Finding definitions for fashion is easier than ever. The Fairchild Dictionary of Fashion, 3rd Edition, defines more than 15,000 fashion terms, including apparel, accessories, and their components; historical and textile terms that relate to contemporary fashion; and the language of the fashion business. Its organization of 51 broad categories, such as activewear, blouses and tops, clothing, construction details, footwear, headwear, jewelry, laces, necklines, shirts, skirts, and waistlines, promotes comprehension of related terms. Categories are fully cross-referenced to the alphabetical listing. Includes terms not readily found in ordinary dictionaries and pronunciation guides for foreign words. An appendix of designers

includes emerging leaders. Lavish illustrations by Bina Abling enhance definitions, capturing both the details and style of fashion. Labeled "anatomical" drawings show how the parts of fashion items fit together. Alphabetical page tabs add to the ease of use. This dictionary is the ideal reference for designers, fashion media, instructors, students, historians, and fashion enthusiasts.

*Copperplate Script - A Yin & Yang Approach* by Paul Antonio, is an innovative, new technology applied to an historical script. The script presented in this manual is not an historical hand, but a geometric construct to aid in a more exacting understanding of the script. This construct assists with writing a cleaner and more beautiful copperplate script. The Technology reintroduces a comprehensive terminology for the parts of the letters - words used by the English Writing Masters in their Copybooks, in the 16th, 17th and 18th centuries, as

well as additional names augmented from the historical record. Geometry and physics are used to explain how a curve works and where it sits in relation to the baseline. This concept, then compares how a car or a bicycle tackles a roundabout. Learning the skeletal forms, similar to learning Roman Capitals, is a key part of the manual. The process begins with using a pencil first, followed by the nib. The over-arching concept of the technology utilises 4Fold Symmetry. There are four facets in the 4Fold Symmetry, all of which have 2 aspects; simple and complex. Angular Confinement is the first facet. It shows how confining the curves, inside a plane sided figure (in this case a parallelogram), is like drawing a square to plot a circle. Additional pages of study

include an extensive list of difficult-to-write practise words, exemplars of numbers and variations, ligatures of double letters and ampersands. Sections on Brush Copperplate, Flourishing and its rules, as well as a glossary, augment this fine body of work. This manual offers an extensive, in-depth study of Copperplate Script suitable for any level of ability and an extraordinary resource for the beginner, intermediate or advanced calligrapher.

**Fashion Portfolio** Courier Corporation This handy studio reference teaches draping, drafting, and drawing the way they are practiced in the industry: by integrating them throughout the creative process. Integrating Draping, Drafting,

and Drawing illustrates the design process, encompassing sketch and garment pattern development, and creates bridges between studio methods and design illustration. Chapters are presented as hands-on learning experiences with lessons that mimic classroom demonstrations. Step-by-step photographs portray the draping process in a sculptural way rather than using illustrations, which cannot truly depict the response of fabric draped on a dress form. Throughout the book, instructions for producing patterns and slopers-skirts, bodices, necklines and collars, and sleeves-are presented, along with variations, so that students will be able to drape, draft, and draw complete garments. The concluding chapter of the book is devoted to drawing exercises

based on the work of 20th century designer Donald Brooks.
