Human Behavior and the Social Environment Oxford University Press
 In this best-selling text BY social workers and FOR social workers, Charles Zastrow and Karen K. Kirst-Ashman, nationally prominent social work educators and authors, guide students in assessing and evaluating how individuals function within families, groups, organizations and communities during the key stages of the

human life span. Zastrow, a member of the CSWE Commission on Accreditation, and Kirst-Ashman, a CSWE Board member, incorporate the most recent CSWE curriculum recommendations throughout. Using an effective, chronological life-span approach, the authors present separate chapters on biological, psychological, and social impacts at the different life-span stages. Chapter One introduces a practical Systems Impact Model that students can apply throughout the book to help them understand individual behavior in macro, mezzo, and micro settings. Consistent with the curriculum policy statements of the CSWE, content on social work values and ethics, diversity, social and economic justice and populations-at-risk is also included. Zastrow and Kirst-Ashman make theories relevant to myriad practice settings by providing case examples, illustrations, photos, and exercises in every chapter. With thorough coverage of theories at all levels (micro, mezzo, macro) the book is comprehensive and balanced and provides students with a sound base on which to build assessment skills.

Human Behavior in the Social Environment Mezzo and Macro Contexts

Human Behavior and the Social Environment: A Macro, National, and International Perspective is a textbook for one of the primary courses in the social work curriculum titled Human Behavior in the Social Environment. The course is offered usually over two semesters, with one focusing on micro issues (how the individual develops in relation to their social environment on an individual, family, and group level). The second section of the course typically focuses on macro issues pertaining to how an individual is shaped by their social environment by macro issues including social institutions, community, and the government. This book is intended for the second sequence of the course. It takes a unique approach by incorporating international issues of globalization, which has been an emerging issue in social work. Although it takes this unique perspective, it still covers the basics of macro social work on a national level. Other important areas that are not well represented in competing texts includes coverage of rural issues, the impact of hurricane Katrina on social and community resources, human rights and social justice, the increasing impact of increasing rates of incarceration, and a special section focusing on crisis theory. This book has a number of key selling points. They include: A broad national and international perspective A timely approach that examines issues such as rural communities, the impact of disaster on communities, and increasing incarceration rates Provides special emphasis on human needs and social justice End of chapter discussion questions A student glossary Chapter opening photos An appendix that includes three additional higher level macro theories which would make the book applicable to Master's level program This book will also contain a number of features that are essential for any book to be adopted in a HBSE course. They include: End of chapter discussion questions Instructor's manual featuring powerpoint slides and a test bank Student study site for recommended reading, chapter summaries, and flash cards

Human Behavior in the Social Environment Allyn & Bacon

In recent years the social sciences and the humanities have drawn closer to each other in thought and method. This rapprochement has led to new perceptions of human behavior by sociologists, as well as new methodological orientations. Sociologist Joseph R. Gusfield draws upon drama and fiction to show how human action is shaped by the formal dimensions of performance. Gusfield first defines the concept of behavior as artistic performance. He then analyzes routine and classic social research reports as literary performances in qualitative and quantitative terms. Next he moves to social movements and public actions, demonstrating how objects and events are products of the interpretation and reflection of individuals. He draws upon literary and artistic conventions to deal with issues of representation and meaning. In the first and last chapters, Gusfield provides a conceptual summary examining the relation between sociology as science and art, arguing that sociological methods are neither science nor art, but partake of both. Following the philosopher Paul Ricoeur, Gusfield shows how human behavior can be read as a text, always telling the participant or observer "something about something." Performing Action will be of interest to sociologists, psychologists, and students of aesthetics and critical theory.
