 Manners for Today
 In a sweeping overview of four centuries of Mongolian history that draws on previously untapped sources, Johan Elverskog opens up totally new perspectives on some of the most urgent questions historians have recently raised about the role of Buddhism in the constitution of the Qing empire. Theoretically informed and strongly comparative in approach, Elverskog's work tells a fascinating and important story that will interest all scholars working at the intersection of religion and politics. —Mark Elliott, Harvard University
 "Johan Elverskog has rewritten the political and intellectual history of Mongolia from the bottom up, telling a convincing story that clarifies for the first time the revolutions which Mongolian concepts of community, rule, and religion underwent from 1500 to 1900. His account of Qing rule in Mongolia doesn't just tell us what images the Qing emperors wished to project, but also what images the Mongols accepted themselves, and how these changed over the centuries. In the scope of time it covers, the originality of the views advanced, and the accuracy of the scholarship upon which it is based, *Our Great Qing* seems destined to mark a watershed in Mongolian studies. It will be essential reading for specialists in Mongolian studies and will make an important contribution and riposte to the 'new Qing history' now changing the face of late imperial Chinese history.

Specialists in Tibetan Buddhism and Buddhism's interaction with the political realm will also find in this work challenging and thought-provoking." —Christopher Atwood, Indiana University
 Although it is generally believed that the Manchus controlled the Mongols through their patronage of Tibetan Buddhism, scant attention has been paid to the Mongol view of the Qing imperial project. In contrast to other accounts of Manchu rule, *Our Great Qing* focuses not only on what images the metropole wished to project into Mongolia, but also on what images the Mongols acknowledged themselves. Rather than accepting the Manchu's use of Buddhism, Johan Elverskog begins by questioning the static, unhistorical, and hegemonic view of political life implicit in the Buddhist explanation. By stressing instead the fluidity of identity and Buddhist practice as processes continually developing in relation to state formations, this work explores how Qing policies were understood by Mongols and how they came to see themselves as Qing subjects. In his investigation of Mongol society on the eve of the Manchu conquest, Elverskog reveals the distinctive political theory of decentralization that fostered the civil war among the Mongols. He explains how it was that the Manchu Great Enterprise was not to win over "Mongolia" but was instead to create a unified Mongol community of which the disparate preexisting communities would merely be component parts. A key element fostering this change was the Qing court's promotion of Gelukpa orthodoxy, which not only transformed Mongol historical narratives and rituals but also displaced the earlier vernacular Mongolian Buddhism. Finally, Elverskog demonstrates how this eighteenth-century conception of a Mongol community, ruled by an aristocracy and nourished by a Buddhist emperor, gave way to a pan-Qing solidarity of all Buddhist peoples against Muslims and Christians and to local identities that united for the first time aristocrats with commoners in a new Mongol Buddhist identity on the eve of the twentieth century.

The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

A Descriptive and Critical Bibliography Smashbooks

The attacks of September 11 2001 spectacularly demonstrated that America's main security challenges did not stem from traditional power rivalries but rather from "grey areas", failed or

badly governed states which are breeding grounds for extremism. Today the emphasis has shifted from focusing on relations between states to acting directly on states themselves, so as to pre-empt the growth of terrorism, arms proliferation, genocide, civil wars etc. After the concept of the "global war on terror", President George W. Bush put forward his "freedom agenda" aiming to promote democracy as a response to the security challenges facing the world, in particular in the Middle East. But overthrowing tyrants and holding elections is not enough to create a stable and well-governed democracy and can even, in some cases, complicate matters, as events between 2003 and 2005 in Iraq, Afghanistan, the Palestinian Authority and Egypt have shown. This is where "transformational diplomacy", the concept inaugurated by Condoleezza Rice in early 2006, comes in. Basically this consists in working with the partners of the United States with a view to "build and sustain democratic, well-governed states that will respond to the needs of their people and conduct themselves responsibly in the international system." To enable this to happen, it is first of all American diplomacy which must transform itself, so as to become less "analytical" and more operational, characterised by direct involvement in foreign societies rather than just being restricted to the realm of foreign policy. This Chaillot Paper explores the scope and limits of this "transformative" action: is the realist paradigm, that of interpower rivalries, really no longer relevant? Can diplomats transform themselves into active promoters of good governance? Are other countries ready to accept them in this role, or will they accuse them of interference? Can transformational diplomacy really change the world?

"The 1,165 entries of Handbooks and Anthologies for Officials in Imperial China by Pierre-Étienne Will and collaborators provide a descriptive list of extant manuscript and printed works—mainly from the Song, Ming, and Qing dynasties—created with the aim to instruct officials and other administrators of imperial China about the technical and ethical aspects of government, and to provide tools and guides to help with the relevant procedures. Both generalist and specialized texts are considered. Among the latter, such disciplines as the administration of justice, famine relief, and the military receive particular attention. Each entry includes the publishing history of the work considered (including modern editions), an analysis of contents, and a biographical sketch of the author."--
