The book has a wide coverage and studies all the famous writers of English literature in the field of poetry, fiction, essay etc. The writers covered, among others, include Geoffrey Chaucer, William

Shakespeare, Samuel John Milton, John Dryden, Alexander Pope, Samuel Johnson, William Wordsworth and Alfred Tennyson. A special feature of the book is that studies writers and their contributions not in isolation but in the context of surroundings and various elements of civilisation of the age of the writer. Thus it suggests a vital relationship between English literature and English life. The book is written in a simple and lucid style. It will be found of great interest by the students of English Literature, researchers and the general readers.

This book is written keeping in view revised syllabus and Question Pattern of UGC SET/NET Exams. The book contains

question papers with immediate accurate solutions. Usually immediate and accurate solutions are not provided in any book, where students find it difficult to get clarity of the concept. Only providing answer keys at the end of the question paper doesn't serve the purpose. I faced all these limitations when I have attempted these examinations. Various states also conduct their State Eligibility Test for determining the eligibility for Assistant Professor. Usually students find it difficult to get the material for their respective state level exam. I have qualified SET for seven different states including J&K, Maharashtra, Tamilnadu, Kerala, Karnataka, Telangana, and North Eastern Region. So, through these exams I got the understanding of how to incorporate specific needs of those respective states also. This book is an attempt to provide enough practice exercises to make the students perfect and confident before the exams. This book is For Teaching and Research aptitude Paper One. It consists of all types of questions and comprehensive syllabus of NET/SET Paper one. Proposed book by the author: The next book proposed by authors is "Commerce SET/NET-A Comprehensive Look". This book is the in-depth expertise of mine in the domain of Commerce.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of

Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

A Comparative Study of Religions has been written by a scholar who has occupied himself with the subject of religion for over fifty years. But no finality can be claimed. The reason is that religion deals with what is transcendent in the sense that it deals with what man is going to be. Advaitism terms this futuristic end as becoming Brahman, Jainism as regaining one's pristine glory, theists as becoming good fit for heaven. However, Bergson and other evolutionists would say that religion is a collective and cooperative effort of men to become gods. This simply means the divinising of man what Aurobindo calls 'supermind'. They refer to a state beyond human ills, beyond human infatuation and beyond the befogging of human intellect. This is known in Jainism as sarvajnata. One thing is clear that fighting with other human beings in the name of religion is subhuman. As religious men, we are fellow travellers in the direction of the realm of spirit. Here

the nomenclature of Hindus, Muslims, Christians etc., ceases to be meaningful. Of course, we have to go very far and we have not made any beginning yet. However, at present, the advaitic principle of differences Brahman can serve the purpose of harmonizing all religions. Here we have adopted this principle. Secondly, the key concepts of different religions have been shown to mingle with one another.
