Fully updated to reflect the latest cutting-edge discoveries, the Eleventh Edition of Mike Seeds' and Dana Backman's best-selling HORIZONS: EXPLORING THE UNIVERSE engages students by focusing on two central questions: How Do We Know?, which emphasizes the role of evidence in the scientific process, providing insights into how science works, and What Are We?, which highlights our place as

planet dwellers in an evolving universe, guiding students to ask questions about where we came from and how we formed -- a perspective that the study of astronomy is uniquely positioned to emphasize. And, because every course is as unique as its instructor-and its students-HORIZONS is supported by a range of teaching and learning solutions that allow you to craft the best course for your approach and course needs. Our innovative instructor resources include WebAssign online homework management and exclusive audience response technology. #### Introduction to Teaching Pearson Higher Ed

School success in the 21st century requires proficiency with expository discourse -- the use and understanding of informative language in spoken and written modalities. This occurs, for example, when high school students read their textbooks and listen to their teachers' lectures, and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations. Although many students are proficient with the expository genre, others struggle to meet these expectations. This book is designed to provide information on the use and understanding of expository discourse in school-age children, adolescents, and young adults. Recently, researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders. Although many books have addressed the development of conversational and narrative discourse, by comparison, books devoted to the topic of expository discourse are sparse. This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders. It will be of interest to a range of professionals, including speech-language pathologists, teachers, linguists, and psychologists who are concerned with language development and disorders.
