Model Sensitivity To Choice This paper presents sensitivity analyses for the Weather Research Forecast (WRF) model with respect to the choice of physical parameterization schemes (both cumulus parameterisation (CPSs) and microphysics parameterization schemes (MPSs)) used to represent the '1999 York Flood' event, which occurred over North Yorkshire, UK, 1 st -14 th March 1999.

The study assessed four CPSs (Kain-Fritsch (KF2), Betts-Miller-Janjic (BMJ), Grell-Devenyi ensemble (GD) and the old Kain-Fritsch ... WRF model sensitivity to choice of parameterization: a ...
