April 3, 2019 A Theory Of Holistic Comfort Abstract. Although the construct of comfort has been analysed, diagrammed in a two-dimensional content map, and operationalized as a holistic outcome, it has not been conceptualized within the context of a broader theory for the discipline of nursing. The theoretical work presented here utilizes an intra-actional perspective to develop a theory of comfort as a positive outcome of nursing case. A theory of holistic comfort for nursing Abstract Although the construct of comfort has been analysed, diagrammed in a two-dimensional content map, and operationalized as a holistic outcome, it has not been conceptualized within the... Comfort Theory by Katharine Kolcaba - Current Nursing

In Kolcaba's theory, comfort was viewed as a positive outcome which encompassed physical, psychospiritual, social and environmental dimensions.²⁴ Comfort was defined as "an immediate state of being strengthened..." (p.47). Three types of comfort were identified, such as relief, ease and transcendence.

(PDF) A theory of holistic comfort

Major Assumption: Holistic comfort is defined as the immediate experience of

being strengthened through having the needs for relief, ease,... Comfort Theory with its inherent emphasis on physical, psychospiritual, sociocultural, and environmental aspects of... Comfort is a desirable, positive, ... *Comfort Theory And Practice: A Vision for Holistic Health ...* The Theory of Comfort was developed when Katharine Kolcaba conducted a concept

analysis of comfort that examined literature from several disciplines, including nursing, medicine, psychology, psychiatry, ergonomics, and English. After the three forms of comfort and four contexts of holistic human experience were introduced, a taxonomic structure was created to guide for the assessment, measurement, and evaluation of patient comfort.

Abstract. Although the construct of comfort has been analysed, diagrammed in a two-dimensional content map, and operationalized as a holistic outcome, it has not been conceptualized within the context of a broader theory for the discipline of nursing. The theoretical work presented here utilizes an intra-actional perspective to develop a theory of comfort as a positive outcome of nursing case.
