"First Impressions is a must read! I laughed and cried and more importantly reflected on my own impressions." -E-book Reader. Gare Allen, author of the best-selling The 7 Novellas Series and The Dead: A True Paranormal Story changes genres and gives us First Impressions: True Tales from the Road. First Impressions is a moving and entertaining account of the interesting people that the author encounters while driving for a ride sharing company. False assumptions based on his first impressions dissolve quickly as he gains insight into the passenger's personal stories. Often humorous and always moving, we learn what gives some of us direction and drives our ambitions. Moreover, we discover that everyone has a story.

Charlie Lovett first delighted readers with his New York Times bestselling debut, *The Bookman's Tale*. Now, Lovett weaves another brilliantly imagined mystery, this time featuring one of English literature's most popular and beloved authors, Jane Austen. Book lover and Austen enthusiast Sophie Collingwood has recently taken a job at an antiquarian bookshop in London when two different customers request a copy of the same obscure book: the second edition of *Little Book of Allegories* by Richard Mansfield. Their queries draw Sophie into a mystery that will cast doubt on the true authorship of *Pride and Prejudice*—and ultimately threaten Sophie's life. In a dual narrative that alternates between Sophie's quest to uncover the truth—while choosing between two suitors—and a young Jane Austen's touching friendship with the ageing cleric Richard Mansfield, Lovett weaves a romantic, suspenseful and utterly compelling novel about love in all its forms and the joys of a life lived in books.

Theory and Applications Penguin
Multidimensional scaling (MDS) is a technique for the analysis of similarity or dissimilarity data on a set of objects. Such data may be intercorrelations of test items, ratings of similarity on political candidates, or trade indices for a set of countries. MDS attempts to model such data as distances among points in a geometric space. The main reason for doing this is that one wants a graphical display of the structure of the data, one that is much easier to understand than an array of numbers and, moreover, one that displays the essential information in the data, smoothing out noise. There are numerous varieties of MDS. Some facets for distinguishing among them are the particular type of geometry into which one wants to map the data, the mapping function, the algorithms used to find an optimal data representation, the treatment of statistical error in the

models, or the possibility to represent not just one but several similarity matrices at the same time. Other facets relate to the different purposes for which MDS has been used, to various ways of looking at or "interpreting" an MDS representation, or to differences in the data required for the particular models. In this book, we give a fairly comprehensive presentation of MDS. For the reader with applied interests only, the first six chapters of Part I should be sufficient. They explain the basic notions of ordinary MDS, with an emphasis on how MDS can be helpful in answering substantive questions.

#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster

father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today

DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

Dear Emmie Blue Entangled: Lovestruck A mysterious portrait ignites an antiquarian bookseller's search through time and the works of Shakespeare for his lost love. Charlie Lovett's new book, *The Lost Book of the Grail*, is now available. Guaranteed to capture the hearts of everyone who truly loves books, *The Bookman's Tale* is a former bookseller's sparkling novel and a delightful exploration of one of literature's most tantalizing mysteries with echoes of *Shadow of the Wind* and A.S. Byatt's *Possession*. Nine months after the death of his beloved wife Amanda left him shattered, Peter Byerly, a young antiquarian bookseller, relocates from North Carolina to the English countryside, hoping to outrun his grief and rediscover the joy he once took in collecting and restoring rare books. But upon opening an eighteenth-century study of Shakespeare forgeries, he discovers a Victorian watercolor of a woman who bears an uncanny resemblance to Amanda. Peter becomes obsessed with learning the picture's origins and braves a host of dangers to follow a trail of clues back across the centuries—all the way to Shakespeare's time and a priceless literary artifact that

could prove, once and for all, the truth about the Bard's real identity.

Jerusalem Poker Simon and Schuster A sophisticated and conversation-starting novel of modern love, sexual violence, and toxic inheritance from a brilliant new literary voice When Kate Quaille meets Max Rippon in the first week of university, so begins a life-changing friendship. Over the next four years, the two become inseparable. For him, she breaks her solitude; for her, he leaves his busy circles behind. But knowing Max means knowing his family: the wealthy Rippons, all generosity, social ease, and quiet repression. Theirs is a very different world from Kate's own upbringing, and yet she finds herself quickly drawn into their gilded lives, and the secrets that lie beneath. Until one evening, at the Rippons home, just after graduation, her life is shattered apart in a bedroom while a party goes on downstairs. *What Red Was* is an incisive and mesmerizing novel about power, privilege, and consent—one that fearlessly explores the effects of trauma on the mind and body of a young woman, the tyrannies of memory, the sacrifices involved in staying silent, and the courage in speaking out. And when Kate does, it raises this urgent question: Whose story is it now? Praise for *What Red Was* “[A] masterful, incisive debut... reminiscent of Donna Tartt or Edward St. Aubyn.” USA Today “Dazzling. . . This is a book that succeeds in prying open our cultural moment and laying it bare for scrutiny.”—Alexandra Kleeman, author of *You Too Can Have a Body Like Mine* “One of the best books I've ever read about female rage and transgression . . . at once incredibly timely and one for the ages.”—Lisa Gabriele, author of *The Winters* “So assured, so confident in its voice, so skilful in its plotting and

characterisation that it seems like the work of a seasoned author . . . an exciting new voice.”—The Guardian (UK) “Powerful... handles its explosive plot with an admirable delicacy”—Publishers Weekly “Thoughtful and observant...Price is a novelist worth watching.” —Kirkus “A confident and provocative study of wealth, sexual violence, and complicated friendships . . . [What Red Was] is a strong debut by an incredibly young author, an assured and challenging novel that suggests an incipient talent worthy of notice.”—The Irish Times

Andrew Wyeth Knopf Books for Young Readers

Pride and Prejudice goes Hollywood in this winning romantic comedy inspired by Jane Austen’s classic. In her teen fiction debut, the author of *Knitting Under the Influence* goes back to high school for a tale of sisters, misinformation, and star-crossed love. Will Elise’s love life be an epic win or an epic fail? At Coral Tree Prep in Los Angeles, who your parents are can make or break you. Case in point: As the son of Hollywood royalty, Derek Edwards is pretty much prince of the school—not that he deigns to acknowledge many of his loyal subjects. As the daughter of the new principal, Elise Benton isn’t exactly on everyone’s must-sit-next-to-at-lunch list. When Elise’s beautiful sister catches the eye of the prince’s best friend, Elise gets to spend a lot of time with Derek, making her the envy of every girl on campus. Except she refuses to fall for any of his rare smiles and instead warms up to his enemy, the surprisingly charming social outcast Webster Grant. But in this hilarious tale of fitting in and flirting, not all snubs are undeserved, not all celebrity brats are bratty, and pride and prejudice can get in the way of true

love for only so long.

This volume brings together leading investigators to explore the science of first impressions: how they are formed, their underlying processes, and effects on emotions, cognitions, and behavior. Integrating cutting-edge theories, methods, and findings from diverse research traditions, the book accessibly conveys the "big picture" of this dynamic area of study. Showcasing the best current work on a fundamental aspect of person perception and social cognition, this book will be read with interest by researchers and students in social and personality psychology, as well as scholars in applied domains. It will fill a unique niche as a text in graduate-level courses.

Claude Monet "O'Reilly Media, Inc."

The scientific story of first impressions—and why the snap character judgments we make from faces are irresistible but usually incorrect We make up our minds about others after seeing their faces for a fraction of a second—and these snap judgments predict all kinds of important decisions. For example, politicians who simply look more competent are more likely to win elections. Yet the character judgments we make from faces are as inaccurate as they are irresistible; in most situations, we would guess more accurately if we ignored faces. So why do we put so much stock in these widely shared impressions? What is their purpose if they are completely unreliable? In this book, Alexander Todorov, one of the world's leading researchers on the subject, answers these questions as he tells the story of the modern science of first impressions. Drawing on psychology, cognitive science, neuroscience, computer

science, and other fields, this accessible and richly illustrated book describes cutting-edge research and puts it in the context of the history of efforts to read personality from faces. Todorov describes how we have evolved the ability to read basic social signals and momentary emotional states from faces, using a network of brain regions dedicated to the processing of faces. Yet contrary to the nineteenth-century pseudoscience of physiognomy and even some of today's psychologists, faces don't provide us a map to the personalities of others. Rather, the impressions we draw from faces reveal a map of our own biases and stereotypes. A fascinating scientific account of first impressions, *Face Value* explains why we pay so much attention to faces, why they lead us astray, and what our judgments actually tell us.
