Alive in Necropolis Springer

NEW YORK TIMES BESTSELLER • The NBA according to The Sports Guy—now updated with fresh takes on LeBron, the Celtics, and more! Foreword by Malcom Gladwell • “The work of a true fan . . . it might just represent the next phase of sports commentary.”—The Atlantic Bill Simmons, the wildly opinionated and thoroughly entertaining basketball addict known to millions as ESPN’s The Sports Guy, has written the definitive book on the past, present, and future of the NBA. From the age-old question of who actually won the rivalry between Bill Russell and Wilt Chamberlain to the one about which team was truly the best of all time, Simmons opens—and then closes, once and for all—every major pro basketball debate. Then he takes it further by completely reevaluating not only how NBA Hall of Fame inductees should be chosen but how the institution must be reshaped from the ground up, the result being the Pyramid: Simmons’s one-of-a-kind five-level shrine to the ninety-six greatest players in the history of pro basketball. And ultimately he takes fans to the heart of it all, as he uses a conversation with one NBA great to uncover that coveted thing: The Secret of Basketball. Comprehensive, authoritative, controversial, hilarious, and impossible to put down (even for Celtic-haters), *The Book of Basketball* offers every hardwood fan a courtside seat beside the game’s finest, funniest, and fiercest chronicler.

Information and Communication Technology for Intelligent Systems Ediciones y Distribuciones Dipon Ltda.

I've begged God for forgiveness, but I won't know till the day I die if He has truly forgiven me ... I've paid my dues to society by serving my long sentence, but perhaps I haven't earned His indulgence ... Oh my God, I've lived so many different lives! I survived Pablo Escobar Gaviria, El Patrón (The Boss), and it was the strength of his indomitable spirit that kept me going all these years; I don't quite know how or why. I still feel his presence every day of my existence. The Medellin cartel's crimes weigh as heavily on my shoulders today as they did yesterday. My youth, wasted in crime, became the sword that now hangs over my graying head. To the world, I'll always be known by my alias, Popeye, the fearsome hitman of the Medellin cartel, Pablo Escobar Gaviria's right-hand man ... How can I make you understand I'm a new man ... that twenty-three years behind bars in that hellhole have transformed the person I once was. Now the freedom I yearned for is vanishing in the murderous hands of my enemies. Perhaps fate has extended my life only to toy with me by preparing my own dying moments. I survived in captivity but I don't know if I'll be able to live in freedom ... A prisoner of my own mind, I'll try to fight to find some peace ... It's very cold ... now it's August 2014. I'm one step from freedom and I'm still breathing ... still here in this dimly lit cell in the maximum security prison in Cómbita, Boyacá.

Brandweek Springer

Max is used to being called Stupid. And he is used to everyone being scared of him. On account of his size and looking like his dad. Kevin is used to being called Dwarf. On account of his size and

being some cripple kid. But greatness comes in all sizes, and together Max and Kevin become Freak The Mighty and walk high above the world. An inspiring, heartbreaking, multi-award winning international bestseller.

The Web Application Hacker's Handbook IBM Redbooks

One Good Reason HarperCollins

The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title *Quantities, Units and Symbols in Physical Chemistry*. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.

Springer Science & Business Media

Ben's dreams are all nightmares . . . And his nightmares are real! Ben has a problem. When he sleeps he dreams, and when he dreams, they're all nightmares! But he can also jump into other people's dreams. So when his friends start falling victim to an evil dream-monster that prevents them from waking, Ben knows he has to help them. Easier said than done when dreams can shift and the monster knows his way around the ever-changing landscape of the mind! With help from a talking rabbit-companion who has a mysterious past, Ben might just be able to defeat the monster and save his friends . . . if he can figure out how to use the power within him against his enemies.

My Glory Was I Had Such Friends Springer

Characteristics of Hawaiian Volcanoes establishes a benchmark for the current understanding of volcanism in Hawaii, and the articles herein build upon the elegant and pioneering work of Dutton, Jagger, Steams, and many other USGS and academic scientists. Each chapter synthesizes the lessons learned about a specific aspect of volcanism in Hawaii, based largely on continuous observation of eruptive activity and on systematic research into volcanic and earthquake processes during HVO's first 100 years. NOTE: NO FURTHER DISCOUNTS FOR ALREADY REDUCED SALE ITEMS.

The Innocent Man Royal Society of Chemistry

The book gathers papers addressing state-of-the-art research in all areas of Information and Communication Technologies and their applications in intelligent computing, cloud storage, data

mining and software analysis. It presents the outcomes of the third International Conference on Information and Communication Technology for Intelligent Systems, which was held on April 6–7, 2018, in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analytics and algorithms, making it a valuable resource for researchers' future studies.

The Book of Basketball Springer

As the fire rages at Royal Auto, Harvey Dent lies trapped inside, unconscious and in danger. Can Bruce Wayne get to Harvey in time, or will the district attorney leave burned-in more ways than one?

Teaching and Learning Methods in Medicine Anchor

Whilst financial rights have appeared as a successful ingredient in North-American power markets, they have their shortcomings both theoretically and in practice. Financial Transmission Rights: Analysis, Experiences and Prospects present a systematic and comprehensive overview of financial transmission rights (FTRS). Following a general introduction to FTRS, including chapters to explain transmission pricing and the general properties of FTRS, experts in the field provide discussions on wide scope of topics. These include: Varying perspectives on FTRS: from electrical engineers to economists, Different mathematical formulations of FTRS Financial Hedging using FTRS, and Alternative solutions to FTRS The detail, expertise and range of content makes Financial Transmission Rights: Analysis, Experiences and Prospect an essential resource for electricity market specialists both at academic and professional levels. "This is THE BOOK we were all expecting to address all key 'Financial Transmission Rights' issues. It is comprehensive and reader friendly. You can pick at will in its menu: more or less theory, a bit of maths or none, empirical review of real cases or numerical simulations of many feasible options. Big names rally there to delight you like: Hogan , Oren, Perez-Arriaga, Smeers, Hobbs and... Rosellón. More than a must read: a light house, a map and a survival kit." Jean - Michel Glachant, Director Florence School, Holder Loyola de Palacio Chair, Chief-editor Economics of Energy & Environmental Policy. "In the last two decades, economists have developed a better understanding of the impact of financial rights on risk management, market power and network expansion in electricity markets, while power systems have experimented with such rights. Striking a good balance between academics and practitioners, always at the frontier of the field, written by the best experts, this volume is essential reading for all those- power systems' managers and users, regulators, students and researchers- who want to understand the new electricity environment and predict its evolution." Jean Tirole, Toulouse School of Economics and Institute for Industrial Economics (IDEI) Further comments inside.

Quantities, Units and Symbols in Physical Chemistry ESPN

In this moving memoir about the power of friendship and the resilience of the human spirit, Amy Silverstein tells the story of the extraordinary group of women who supported her as she waited on the precipice for a life-saving heart transplant. Nearly twenty-six years after receiving her first heart transplant, Amy Silverstein's donor heart plummeted into failure. If she wanted to live, she had to take on the grueling quest for a new heart—immediately. A shot at survival meant uprooting her life and moving across the country to California. When her friends heard of her plans, there was only one reaction: "I'm there." Nine remarkable women—Joy, Jill, Leja, Jody, Lauren, Robin, Valerie, Ann, and Jane—put demanding jobs and pressing family obligations on hold to fly across the country and

be by Amy's side. Creating a calendar spreadsheet, the women—some of them strangers to one another—passed the baton of friendship, one to the next, and headed straight and strong into the battle to help save Amy's life. Empowered by the kind of empathy that can only grow with age, these women, each knowing Amy from different stages of her life, banded together to provide her with something that medicine alone could not. Sleeping on a cot beside her bed, they rubbed her back and feet when the pain was unbearable, adorned her room with death-distracting decorations, and engaged in their "best talks ever." They saw the true measure of their friend's strength, and they each responded in kind. *My Glory Was I Had Such Friends* is a tribute to these women and the intense hours they spent together—hours of heightened emotion and self-awareness, where everything was laid bare. Candid and heartrending, this once-in-a-lifetime story of connection and empathy is a powerful reminder of the ultimate importance of "showing up" for those we love.

Cinefantastique Routledge

Lillian Linden is a liar. On the surface, she looks like a brave survivor of a plane crash. But she's been lying to her family, her friends, and the whole world since rescue helicopters scooped her and her fellow survivor, Dave Hall, off a deserted island in the South Pacific. Missing for almost two years, the castaways are thrust into the spotlight after their rescue, becoming media darlings overnight. But they can't tell the real story—so they lie. The public is fascinated by the castaways' saga, but Lillian and Dave must return to their lives and their spouses. Genevieve Randall—a hard-nosed journalist and host of a news program—isn't buying it. She suspects Lillian's and Dave's explanations about the other crash survivors aren't true. And now, Genevieve's determined to get the real story, no matter how many lives it destroys. In this intriguing tale of survival, secrets, and redemption, two everyday people thrown together by tragedy must finally face the truth...even if it tears them apart.

One Hundred Years of the African Methodist Episcopal Zion Church Penguin

An autobiography by the original "shock jock" shares his observations on politics, current affairs, women, and the entertainment business

Surviving Pablo Escobar Government Printing Office

From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

The Pride of Havana Ballantine Books

This book considers the evolution of medical education over the centuries, presents various theories

and principles of learning (pedagogical and andragogical) and discusses different forms of medical curriculum and the strategies employed to develop them, citing examples from medical schools in developed and developing nations. Instructional methodologies and tools for assessment and evaluation are discussed at length and additional elements of modern medical teaching, such as writing skills, communication skills, evidence-based medicine, medical ethics, skill labs and webinars, are fully considered. In discussing these topics, the authors draw upon the personal experience that they have gained in learning, teaching and disseminating knowledge in many parts of the world over the past four decades. Medical Education in Modern Times will be of interest for medical students, doctors, teachers, nurses, paramedics and health and education planners.

Computer Networking: A Top-Down Approach Featuring the Internet, 3/e Julie Johnson
The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage – the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to "Nobody-Knows" decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing – have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science's winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Allègre Hadida, Associate Professor in Strategy, University of Cambridge

IBM Tape Library Guide for Open Systems Springer Nature

Enemies to lovers tale with an earth-shaking twist! When his mega-famous boy band AnyDayNow breaks up, international pop star RJ Contreras strikes out on his own. But when his solo career flops, RJ retreats to a no-frills apartment where he can hide out from the world and lick his festering wounds. But when the girl next door starts slipping 'good neighbor' contracts under his door and complaining about his behavior through strategically placed Post-it-Notes, RJ snaps out of his self-

absorbed melancholy to wage war. Nothing short of an act of nature could repair the relationship between these two strong-willed enemies. But guess what Fate has in store?

The Wire Usborne Publishing Ltd

This book is a practical guide to discovering and exploiting security flaws in web applications. The authors explain each category of vulnerability using real-world examples, screen shots and code extracts. The book is extremely practical in focus, and describes in detail the steps involved in detecting and exploiting each kind of security weakness found within a variety of applications such as online banking, e-commerce and other web applications. The topics covered include bypassing login mechanisms, injecting code, exploiting logic flaws and compromising other users. Because every web application is different, attacking them entails bringing to bear various general principles, techniques and experience in an imaginative way. The most successful hackers go beyond this, and find ways to automate their bespoke attacks. This handbook describes a proven methodology that combines the virtues of human intelligence and computerized brute force, often with devastating results. The authors are professional penetration testers who have been involved in web application security for nearly a decade. They have presented training courses at the Black Hat security conferences throughout the world. Under the alias "PortSwigger", Dafydd developed the popular Burp Suite of web application hack tools.

The Hollywood Reporter Simon and Schuster

Abstract This IBM® Redbooks® publication presents a general introduction to the latest IBM tape and tape library technologies. Featured tape technologies include the IBM LTO Ultrium and Enterprise 3592 tape drives, and their implementation in IBM tape libraries. This 15th edition includes information about the latest TS4300 Ultrium tape library, TS1155 Enterprise tape drive, and the IBM Linear Tape-Open (LTO) Ultrium 8 tape drive, along with technical information about each IBM tape product for open systems. It includes generalized sections about Small Computer System Interface (SCSI) and Fibre Channel connections, and multipath architecture configurations. This book also covers tools and techniques for library management. It is intended for anyone who wants to understand more about IBM tape products and their implementation. It is suitable for IBM clients, IBM Business Partners, IBM specialist sales representatives, and technical specialists. If you do not have a background in computer tape storage products, you might need to read other sources of information. In the interest of being concise, topics that are generally understood are not covered in detail.

ABCs of z/OS System Programming Graphix

This two-volume book presents the outcomes of the 8th International Conference on Soft Computing for Problem Solving, SocProS 2018. This conference was a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University (UK), and Vellore Institute of Technology (India), and brought together researchers, engineers and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions. The book highlights the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers on algorithms (artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization) and applications (control systems, data mining and clustering, finance, weather forecasting, game

theory, business and forecasting applications). It offers a valuable resource for both young and

experienced researchers dealing with complex and intricate real-world problems that are difficult to solve using traditional methods.
