Summary of Investigations Relating to Reading John Wiley & Sons

One of the most important public policy issues in the United States is how to improve the life prospects of disadvantaged youth who, in their formative years, face low-quality school systems, poor access to health care, and high-crime environments. The Problems of Disadvantaged Youth includes a broad range of research examining various aspects of disadvantage, and ways of increasing the ability of low-income youths to improve their circumstances later in life. Taking an empirical economics perspective, the nine essays in this volume assess the causal impacts of disadvantage on youth outcomes, and how policy interventions can alleviate those impacts. Each chapter develops a framework to describe the relationship between youths and later life outcomes, addressing such factors as educational opportunity, health, neighborhood crime rates, and employment. This vital book documents the serious short- and long-term negative consequences of childhood disadvantage and provides nuanced evidence of the impact of public policy designed to help needy children.

The annotated bibliography describes foreign language assessment instruments currently used in elementary and middle schools. The instruments are drawn from a wide variety of program models: Foreign Language in the Elementary School (FLES), middle school sequential instruction, and immersion (total, two-way, partial). The bibliography has six sections: assessment instruments; program evaluation instruments; classroom assessment activities; sample assessment instruments; selected related resources; and selected commercially available language tests. An index of instruments according to purpose, language, and grade level is included. Descriptions of assessment instruments and activities and sample assessments were collected from teachers, schools, school districts, state education offices, and educational research organizations. In each section, materials are listed in alphabetical order according to language. The major emphasis is on French, German, Italian, Japanese, and Spanish. Also included are Arabic, Catalan, Chinese, Chukese (Lagoon),

Gallego, Haitian-Creole, Indonesian, Korean, Latin, Modern Greek, Navajo, Palauan, Pohnpeian, Portuguese, Russian, Tagalog, and Welsh. Each entry includes information on availability, current users, language program type, intended grade level, intended test use, skills tested, test author, publications date, test cost, length, test materials, format, scoring method, a description, test development and technical information, parallel versions in other languages, and a contact person. An introductory section gives an overview of the bibliography's contents and notes on selecting an assessment instrument. (MSE)

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

EDUCATIONAL RESEARCH "I wrote the book for students who are learning how to be consumers of research, as well as for those who will be planning their own research project. To be a successful researcher you need a variety of skills. You need to become a critical reader of published work, to learn about research methods and design - and to be able to put what you learn to use." Dr. Ken Springer, Southern Methodist University Clearly organized, well-written, and user-friendly, this text provides a comprehensive look at quantitative, qualitative, and mixed-method approaches to research. The first six chapters introduce educational research methods, the second six chapters focus on quantitative design and analysis, while the final six chapters cover qualitative, mixed-methods, and applied research. The comprehensive approach of this textbook is supplemented by extensive coverage of topics such as research ethics, program evaluation, and statistical analysis. Several characteristics provide students with a meaningful context for the material: Each chapter features three "Spotlight on Research" sections consisting of a lengthy excerpt from a recently published study. Discussions of research studies throughout the text provide additional context for the material. Each chapter helps students apply newly acquired knowledge through features such as end-of-chapter exercises as well as the section, "Applications: A guide for the beginning researcher." The book's companion website provides both students and instructors with additional resources, including a Study Guide, a Resource Guide (including links to full-text articles), and an Instructor's Manual and Test Bank.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The present work reports on one phase of an inquiry carried on from 1924 to 1927 by the Modern Foreign Language Study and the Canadian Committee on Modern Languages. Working with subventions granted by the Carnegie Corporation of New York and under the sponsorship of the American Council on Education, the two Committees sought to explore as fully as circumstances

permitted the situation of modern language teaching in the United States and Canada in respect to enrollment; standards of achievement; the objectives, organization, materials and methods of instruction; and the training of teachers. The ultimate object of the investigation was to ascertain

the conditions now prevailing in order to be able to draw conclusions for the future and to make suggestions for improvement in instruction. As it was necessary to bring the inquiry to an end within a period of three years, the Committees were obliged to limit their activities, in the main, to the secondary schools and the corresponding levels of college instruction.
