The Ugly Vegetables Twirl

Childhood obesity has reached epidemic proportions: More than 18 million American children are considered obese and are at risk for health problems. In fact, today's generation of kids may be the first to experience shorter life spans than their parents. Leading pediatrician Dr. Joanna Dolgoff's Red Light, Green Light, Eat Right teaches kids how to make healthy choices based on the principles of the traffic light:

green light foods are nutritious, yellow light foods are eaten in moderation, and red light foods are occasional treats. The program, which has a proven 96 percent success rate, can be tailored to suit any child's age, gender, and weight goals. Snacks and meals are designed to ensure that kids get the nutrients they need to not only lose or maintain weight, but to grow strong, healthy bodies. Complete with sample menus, recipes, and an index of more than 1,000 color-coded foods, Red Light, Green Light, Eat Right provides a practical solution for one of the biggest health crises facing America's children.

Let's All Grow Vegetables Harper

In this charming story about celebrating differences a Chinese-American girl wishes for a garden of bright flowers instead of one full of bumpy, ugly, vegetables. The neighbors' gardens look so much prettier and so much more inviting to the young gardener than the garden of "black-purple-green vines, fuzzy wrinkled leaves, prickly stems, and a few little yellow flowers" that she and her mother grow. Nevertheless, mother assures her that "these are better than flowers." Come harvest time, everyone agrees as those ugly Chinese vegetables become the tastiest, most aromatic soup they have ever known. As the neighborhood comes

together to share flowers and ugly vegetable soup, the young gardener learns that regardless of appearances, everything has its own beauty and purpose. **THE UGLY VEGETABLES** springs forth with the bright and cheerful colors of blooming flowers and lumpy vegetables. Grace Lin's playful illustrations pour forth with abundant treasures. Complete with a guide to the Chinese pronunciation of the vegetables and the recipe for ugly vegetable soup! Try it . . . you'll love it, too! American Grown Twirl In her latest cookbook, Deborah Madison, America's leading authority on vegetarian cooking and author of *Vegetarian Cooking for Everyone*, reveals the

surprising relationships between vegetables, edible flowers, and herbs within the same botanical families, and how understanding these connections can help home cooks see everyday vegetables in new light. For over three decades, Deborah Madison has been at the vanguard of the vegetarian cooking movement, authoring classic books on the subject and emboldening millions of readers to cook simple, elegant, plant-based food. This groundbreaking new cookbook is Madison's crowning achievement: a celebration of the diversity of the plant kingdom, and an exploration of the fascinating relationships between vegetables, edible flowers, herbs, and

familiar wild plants within the same botanical families. Destined to become the new standard reference for cooking vegetables, *Vegetable Literacy* shows cooks that, because of their shared characteristics, vegetables within the same family can be used interchangeably in cooking. It presents an entirely new way of looking at vegetables, drawing on Madison's deep knowledge of cooking, gardening, and botany. For example, knowing that dill, chervil, cumin, parsley, coriander, anise, lovage, and caraway come from the umbellifer family makes it clear why they're such good matches for carrots, also a member of that family. With more than 300 classic and

exquisitely simple recipes, Madison brings this wealth of information together in dishes that highlight a world of complementary flavors. Griddled Artichokes with Tarragon Mayonnaise, Tomato Soup and Cilantro with Black Quinoa, Tuscan Kale Salad with Slivered Brussels Sprouts and Sesame Dressing, Kohlrabi Slaw with Frizzy Mustard Greens, and Fresh Peas with Sage on Baked Ricotta showcase combinations that are simultaneously familiar and revelatory. Inspiring improvisation in the kitchen and curiosity in the garden, *Vegetable Literacy*—an unparalleled look at culinary vegetables and plants—will forever change the way we eat

and cook.
