 In the fourteen years of NDTV's Walk The Talk Shekhar Gupta has interviewed more than 600 stellar guests-an outstanding feature for one of Indian TV news channel's most respected shows is the wide diversity of its guests. These range from heads of states to national, regional and international politicians and public figures, from Indian and global film stars to Nobel Laureates, scientists, economists, sports stars (not limited to cricket), spiritual gurus, business tycoons, philanthropists and, of course, activists. This book focuses exclusively on political leaders and public figures. Many of these conversations are path-breaking, and some extremely rare. For example, leaders like Sonia Gandhi and former prime minister P.V. Narasimha Rao have never before engaged in freewheeling, recorded conversations in such detail. Others have

broken new ground since- Narendra Modi, L.K. Advani, Pranab Mukherjee, Mayawati and even M. Karunanidhi. There are also global thought leaders and heads of state: David Cameron, Henry Kissinger, and Pushp Kamal Dahal 'Prachanda', among others. There is also the rarest of rare interviews with the former RSS chief K.S. Sudarshan. It was challenging to choose just twenty-five political personalities and voices to feature in this selection. And one criterion has been to try and pick those conversations that mark political shifts and change. Hopefully, these will help provide an understanding of recent political history, and how we have reached the point we are at today, in the words of these very significant and interesting people.

The poems of the fourteenth-century Kashmiri mystic Lal Ded, popularly known as Lalla, strike us like brief and blinding bursts of light. Emotionally rich yet philosophically precise, sumptuously enigmatic yet crisply structured, these poems are as sensuously evocative as they are charged with an ecstatic devotion. Stripping away a century of Victorian-inflected translations and paraphrases, and restoring the jagged, colloquial power of Lalla's voice, in Ranjit Hoskote's new translation these poems are glorious manifestos of illumination.

This book explores the combination of capital's changing composition and labour's subjective agency to examine whether the waning days of the 'sweatshop' have indeed begun. Focused on the garment and footwear sectors, it introduces a universal logic that

governs competition and reshapes the chain. By analysing workers' collective action at various sites of production, it observes how this internal logic plays out for labour who are testing the limits of the social order, stretching it until the seams show. By examining the most valorised parts of underdeveloped sectors, one can see where capital is going and how it is getting there. These findings contribute to ongoing efforts to establish workers' rights in sectors plagued by poverty and powerlessness, building fires and collapses. With this change and a capable labour movement, there's hope yet that workers may close the gap.

"What men will fight for seems to be worth looking into," H. L. Mencken noted shortly after the close of the First World War. Prior to that war, although many military commanders and theorists had throughout history shown an aptitude for devising maxims concerning esprit de corps, fighting spirit, morale, and the like,

military organizations had rarely sought either to understand or to promote combat motivation. For example, an officer who graduated from the Royal Military College (Sandhurst) at the end of the nineteenth century later commented that the art of leadership was utterly neglected (Charlton 1931, p. 48), while General Wavell recalled that during his course at the British Staff College at Camberley (1909-10) insufficient stress was laid "on the factor of morale, or how to induce it and maintain it" (quoted in Connell 1964, p. 63). The First World War forced commanders and staffs to take account of psychological factors and to anticipate widely varied responses to the combat environment because, unlike most previous wars, it was not fought by relatively small and homogeneous armies of regulars and trained reservists. The mobilization by the belligerents of about 65 million men (many of whom were enrolled under duress), the evidence of fairly widespread psychiatric breakdown, and the postwar disillusion (- xiii xiv PREFACE amplified in

books like C. E. Montague's *Disenchantment*, published in 1922) all tended to dispel assumptions and to provoke questions about motivation and morale.

A journalist's account of investigating Gurmeet Ram Rahim and his empire of exploitation How did a nondescript young man from a farming family become the head of a quasi-religious sect with a million followers willing to die and kill for their 'Pitaji'? The story of the rise of Gurmeet Ram Rahim Singh Insan of the wildly popular Dera Sacha Sauda is anything but ordinary. It allegedly involved sexual exploitation, forced castrations, private militias, illegal trade in arms and opium, and land grab on an untold scale—until the self-styled godman was convicted for one of his many crimes in August 2017. The book opens with an anonymous letter which led to the first-ever journalistic investigation, in 2007—Tehelka's Operation Jhootha Sauda—into the reported criminal

activities at the Dera. In the years that followed, the author continued to document the lonely battles for justice against the influential godman who had the might of the Dera's machinery and manpower behind him. This book is as much about the grit and determination of ordinary citizens fighting power systems as it is about the difficulty of investigating crimes committed by the rich and powerful in India today.

This book critically examines Sustainable Development Goals and cities in developing countries with special reference to climate change, inclusion, diversity, and citizen rights in India. It discusses global issues of sustainability and climate change in the context of rapid urbanisation and focuses on the role of equitable and just processes of urban development aimed at protecting social diversity, redeeming natural environments and, pursuing economic growth geared towards improving

the quality of life. The volume looks at the nature of opportunities and future challenges presented to cities and codifies ways to transcend these. It explores key themes such as mitigation of risks from heat island effects, devastating floods, and extreme weather events like droughts; improvement of air quality; compact development; reduction in urban sprawl and protection of agriculturally productive lands for long-term food security; growth of small and medium towns; protection of rural landscapes; access to basic services like water sanitation, primary education, and housing; protection of forest and green spaces for the conservation of biodiversity; renewable energy sources; enhancement of mobility through efficient public transit systems like metro systems or suburban rail; effective and equitable governance for the vulnerable; balanced regional development; inclusive human development; securing the right to the city; and climate risk and resilience. Based on new research and data presented by global experts on climate change

and sustainability, this book advances multiple discourses of sustainable urbanisation by connecting social challenges such as democracy, equity, diversity, and inclusion to create an enabling environment for a better future for cities in the developing world. Lucid and topical, this book will be useful to scholars and researchers of urban studies, urban planning, development studies, sociology, public policy and administration, political sociology, city studies, geography, architecture, and economics and also to professionals and NGOs. *Islam, Nationalism and the West* BPB Publications

A growing interest in political Islam, also called Islamism, has assumed significant ideological and intellectual dimensions especially in recent years. Rather than viewing it as Islam versus the rest, or tradition against modernity, this volume, without overlooking the tensions, also acknowledges the mutualities. It centres on issues such as the Rushdie affair, conflictive pluralism in South Asia and its linkages with the crucial regional themes like the Kashmir dispute,

Iranian revolution, civil war in Afghanistan and Western public diplomacy. Stories of Complex Human Relationships Penguin

The nautanki performances of northern India entertain their audiences with often ribald and profane stories. Rooted in the peasant society of pre-modern India, this theater vibrates with lively dancing, pulsating drumbeats, and full-throated singing. In *Grounds for Play*, Kathryn Hansen draws on field research to describe the different elements of nautanki performance: music, dance, poetry, popular story lines, and written texts. She traces the social history of the form and explores the play of meanings within nautanki narratives, focusing on the ways important social issues such as political authority, community identity, and gender differences are represented in these narratives. Unlike other styles of Indian theater, the nautanki does not draw on the pan-Indian religious epics such as the Ramayana or the Mahabharata for its subjects. Indeed, their storylines tend to center on the vicissitudes of stranded heroines in the

throes of melodramatic romance. Whereas nautanki performers were once much in demand, live performances now are rare and nautanki increasingly reaches its audiences through electronic media—records, cassettes, films, television. In spite of this change, the theater form still functions as an effective conduit in the cultural flow that connects urban centers and the hinterland in an ongoing process of exchange.
