As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems,

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for

NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children

to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history.

This debut novel by the two time Pulitzer Prize-winning author of *The Underground Railroad* and *The Nickel Boys* wowed critics and readers everywhere and marked the debut of an important American writer. Nominated as one of America's best-loved novels by PBS's *The Great American Read* It is a time of calamity in a major metropolitan city's Department of Elevator Inspectors, and Lila Mae Watson, the first black female elevator inspector in the history of the department, is at the center of it. There are two warring factions within the department: the Empiricists, who work by the book and dutifully check for striations on the winch cable and such; and the Intuitionists, who are simply able to enter the elevator cab in question, meditate, and intuit any defects. Lila Mae is an Intuitionist and, it just so happens, has the highest accuracy rate in the entire department. But when an elevator in a new city building goes into total freefall on Lila Mae's watch, chaos ensues. It's an election year in the Elevator Guild, and the good-old-boy Empiricists would love nothing more than to assign the blame to an Intuitionist. But Lila Mae is never wrong. The sudden appearance of excerpts from the lost notebooks of Intuitionism's founder, James Fulton, has also caused quite a stir. The notebooks describe Fulton's work on the "black box," a perfect elevator that could reinvent the city as radically as the first passenger elevator did when patented by Elisha Otis in the nineteenth century. When Lila Mae goes underground to investigate the crash, she becomes involved in the search for the portions of the notebooks that are still missing and uncovers a secret that will change her life forever. Look for Colson Whitehead's bestselling new novel, *Harlem Shuffle!*

The Pulitzer Prize-winning biography of Harry S. Truman, whose presidency included momentous events from the atomic bombing of Japan to the outbreak of the Cold War and the Korean War, told by America's beloved and distinguished historian. The life of Harry S. Truman is one of the greatest of American stories, filled with vivid characters—Roosevelt, Churchill, Stalin, Eleanor Roosevelt, Bess Wallace Truman, George Marshall, Joe McCarthy, and Dean Acheson—and dramatic events. In this riveting biography, acclaimed historian David McCullough not only captures the man—a more complex, informed, and determined man than ever before imagined—but also the turbulent times in which he rose, boldly, to meet unprecedented challenges. The last president to serve as a living link between the nineteenth and the twentieth centuries, Truman's story spans the raw world of the Missouri frontier, World War I, the powerful Pendergast machine of Kansas City, the legendary Whistle-Stop Campaign of 1948, and the decisions to drop the atomic bomb, confront Stalin at Potsdam, send troops to Korea, and fire General MacArthur. Drawing on newly discovered archival material and extensive interviews with Truman's own family, friends, and Washington colleagues, McCullough tells the deeply moving story of the seemingly ordinary "man from Missouri" who was perhaps the most courageous president in our history.

In this revolutionary book, a renowned computer scientist

explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, Mindstorms is their bible.

An "innovative" (The New Yorker) retelling of the story of Dracula. Told with the flourish and poise of a talented storyteller, Kostova turns the age-old tale into a compelling "late night page-turner" (San Francisco Chronicle) When a young woman discovers a cache of ancient letters, she is thrown into the turbulent history of her parents' dark pasts. Uncovering a labyrinthine trail of clues, she begins to reconstruct a staggering history of deceit and violence. Debut novelist Elizabeth Kostova creates an adventure of monumental proportions, a relentless tale that blends fact and fantasy, history and the present, with an assurance that is almost unbearably suspenseful and utterly

unforgettable.

In 1998, Richard Price returned to the gritty urban landscape of his national bestseller *Clockers* to produce *Freedomland*, a searing and unforgettable novel about a hijacked car, a missing child, and an embattled neighborhood polarized by racism, distrust, and accusation. *Freedomland* hit bestseller lists from coast to coast, including those of the *Boston Globe*, *USA Today* and *Los Angeles Times*; garnered universally rave reviews; and was selected as the Grand Prize Winner of the *Imus American Book Award* and as a *New York Times Notable Book*. On May 11, this highly lauded bestseller is available in paperback for the first time. A white woman, her hands gashed and bloody, stumbles into an inner-city emergency room and announces that she has just been carjacked by a black man. But then comes the horrifying twist: Her young son was asleep in the back seat, and he has now disappeared into the night. So begins Richard Price's electrifying new novel, a tale set on the same turf--Dempsey, New Jersey--as *Clockers*. Assigned to investigate the case of Brenda Martin's missing child is detective Lorenzo Council, a local son of the very housing project targeted as the scene of the crime. Under a white-hot media glare, Lorenzo launches an all-out search for the abducted boy, even as he quietly explores a different possibility: Does Brenda Martin know a lot more about her son's disappearance than she's admitting? Right behind Lorenzo is Jesse Haus, an ambitious young reporter from the city's evening paper. Almost immediately, Jesse suspects Brenda of hiding something. Relentlessly, she works her way into the distraught mother's fragile world, befriendng her even as she

looks for the chance to break the biggest story of her career. As the search for the alleged carjacker intensifies, so does the simmering racial tension between Dempsey and its mostly white neighbor, Gannon. And when the Gannon police arrest a black man from Dempsey and declare him a suspect, the animosity between the two cities threatens to boil over into violence. With the media swarming and the mood turning increasingly ugly, Lorenzo must take desperate measures to get to the bottom of Brenda Martin's story. At once a suspenseful mystery and a brilliant portrait of two cities locked in a death-grip of explosive rage, *Freedomland* reveals the heart of the urban American experience--dislocated, furious, yearning--as never before. Richard Price has created a vibrant, gut-wrenching masterpiece whose images will remain long after the final, devastating pages.

While this version features a new *Dummies* cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find

hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
