I looked and saw water rushing in from Galveston Bay on one side and from the gulf on the other. The two seas met in the middle of Broadway, swirling over the wooden paving blocks, and I couldn't help but shudder at the sight. All of Galveston appeared to be under water. Galveston, Texas, may be the booming city of the brand-new twentieth century, but to Seth, it is the end of a dream. He longs to be a carpenter like his father, but his family has moved to Galveston so he can go to a good school. Still, the last few weeks of summer might not be so bad. Seth has a real job as a builder and the beach is within walking distance. Things seem to be looking up, until a storm warning is raised one sweltering afternoon. No one could have imagined anything like this. Giant walls of water crash in from the sea. Shingles and bricks are deadly missiles flying

through the air. People not hit by flying debris are swept away by rushing water. Forget the future, Seth and his family will be lucky to survive the next twenty-four hours. Dark Water Rising is a 2007 Bank Street - Best Children's Book of the Year.

Little, Brown Books for Young Readers
Supplement your social studies curriculum with 180 days of daily practice! This essential classroom resource provides teachers with weekly social studies units that build students' content-area literacy, and are easy to incorporate into the classroom. Students will analyze primary sources, answer text-dependent questions, and improve their grade-level social studies knowledge. Each week covers a particular topic within one of the four social studies disciplines: history, economics, civics, and geography. Aligned to the National Council for the Social Studies (NCSS) and state standards, this social studies workbook includes digital materials. Houghton Mifflin Harcourt Given the boost in global immigration and migration, as well as the emphasis on creating inclusive classrooms, research is turning to the challenges that teachers

face with the increasing need for bilingual and multilingual education. The benefits of bilingual education are widespread, allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life. However, very few resources are available for the successful practice and implementation of this education into the curriculum, with an even greater lack of appropriate cultural representation in the classroom. Thus, it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful. The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves. This research anthology features a diverse collection of authors, offering valuable global perspectives on multilingual education. Covering topics such as

gamification, learning processes, and teaching models, this anthology serves as an essential resource for professors, teachers, pre-service teachers, faculty of K-12 and higher education, government officials, policymakers, researchers, and academicians with an interest in key strategy and understanding of bilingual and multilingual education.

Richard gets frustrated by most of Mr. Best's assignments, but this latest one is the worst. He has to write a composition about a proverb that illustrates something that has happened in his life. And as if that isn't bad enough, Mr. Best has told him he needs to find his "writing voice." While working on the assignment, Richard finds his voice in more ways than one. He discovers that being himself makes a big difference in his writing and in his life.

In this poetic memoir, which won the Pura Belpré Author Award, was a YALSA Nonfiction Finalist, and was named a Walter Dean Myers Award Honoree, acclaimed author Margarita Engle tells of growing up as a child of two cultures during the Cold War. Margarita is a girl from two worlds. Her heart lies in Cuba, her mother's tropical island country, a place so lush with vibrant life that it seems like a fairy tale kingdom. But most of the time she lives in Los Angeles, lonely in the noisy city and dreaming of the summers when she can take a plane through the

enchanted air to her beloved island. Words and images are her constant companions, friendly and comforting when the children at school are not. Then a revolution breaks out in Cuba. Margarita fears for her far-away family. When the hostility between Cuba and the United States erupts at the Bay of Pigs Invasion, Margarita's worlds collide in the worst way possible. How can the two countries she loves hate each other so much? And will she ever get to visit her beautiful island again?

This quasi-experimental study examined the relationship between student achievement and racial congruence levels of school personnel and students. This was accomplished through the use of publically available data and quantitative analysis. The data, deriving from 2014-2015, was collected from 158 elementary schools in the Houston Independent School District and consisted of student and personnel demographics, percentage of economically disadvantaged students, and fifth-grade students' State of Texas

Assessments of Academic Readiness (STAAR) examination scores in the areas of reading, math, and science of each school. Using the demographics data, the percentage of non-white personnel was compared to the percentage of non-white students, and schools were labeled as highly congruent, moderately congruent, or slightly congruent. While controlling for the percentage of economically disadvantaged students within each school, separate univariate ANCOVAs revealed racial congruence levels were significantly related to student achievement levels in the areas of reading and math but not science. Findings helped to clarify research from previous studies and resulted in recommendations for school leaders and teacher recruitment programs.

Thirteen-year old McKay is a talented baseball player, but as equally untalented when it comes to algebra. If he doesn't

bring his grade up, his parents threaten to make him quit the team. His best friend Tony thinks the natural solution is for McKay to befriend Serena, a pretty girl in class, who also happens to get straight A's in algebra. Not only will that get McKay the tutor he desperately needs, but it will give Tony the chance to flirt with Serena's two best friends.

Unfortunately, if McKay follows Tony's advice on how to "play the game," he might find himself in an even worse spot than when he was merely failing algebra. With a keen sense of wit, and more self-confidence than he gives himself credit for, McKay will keep readers alternately laughing and groaning as he is dragged kicking and screaming into the subtle (and often not so subtle) world of teen dating.
