Professional Ethics for KTU Kailas Sree Chandran

As ethical issues continue to rise to the top of political, social and business agendas, the competitive market-economy model comes under renewed scrutiny for its potential to violate the fundamental values and integrity required to maintain and enrich a civil society. Bringing together cutting-edge research from leading academics in the US, Europe, Australia, UK and India, this book explores the challenge business ethics poses for individuals, organizations, public administration and society at large. With potential violations which stretch from personal lapses of bribery and corruption to the more fundamental questions prompted by those who push beyond the limits of an ethically grounded competitive business system, this book provides a stimulating attempt to broaden ethical awareness and define the framework of actions within today's increasingly complex business environment.

Human Values in Health Care New Age International

Primarily intended for undergraduate students of all disciplines of engineering and students of computer applications (MCA), this book is a comprehensive exposition of the values and ethical principles that one needs to adopt to become a responsible and accountable professional. The book is organized in nine chapters that addresses the three broad areas of concern—values, ethics, and sustainable development. It first discusses the prevalent concept of values in human society, the various types of values, and the crisis of values that seems to be engulfing the contemporary society. The concept of ethics, the various ethical values, and the ethical requirements for a professional in the modern workplace are highlighted in detail. The ramifications of industrialization, the respective roles of science, technology and engineering, as well as the need for preservation of the

environment and the use of eco-friendly technologies are explained. Finally, the ethical issues involved in the management of resources are discussed. A number of case studies have been provided in the book to enable a clear understanding of the topics presented. Each chapter contains short answer as well as long answer questions to test the students' grasp of the underlying concepts.

Human Values Textbook on Professional Ethics and Human Values  
This volume illustrates the central importance of diversity of human values throughout healthcare. The readings are organized around the main stages of the clinical encounter from the patient's perspective. They run from staying well and "first contact" through to either recovery or long-term illness, death, and dying. An introductory section opens up crucial issues of methodology and of practical application in this highly innovative approach to the role of ethics in healthcare. The contributions include selections from literature and poetry, canonical and newly commissioned articles, and first-hand narrative by patients, care givers, and professionals. The readings speak volumes to the diversity of human values operative in healthcare. The volume as

a whole conveys the message that these values are far more diverse than any of us normally recognize. Raising awareness of this diversity is the first step to developing a practically effective healthcare ethics.

This book deals with aspects of legal education and legal traditions. Part I includes chapters on teaching Law of the Sea, legal ethics and educating lawyers as 'transaction cost engineers' as well as comparison of teaching law in a refugee camp and in a Malaysian University. Part II on legal and philosophical traditions includes essays on what later philosophers would have commented on Plato's arguments in the Crito regarding 'absolute obligation to obey the law' and what Socrates would have said on two conversations in the 19th century novel Uncle Tom's Cabin regarding the morality and legality of harbouring runaway slaves. Part II concludes with two essays regarding the applicability of the Hart-Devlin debate on the 'enforcement of morals' vis-à-vis the International Criminal Court and an essay on what the historian Arnold Toynbee would have commented on the 'contingency' v 'teleology' debate between two palaeontologists the late Stephen Jay Gould and Simon Conway Morris. • Legal education of interest to legal educators and students • Legal, political, moral philosophy as well as philosophy of history of interest to law, philosophy and history teachers, postgraduate and under graduate students • Aspects of legal ethics for law teachers, students and legal professionals • Interdisciplinary studies regarding law and economics, law and literature, law and social justice for law, humanities, social science academics and students.

This book presents a framework for understanding human values and their role in life, work, business and leadership. It offers an

explanation for the spectrum of human behaviour, from a self-focused, survivalist mindset that has scant regard for ethics, through to compliance with laws and conventions, and then to the aspiration to live a higher ethical and spiritual life. The book offers a practical guide on how to develop a more ethical way of working and being, both personally and in organisations. Rather than being an additional burden on people or organisations, ethics and values are a liberating force, enabling higher performance, better quality relationships and an expanded sense of purpose and identity.

*Professional Ethics and Human Values* Mercer University Press Today, more and more organizations are realizing the importance of practising ethics in their business dealings. And the engineering profession is no exception to this. For, any policy or practice that gives a go-by to professional ethics—which essentially entails fair and transparent dealings based on sound moral principles—cannot enjoy the confidence of the customer for long. It is in this context that a book on Professional Ethics is very significant. This systematically organized text opens with an introduction to Human Values and discusses, with great skill and expertise, the various approaches to the study of ethical behaviour, ethical theories, value-based ethics and the engineers' responsibility for safety and risk, collegiality and loyalty. Besides, the responsibilities of engineers in organizational setting, and global issues such as environmental ethics, computer ethics, and Intellectual Property Rights (IPRs) are also covered in this text. The Case Studies lend a practical orientation to the book, and the Review Questions sharpen the analytical skills of the students. This is a must have book for the students of engineering and management.
