Congratulations on acquiring your new CANON "EOS" R3 device. And are you looking for a guide to help you make the most out of your device? Welcome on board as this user guide has been specifically written to give you a well detailed explanation on all you need to know. Firstly Canon EOS (Electro-Optical System) is a Canon Inc. autofocus single-lens reflex camera (SLR) and mirrorless camera series. All EOS cameras, beginning with the Canon EOS 650 in 1987, utilized 35 mm film until October 1996, when the EOS IX was launched utilizing the new and short-lived APS film. The D30 was unveiled in 2000 as the first digital SLR designed and manufactured exclusively by Canon. Since 2005, all new EOS cameras have employed digital image sensors instead of film. Canon's current digital SLR (DSLR) range, as well as, with the release of the Canon EOS M in 2012, Canon's mirrorless interchangeable-lens camera (MILC) system, is based on the EOS series. The system was expanded in 2018 with the release of the EOS R camera, Canon's first full frame mirrorless interchangeable lens system. The development project was known as (Electro Optical System). EOS is also the name of the goddess of dawn in Greek mythology, which adds to the design's generational significance. [1] Handel Gothic typeface was used to design the EOS symbol. It primarily competes with Nikon's F series and successors, as well as autofocus SLR systems from Olympus Corporation, Pentax, Sony/Minolta, and Panasonic/Leica. The EF lens mount, which replaced the preceding FD lens mount, is at the heart of the system, supporting mostly manual-focus lenses. The RF mount was added to the system with the EOS R full frame camera. On this guide, we focused on how you can explore the possibilities of the Canon EOS R3 device on movie recording and shooting mode. For example how you can record movies during still photo shooting and lots more.

The Canon EOS 6D is the latest of Canon's full-frame DSLR cameras. Its impressive array of advanced capabilities allows the photographer more influence over the final image. This book's exploration of the EOS 6D goes beyond that of the user's manual. It provides illustrations, step-by-step setting adjustments, helpful suggestions for setup, and detailed explanations for each of the camera's many features and menu configurations. The text is illustrated with easy-to-follow screenshots and example images. This book will also introduce intermediate-level camera users to DSLR model-differentiating features: built-in GPS and Wi-Fi. The content covers effective use of the camera's hardware (and some software) as well as certain related accessories, with little emphasis on general photography. Author James Johnson covers everything from basic camera features to advanced photographic options. With this book as your guide, you'll learn to successfully use this powerful camera.

The basic structure of the EOS Rebel T8i/850D camera is similar to that of its predecessor model EOS Rebel T6i. This camera has a 24 Megapixel APS-C sensor. The new generation sensor with a dual-chip can capture very good images in high-contrast conditions. Due to the presence of the Dual-Chip CMOS AF sensor, it is much faster and has a much larger coverage area. It is possible to make some good photos by using the Dual-Chip CMOS AF sensor. It helps in improved AF and AF-C performance as compared to the EOS Rebel T6i. Furthermore, the user can use this camera in low-light situations. In the photos captured in low light, it is possible to see a very bright bokeh effect. Also, it has better autofocus ability than the EOS Rebel T6i. The maximum ISO can be set up to 16000 and the range of ISO 100-32000. Its electronic shutter is faster than the EOS Rebel T6i. It has a new AF algorithm that makes it possible to track the subject with very little user effort. The camera can also shoot videos in 4K resolution at 30 frames per second. The previous model EOS Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow users to click portraits with no flash. The viewfinder and the rear LCD are always shown on the top plate and the sensitivity can be adjusted. This is the Manual you need to get started with using this camera seamlessly.
