After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application examples illustrate the methodologies addressed.

This text examines the enormous pressure placed on University students in Japan, Korea and Taiwan which have led to the rapid expansion of the "cramming" industry and to a growing number of students looking to religion and spirituality for guidance. The book examines the issue of the rise in youth suicides, and the dramatic rise in levels of cheating; both raising fundamental questions about the education system in the late 1990s.
