Losers Capstone

As long as people have played games, there has been a temptation to win (or intentionally lose) by cheating. Infamous cases throughout the history of sport abound, from the "thrown" 1919 World Series to the recent doping confessions of track star Marion Jones. In this entertaining and informative book, sports historian Fran Zimniuch

recalls the notorious scandals that have tainted our most popular sports, concluding that such incidents are often a reflection of the times. Benefiting from personal interviews with many figures either involved in or on the periphery of recent scandals, including BALCO's Victor Conte, *Crooked* presents a pageant of infamy as rich as the history of modern sports itself.

A bracing corrective to the myths that have shaped economic, military, and diplomatic policy, dispelling our oil-soaked fantasies of dependence. There is a conventional wisdom about oil—that the U.S. military presence in the Persian Gulf is what guarantees access to this strategic resource; that the "special" relationship with Saudi Arabia is necessary to stabilize an

otherwise volatile market; and that these assumptions in turn provide Washington enormous leverage over Europe and Asia. Except, the conventional wisdom is wrong. Robert Vitalis debunks the myths to reveal "oilcraft," a line of magical thinking closer to witchcraft than statecraft. Oil is a commodity like any other: bought, sold, and subject to market forces. Thus, the first goal of this book is to expose the suspect fears of oil scarcity and conflict. The second goal is to

investigate the significant geopolitical impact of these false beliefs. In particular, Vitalis shows how we can reconsider the question of the U.S.-Saudi special relationship, which confuses and traps many into unnecessarily accepting what they imagine is a devil's bargain. The House of Saud does many things for U.S. investors, firms, and government agencies, but guaranteeing the flow of oil, making it cheap, or stabilizing the price isn't

one of them. Freeing ourselves from the spell of oilcraft won't be easy—but the benefits make it essential.

Does the character of our leaders matter? You may think this question was answered long ago. Countless business authors and analysts have

assured us that great leadership demands great character. Time and again, we've seen that truth play out, as once-thriving organizations falter and fail under the guidance of leaders behaving badly. Why, then, do so many executives remain skeptical about the true value of leadership character? A winning strategy and a sound business model are what really matter, they argue; character is just the icing on the cake. What's been missing from this debate

is hard evidence: data that shows not only that leadership character matters for organizational success, but how it matters; and concrete evidence that it leads to better business results. Now, in this groundbreaking book, respected leadership researcher, adviser, and author Fred Kiel offers that evidence—solid data that demonstrates the connection between character, leadership excellence, and organizational results. After seven years of

rigorous research based on a landmark study of more than 100 CEOs and over 8,000 of their employees' observations, Kiel's findings show that leaders of strong character achieved up to five times the ROA for their organizations as did leaders of weak character. Return on Character goes on to reveal: • How leadership character is formed, how it creates value, and how that value spreads throughout the organization • How low-character leaders undermine the success of

even the best business plans • How leaders at any level can develop the habits of strong character and "unlearn" the habits of poor character The book also provides a character-building methodology—step-by-step advice and techniques for assessing your own character habits and improving your performance and that of your organization. Return on Character provides the blueprint for building your own leadership character and creating a character-driven organization that

achieves superior business results.

From where I sit today I am forced to look at life from a place I never expected or wanted to be; totally paralyzed from the shoulders down, sitting in

a chair that I drive by blowing and sucking in a straw, typing this book one letter at a time with a mouth stick. I never wanted to be here. I never wanted to be in a wheelchair and I never wanted to be a writer. Nevertheless, here I sit typing, because of one seemingly small decision to dive off a boat dock on July 15, 1991, at the age of 19. Shortly after my accident, I would have to make another choice that also altered the course of my life. Do I accept my unwanted circumstances?

Acceptance was not a quick, easy process. God used many truths, people and experiences to teach me some big life lessons. The way He used little people was nothing short of miraculous. From a 5th grader named Miranda I learned to look beyond my limitations for things I could do instead of focusing on all the things I could not do. Through a 2nd grader named Alicia I saw that giving what I have to give is more important than what I have to give. Sierra's out of control ride on my

wheelchair ended up being the incident God used to teach me the key to trusting Him. While my 3 year old brother's response to a bird pooping on my shoulder, challenged me to not only accept my paralysis, but really learn to live with it. Kevin Olson was born on August 28, 1971. He was raised on a farm just Southwest of Chanute, KS. He was an All-State basketball player who graduated from Chanute High School in the top 10% of his class in 1989. On July 15, 1991, he

became paralyzed from the shoulders down as a result of a diving accident. Since 1993 he has devoted his life to kids by tutoring at elementary schools, teaching at the Cherry Street Youth Center in Chanute, traveling around speaking at schools and churches, and serving as a Youth Minister for two churches in Fredonia, KS. After his accident Kevin also obtained his Associates degree and a computer programming certification. Currently he works from home creating
