In this scholarly and timely presentation of the history of economic thought, you'll see how new ideas, evidence, problems and values can be used to reconsider basic disputes and major contributions of the past. THE EVOLUTION OF ECONOMIC THOUGHT, 8e covers the history of economics, the philosophies that drive the economic way of thinking, the ideas of the great economic thinkers and their logical connections to the world. You'll see how Robert Solow's pioneering model can be used to discuss recent renewed emphasis on growth theory and technological change and will explore antitrust perspectives and game theory. In this spirit, the ATMSS International Workshop "Advances in Laboratory Testing & Modelling of Soils and Shales" (Villars-sur-Ollon, Switzerland; 18-20 January 2017) has been organized to promote the exchange of ideas, experience and state of the art among major experts active in the field of experimental testing and modelling of soils and shales. The Workshop has been organized under the auspices of the Technical Committees TC-101 "Laboratory Testing", TC-106 "Unsaturated Soils" and TC-308 "Energy Geotechnics" of the International Society of Soil Mechanics and Geotechnical Engineering. This volume contains the

invited keynote and feature lectures, as well as the papers that have been presented at the Workshop. The topics of the lectures and papers cover a wide range of theoretical and experimental research, including unsaturated behaviour of soils and shales, multiphysical testing of geomaterials, hydro-mechanical behaviour of shales and stiff clays, the geomechanical behaviour of the Opalinus Clay shale, advanced laboratory testing for site characterization and in-situ applications, and soil - structure interactions.

Mythology in the Mesoamerican Tradition
 Editorial Universidad de Costa Rica
 In May 1983 a group of Latin American politicians and theologians met in the Dominican Republic to develop a deeper understanding of the political responsibility of Christians. This collection of their

papers expresses a rich cross-fertilization of ideas.

Leading researchers and practitioners explore the frontiers of education from an integral perspective.

Malevolent Tales Cengage Learning

"The Rabbit on the Face of the Moon is a collection of articles on mythology in the Mesoamerican tradition by Alfredo Lopez Austin, one of the foremost scholars of ancient Mesoamerican thought. Their span is diverse: myths and names, eclipses, stars, left and right, Mexica origins, Aztec incantations, animals, and the incorporation of Christian elements into the living mythologies of Mexico. The title essay relates the Mesoamerican myth explaining why there is a rabbit on the moon's face to a Buddhist image and suggests the importance of the profound mythical concepts presented by each image." "The eighteen pieces in this volume are unified by their basis in Mesoamerican tradition and provide a fascinating look into a system of millennia-old legends and beliefs."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. New Directions for Higher Learning

Eerdmans Publishing Company

Scientists act within a social context and from a philosophical perspective that is inherently political. Whether they realize it or not, scientists always choose sides. The *Dialectical Biologist* explores this political nature of scientific inquiry, advancing its argument within the framework of Marxist dialectic. These essays stress the concepts of continual change and codetermination between organism and environment, part and whole, structure and process, science and politics. Throughout, this book

questions our accepted definitions and biases, showing the self-reflective nature of scientific activity within society.

Cuentos Ticos LSU Press

Miguez reflects on Latin American Protestantism, considering the liberal, evangelical, and pentecostal facets, and then explores theologically the tasks of unity and mission still before Latin American Protestant churches.

Conflicts often arise between regulations, making it difficult for school management teams and teachers to resolve situations with appropriate dignity and respect for all concerned. This book discusses provocative actual case studies to help teachers to reflect on their own ethics, guiding them to make more reasonable decisions in their schools, and thereby gradually transforming schools into more cohesive and caring communities. A model of consequences, consistency and caring, each aspect based on traditional ethical theories provides a scientific base - a rational and a responsive base for ethical decision-making. This work covers such everyday problems as censorship, inclusivity, school uniform, punishment,

personal gain and confidentiality, and argues that care and respect for others, equity, rational autonomy and concern for long-term benefits are more important for a school community than short-term power and control.

A Guide to Management and Strategy in the New International Economy

Editorial Universidad de Costa Rica

This book takes the reader beyond net effects and main and interaction effects thinking and methods. Complexity theory includes the tenet that recipes are more important than ingredients—any one antecedent (X) condition is insufficient for a consistent outcome (Y) (e.g., success or failure) even though the presence of certain antecedents may be necessary. A second tenet: modeling contrarian cases is useful because a high or low score for any given antecedent condition (X) associates with a high Y, low Y, and is irrelevant for high/low Y in some recipes in the same data set. Third tenet: equifinality happens—several recipes indicate high/low outcomes.

Operating in Emerging Markets Springer

This definitive resource in perinatology and neonatology is now completely revised and updated to incorporate the latest advances in the field. Maintains a clinical focus and provides guidelines for precise diagnosis and effective treatment. Also includes hundreds of case histories to illustrate management. This edition contains new neuromuscular, cardiovascular, genetic, and pulmonary information plus ethics of neonatology. Reorganized and supplemented, the perinatal section includes maternal-fetal medicine and fetal neonatal surgery. Features over 700 illustrations! Spanish version also available, ISBN: 84-8174-433-6

The Bible Cure for Depression and Anxiety

Ética Profesional

This book studies the changing social relations in a region of Costa Rica that does not conform to the country's image as an "agrarian democracy" and investigates why latifundios (large unproductive or under-utilized estates) still dominate much of Latin America. *Adolescence, Child Rights, and Urban Poverty in Costa Rica* Pearson Education Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. *Operating in Emerging Markets* draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging

markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, *Operating in Emerging Markets*, authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. Mack Robinson College of Business, Georgia State University Brief, Up-to-date and Illustrated Routledge On 24 April 1942, Czechoslovak journalist and active CPC member Julius Fucik was detained in Pankrác Prison in Prague, where he was subsequently interrogated and tortured, before being sent to Germany to stand trial for high treason. It was during this time that Fucik's *Notes from the Gallows* (Czech: *Reportáž psaná na oprátce*, literally *Reports Written Under the Noose*) arose—written on pieces of cigarette paper and smuggled out by two sympathetic prison warders named Kolinsky and Hora. The notes were treated as great literary works after his death in 1943 and translated into many languages worldwide, resulting in this book, which was first published in English in 1948. It describes events in the prison since Fucik's arrest and is filled with hope for a better, Communist future.
