NAB Legal Guide to Broadcast Law and Regulation Teacher Created Resources
 Praised by instructors for its concise, focused approach and user-friendly format, the Illustrated Series engages both computer rookies and hot shots in mastering MICROSOFT OFFICE 2013 applications quickly and efficiently. Skills are accessible and easy-to-follow thanks to the Illustrated Series' hallmark 2-page layout, which allows students to see an entire task in one view. New Learning Outcomes outline the skills covered in each lesson, and larger full-color screens represent exactly what students should see on their own computers. Each unit begins with a brief overview of the principles of the lesson, and introduces a case study for further application. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Highly Effective Emergent Literacy Program John Wiley & Sons

"The wide variety of activities in this book extend across many learning areas, particularly science and society and environment. The book covers predominantly factual information about space, compiled in such a way as to develop simple understandings and motivate early learners to extend their learning beyond its contents." -- P. i.

How to Find Your Ancestors in Archived Newspapers Penguin

In this book you will find the McLaughlin Model of teaching emergent literacy to young children set down in a clear format that makes it easy for you to glean the information you need to establish the program in your classroom. As it spreads through pilot programs in Palm Beach County School District, Florida, this model of teaching is proving to be highly successful for children from many different backgrounds and to produce outstanding results in "Title 1" kindergarten classes. Chapter by chapter, you will discover how to lead your students into reading books and flowing with writing. You will find how to do this by teaching skills through meaningful reading and writing and by training your students in the habits they need to be successful. You will be guided into quickly evaluating your students and dividing them into small groups where they can learn at their own level and pace, moving on and up when they are ready. You will learn how to build your students' self-esteem and self-confidence and how to train them to work cooperatively as part of a positive, risk-free classroom community where everyone is a teacher and learner. You will also learn how to keep the excitement and momentum flowing in your classroom all through the year. As you use this model with your students, you will find that your expectations rise. Your enjoyment of teaching will increase as you get caught up in your students' energy for learning and their excitement at what they achieve. Like the teachers in the McLaughlin Model Pilot Programs, you will most likely be amazed at the results.

Media & You Good Year Books

Super Minds American English is a seven-level course for young learners. This exciting seven-level course enhances your students' thinking skills, improving their memory along with their language skills. Super Minds develops language creatively with activities including role play and project work. Social values are explored with lively stories and cross-curricular thinking is covered through fascinating 'English for school' sections. This Level 5 Teacher's Resource Book contains end-of-unit evaluation tests, worksheets for further vocabulary and grammar practice, along with cross-curricular extension material. The Audio CD includes all the listening material needed to accompany the tests.

Microsoft Office 2013: Illustrated, Third Course Good Year Books

Nothing teaches like the daily paper. These 54 hands-on activities, structured around topics such as money management, food and nutrition, and health and safety, have students use particular sections of local newspapers to locate and apply information. Students look for employment, furnish an apartment, buy food, plan an evening out, and much more. Each worksheet is partnered with a detailed teacher page including specific objectives and step-by-step directions. Using the Newspaper to Teach Basic Living Skills develops the skills and confidence your students will need as they learn to successfully manage their own lives. It's an excellent supplement to any life skills curriculum.

Twenty-Five Easy-to-Teach Lessons in Design and Color Cengage Learning

The activities in this book have two intentions: to teach concepts related to earth and space science and to provide students the opportunity to apply necessary skills needed for mastery of science and technology curriculum objectives. Throughout the experiments, the scientific method is used. In each section you will find teacher notes designed to provide guidance with the learning intention, the success criteria, materials needed, a lesson outline, as well as provide insight on what results to expect when the experiments are conducted. Suggestions for differentiation are also included so that all students can be successful in the learning environment. Topics covered include: Rocks, Minerals and Erosion; Weather and Waste and Our World. 96 Pages

New Directions in Metal Clay Nelson Thornes

Research-based, classroom-tested Teaches children skills for long-term success Fosters social skills, proactivity, perseverance, and more The 6 Success Factors for Children with Learning Disabilities Ready-to-Use Activities to Help Kids with Learning Disabilities Succeed in School and in Life From the acclaimed Frostig Center comes a valuable resource for teachers and parents of children with learning disabilities. Based on a 20-year study, Frostig research has revealed six attributes that lead to long-term success for individuals with LD. This book helps teachers identify and encourage the growth of characteristics that will help students thrive in the classroom, at home, and in social situations. The book offers an array of classroom-tested, engaging activities—complete with reproducible worksheets—that have been proven to foster the "success attributes" in children. The six attributes identified by the Frostig Center are: Self-awareness Proactivity Perseverance Goal setting Use of social support systems Emotional coping strategies Each of the book's activities contains a lesson plan with goals, materials, and procedures, including teaching instructions and reproducible student worksheets. The book is designed to be both flexible and easy-to-use. All

activities can be modified to accommodate a variety of learners. Praise for *The 6 Success Factors for Children with Learning Disabilities* "Provides educators, parents, and other caregivers with pragmatic and measurable strategies to foster maturity and independence...The activities demonstrate that success is not amorphous and unattainable—rather, it can be achieved by adopting an established set of behaviors, attitudes, and characteristics. [This book] will be enormously useful as you prepare your students for their journey to adulthood." —From the foreword by Richard D. Lavoie, bestselling author, *It's So Much Work to be Your Friend* and *The Motivation Breakthrough*

This suite of straightforward, easy to manage suite of resources comprises a Student Book and Teacher Support Pack and CD-ROM for each of years 7, 8 and 9.

Units of Instruction for Gifted Learners R.I.C. Publications

This text integrates CD-ROMs, online databases, telecommunications, and information networks (e.g., CompuServe, America Online, 20th Century Video Encyclopedia) into resource-based instruction-cooperatively planned by the teacher-librarian and the classroom teacher-for students working in cooperative learning groups. Step-by-step procedures for planning and implementing technologies into both library and classroom curriculums help educators use technology to teach research skills. With a hands-on approach, this book complements Barron's *New Technologies for Education*, 3d edition (Libraries Unlimited, 1997) (p. 00), and will serve as a practical planning tool for busy school librarians and media specialists, classroom teachers, computer coordinators, and anyone involved with educational technology. A variety of subjects are covered in the units (e.g., immigration, environment), and projects are flexible enough to allow for the interchange of technologies. Provided for each are an intro
