriales, la question de l'attractivité des territoires est aujourd'hui cruciale... Face aux politiques d'attractivité traditionnelles qui se contentent de répondre aux besoins des entreprises, cet ouvrage vient rappeler que l'entreprise n'est pas un acteur anodin. Par ses différentes stratégies et organisations, elle inscrit les territoires dans des trajectoires de développement qui ne sont pas toujours choisies. Souvent négligée, l'empreinte territoriale de l'entreprise est une problématique que doivent prendre en considération les collectivités territoriales dans la définition de leurs politiques de développement local. L'auteur évoque ici une autre politique d'attractivité, fondée non à partir de l'entreprise mais du territoire, de ses besoins et de ses projets. Cette démarche vers une politique durable et sélective nécessite un engagement citoyen des acteurs.

Le monde a changé. Toutes les marques "classiques" sont désormais sur Internet et celui-ci a aussi généré des types de marques qui n'existaient pas du tout et qui ont bouleversé le monde économique : sites d'information, sites de ventes entre particuliers. Pour les entreprises classiques qui avaient déjà des marques fortes, c'est un bouleversement ; pour les pure players, les marques seulement présentes sur le web, ce sont des règles à inventer. Et même si les enjeux diffèrent parfois entre les deux types de marques, ils sont pourtant bien réels. Comment ne pas faire d'erreur dans la gestion de sa marque sur Internet ? Véritable mode d'emploi, cet ouvrage permet de gérer et valoriser sa marque grâce au e-branding.

*La couleur au cœur de la stratégie marketing* Autronica Srl

"Les 5 points forts : unique en son genre, cet ouvrage présente une approche originale sur l'utilisation de la couleur en marketing ; il propose une synthèse riche conciliant aussi bien la théorie que la pratique ; il est axé sur les recherches les plus abouties dans le domaine ; il est abondamment illustré par des exemples concrets qui viennent enrichir la lecture ; l'ouvrage est complété d'une version numérique (Noto). Rejetant la morosité ambiante, les consommateurs partent à la redécouverte de leurs sens, poussant les objets à devenir émotionnels et les entreprises à réenchanter leur offre. La couleur joue un rôle clé dans ce besoin de divertissement au sein de la consommation. On constate depuis quelques temps son grand retour en force. La couleur habille les objets, débanalise les produits, impose la nouveauté et réintroduit le concept d'achat plaisir. Elle peut dès lors représenter un véritable atout au cœur de la stratégie marketing des entreprises. Cet ouvrage s'attache à montrer, grâce à de nombreux exemples concrets, l'impact que peut avoir la couleur sur la stratégie et le mix marketing." [Source : 4e de couv.].

Whether you drool over their horsepower or decry their emissions, the car is an important and ubiquitous part of nearly all of our lives. And the history of their design and the innovations of their technologies can tell us a lot about how our values and attitudes have changed. In this book, Gregory Votolato shows us how and why the automobile has become—since its rise in the late nineteenth century—at once an object of unparalleled popular desire and a hugely problematic emblem of the modern world. Votolato explores the ways that our love-hate relationship with the car has been intimately connected with car design. He tells the story of the rise of the private passenger car and all the psychological, social, and economic functions it has come to serve beyond mere transportation. Introducing readers to the automotive design process, he traces the lifecycle of the car from the drawing board to the scrapyards, offering insights from key figures in the industry, as well as a careful evaluation of the car's enormous environmental impact. At the same time, he looks at the many cultures tied into the automobile, from drag racing and customizing to the luxury coachcraft of the classic era. Along the way, he takes us for a ride in some of the most famous cars ever to have had their tires inflated, from the Model T to the Tesla. The result is a top-down, thrilling burn through the history of one of our most beloved—and lamented—innovations.

In a globalized world full of noise, brands are constantly launching messages through different channels. For the last two decades, brands, marketers, and creatives have faced the difficult task of reaching those individuals who do not want to watch or listen to what they are trying to tell them. By producing fewer ads or making them louder or more striking, more brands and communications professionals are not going to get those people to pay more attention to their messages; they will only want to avoid advertising in all media. The Handbook of Research on the Future of Advertising and Brands in the New Entertainment Landscape provides a theoretical, reflective, and empirical perspective on branded content and branded entertainment in relation to audience engagement. It reviews different cases about branded content to address the dramatic change that brands and conventional advertising are facing short term. Covering topics such as branded content measurement tools, digital entertainment culture, and government storytelling, this major reference work is an excellent resource for marketers, advertising agencies, brand managers, business leaders and managers, communications professionals, government officials, non-profit organizations, students and educators of higher education, academic libraries, researchers, and academicians. *Market Entry in China* De Boeck Superieur

This book compiles brand new case studies on the intricacies and market entry strategies of different companies in China. The sheer speed and scope of China's growth makes it unique and investment opportunities are very attractive. Despite the potential, many western companies fail in their market entry strategies. This book traces the major sources of failure and uses cases to illustrate how firms can better cope with the challenging Chinese market. With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

*Reponses Cuisine* Emerald Group Publishing

Long regarded as a maudlin mental state, nostalgia is everywhere and has been reimagined as a signifier of good mental health. It is no longer the bailiwick of right-wing

reactionaries but a crucible of critical thinking and revolutionary intent. This book explores the revolution in nostalgia and the nostalgia in revolution.

*The New Citroën Building the Largest Service Station in the World* Haynes Publishing

The aim of this manual is to help readers get the best from their vehicle. It provides information on routine maintenance and servicing and the tasks are described and photographed in a step-by-step sequence so that even a novice can do the work.

*SchizophréniA* Armand Colin

La schizophrénie est un fardeau pour ceux qui la vivent, comme elle est un supplice pour ceux qui la subissent ! La plupart du temps, les personnes atteintes de ce trouble de santé mentale n'en sont malheureusement pas conscientes. Même accompagnées de leurs proches, elles n'arrivent pas forcément à distinguer la réalité de la fiction, jusqu'au point de s'enfermer dans leur imaginaire, en oubliant toute rationalité et en se noyant dans leur monde fictif.
