An in-depth introduction to the Deva Kingdom and our

relationship with Deva • Explores how we partner with Deva in our everyday lives to evolve both our kingdom and theirs • Explains the hierarchy of the Deva kingdom, from elementals and nature spirits to higher angelic Deva and every level in between • Offers suggestions on how to communicate with the Deva of trees and plants as well as the angelic kingdom • Shares the author's personal experiences with Deva around the world. Nature spirits, faeries, gnomes, and their higher angelic counterparts who overlight landscapes, mountains, rivers, and plants have held a fascination for people worldwide for countless generations. The Deva kingdom is essentially the world's form builders, the symphony at the heart of Creation, yet Deva is so much more than the joyful beings that animate what we call Nature. We each have a very personal and direct relationship with Deva via our physical, astral, emotional, and mental elementals, but this connection has been forgotten or, at the very least, overlooked. When we partner with Deva in our everyday lives, we can help evolve both our kingdom and aspects of theirs. Exploring the realm of Deva and our relationship with them, Jacquelyn E. Lane introduces us to the hierarchy of the Deva kingdom, from elementals and nature spirits to higher Deva and the levels in between. She examines the metaphysics that underlie their existence and how the energy of Deva is intrinsic to all that we experience. Deva is a Sanskrit word meaning "Being of Light," an appropriate name as Deva sing light out of the primordial darkness to create forms for Being. Sharing her personal experiences with Deva in many lands over four decades, the author investigates our relationship with Deva, in particular via the elementals of our human constitution, and how we can communicate with the Deva of trees and plants as well as the angelic kingdom. Through scientific discoveries and cultural traditions, we discover the impact we have on Deva and how we use and even "create" new forms of Deva via our inventions and collective activity. Jacquelyn also looks at the orchestrating function of higher Deva and the wider implications of our understanding of Deva, including the role of Deva in Pan consciousness--our increasing realization of the intricate matrix of life within and between all the kingdoms on Earth. Offering not only an in-depth introduction to the world of Deva but also a glimpse of their wisdom, humor, and joy, this book reveals how

we can begin to hear their complex song, find our own song, and work with the appropriate subtle layers of the Deva kingdom to grow and evolve.

The Nature Spirits' Guide to Their World Floris Books

This volume contains mystical writings of Max Heindel on the little understood subject of Nature Spirits and Nature Forces. It is a correlation from his many books, lovingly collected in one volume by one of Max Heindel's students. Max Heindel is known as the most advanced of Western Mystics and has in his numerous books given to the world a mine of information about Nature Spirits, the little people with whom he had such interesting experiences. The writer has listened to many stories (which unfortunately have not been put in writing) of his experiences with these Spirits, of how they live and their appearance. He had many times remarked that he would sometime write an entire book on the Nature Spirits, but his very arduous work of pioneering interfered with this much needed work.

Is the world around us alive or is it dead? If the widely held belief were true--that matter is the basis of all we know as reality--then life would make no sense. The world would essentially be dead--an absurd notion! What we know as life would be an unexplainable phenomenon, an astounding but accidental miracle. Does this sound familiar? In the undeniable presence of life, this belief can never truly make sense. It demands faith. Thus materialism is superstition. If we dare to entertain the notion--albeit akin to a modern heresy--that life (being), not matter, is the foundation of what we know as reality, then both matter and life make perfect sense. Karsten Massei--who is exceptionally sensitive to the invisible beings of life that surround us always and everywhere--offers a gentle but powerful call, from those beings themselves, to discard superstition and begin to awake to

the reality of life. As beings of the living Earth, we have certain responsibilities, too long neglected. The Earth is not an abstraction--a dead "rock" hurtling through space--but a living being. The elemental beings, who are intimately, intrinsically connected to the living Earth and to the living human race, suffer from our indifference, egoism, and ignorance of life, but they have much to teach us and patiently await our attention. "Know your environment!" It can begin with this book.

This book continues the series of interviews with the nature spirits that began with *Nature Spirits and What They Say* (Floris Books). In the first half, the spirits take a look back at the effect the publication of this book had on their worlds. Other topics spoken about are the First Iraq War, the Black Magician from Mexico, and

the Elemental Body Spirit. In addition to familiar characters such as Miller, the High One, and the Watery One, we also meet Crown, the Tree Shepherd and Conradin, the Dwarf. The second half of the book consists of answers from the nature spirits to questions that German readers were invited to submit. The topics covered range from establishing contact with nature spirits to healing, electrosmog, art, water quality, and much more.

The four classical elements of earth, water, air and fire are present in Genesis and continue to be significant throughout Christianity. Different streams of thought, such as the School of Chartres, and Celtic Christianity, have emphasised them in different ways. In this unique book, Bastiaan Baan, an experienced spiritual thinker, brings these elements together with ideas from Rudolf Steiner's anthroposophy. He considers, in particular, how elemental beings -- nature spirits -- relate to the four elements, and explores the role of elemental beings in our world. This is a fascinating and original work on the connections between Christianity and the natural world.
