This book examines

China's contemporary  
global cultural footprints  
through its recent  
development of cultural  
diplomacy. The volume  
presents an alternative  
analytical framework to  
examine China's cultural  
diplomacy, which goes  
beyond the Western-  
defined concept of 'soft  
power' that prevails in the  
current literature. This  
new approach constructs  
a three-dimensional

framework on Orientalism,  
cultural hegemony and  
nationalism to decipher  
the multiple contexts,  
which China inhabits  
historically, internationally  
and domestically. The  
book presents multiple  
case studies of the  
Confucius Institute, and  
compares the global  
programme located  
around the world with its  
Western counterparts,  
and also with other

Chinese government-sponsored endeavours and non-government-initiated programmes. The author aims to solve the puzzle of why China's efforts in cultural diplomacy are perceived differently around the world and helps to outline the distinctive features of China's cultural diplomacy. This book will be of much interest to students of diplomacy, Chinese politics, foreign policy and International Relations in general.

 This book studies the various representations of Asia in Bengali literary periodicals between the 1860s and 1940s. It looks at how these periodicals tried to analyse the political situation in Asia in the context of world politics and how Indian

nationalistic ideas and associations impacted their vision. The volume highlights the influences of cosmopolitanism, universalism and nationalism which contributed towards a common vision of a united and powerful Asia and how these ideas were put into practice. It analyses travel accounts by men and women and examines how women became the focus of the didactic efforts of all writers for a horizontal dissemination of Asian consciousness. The author also provides a

discussion on Asian art and culture, past and present connections between Asian countries and the resurgence of 19th-century Buddhism in the consciousness of the Bengalis. Rich in archival material, *Knowing Asia, Being Asian* will be useful for scholars and researchers of history, Asian studies, modern India, cultural studies, media studies, journalism, publishing, post-colonial studies, travel writings, women and gender studies, political studies and social anthropology.

This book gathers together French-language authors who in the last decade have played a part in the renewal of interest in the question of nationalism. This volume organized along thematic lines and with a genuine transversal approach, seeks to give audiences a glimpse of some of that research, whether related to theoretical, normative or analytical questions.

In light of a renewed interest in the study of nationalism, *Contemporary Majority Nationalism* brings together a group of major scholars committed to making sense of this widespread phenomenon. To better illustrate the reality of majority nationalism and the way it has been expressed, authors combine analytical and comparative perspectives. In the first section, contributors highlight the paradox of majority nationalism and the ways

in which collective identities become national identities. The second section offers in-depth case study analyses of France, the United Kingdom, Spain, Canada, and the United States. This book is an international project led by three members of the Research Group on Plurinational Societies based at Université du Québec à Montréal. Contributors include James Bickerton (St-Francis Xavier University), Ángel Castiñeira (ESADE - Escuela superior de

administración y dirección de empresas), John Coakley (University College Dublin), Alain Dieckhoff (Institut d'études politiques, Paris), Louis Dupont (Sorbonne University), Enric Fossas (Universitat Autònoma de Barcelona), Alain-G. Gagnon (Université du Québec à Montréal), Liah Greenfeld (Boston University), André Lecours (Ottawa University), John Loughlin (St Edmund's College, Cambridge, and Cambridge University), and Geneviève Nootens (Université du Québec à

Chicoutimi).

 As the site of crossings of colonizers, settlers, merchants, and goods, island nations such as Taiwan have seen a rich confluence of cultures, where peoples and languages were either

forced to mix or did so voluntarily, due largely to colonial conquest and their crucial role in world economy. Through an examination of socio-cultural phenomena, Comparatizing Taiwan situates Taiwan globally, comparatively, and relationally to bring out the nation's innate richness. This book examines Taiwan in relation to other islands, cultures, or nations in terms of culture, geography, history, politics, and economy. Comparisons include

China, Korea, Canada, Hong Kong, Macau, Ireland, Malaysia, Japan, New Zealand, South Africa, the United States and the Caribbean, and these comparisons present a number of different issues, alongside a range of sometimes divergent implications. By exploring Taiwan's many relationalities, material as well as symbolic, over a significant historical and geographical span, the contributors move to expand the horizons of Taiwan studies and reveal the valuable insights that

can be obtained by viewing nations, societies and cultures in comparison. Through this process, the book offers crucial reflections on how to compare and how to study small nations. This truly interdisciplinary book will be welcomed by students and scholars interested in Taiwan studies, Sinophone studies, comparative cultural studies, postcolonial studies, and literary studies. This book explores the different perspectives and historical moments of nationalism in Cyprus. It does this by looking at nationalism as a form of identity, as a form of ideology, and as a form of politics. The fifteen contributors to this book are scholars of different scientific backgrounds and present Cypriot nationalisms from an interdisciplinary framework, including approaches such as history, political science, psychology, and gender studies. The chapters take

a historical approach to nationalism and argue that the world of nations, ethnic identity, and national ideology are neither eternal, nor ahistorical nor primordial, but are rather socially constructed and function within particular historical and social contexts. As a land that was, and still is, marked by opposed nationalisms - that is, Greek and Turkish - Cyprus constitutes a fertile ground for examining the history, the dynamics, and the dialectics of nationalism.

Through an in-depth analysis of historicist literature and art, this book demonstrates that cultural Scandinavism, despite its failure as a political mobilizer, was highly successful in strengthening and extending national consciousness-raising in Denmark, Norway, and Sweden.

The Oxford Handbook of the Sociology of Religion

draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in-depth survey into its changing forms and content in the contemporary world. The role and impact of religion and spirituality on the politics, culture, education and health in the modern world is rigorously discussed and debated. The study of the sociology of religion forges interdisciplinary links to explore aspects of

continuity and change in the contemporary interface between society and religion. Using a combination of theoretical, methodological and content-led approaches, the fifty-seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law, ecology to art, music to cognitive science, crime to institutional health care and more. The developing character of religion, irreligion and

atheism and the impact of religious diversity on social cohesion are explored. An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship. The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline.

Genocide has been called

the ‘crime of crimes’ and an ‘odious scourge.’ With millions of victims in the last century alone, it is one of the great moral and political challenges of our age. Despite the challenges, such human cruelty has not stopped. The 21st century is recording its first genocide in Cameroon with only a scanty few raising a finger. The significance of the ‘odious scourge’ has compelled Tatah Mentan to research on the trajectory of the ‘scourge’ in Africa over the past centuries. The

targeted ongoing mass killings in Cameroon, like those of Rwanda before, have driven the scholar to expand his focus beyond the Holocaust, which had long been the primary case study. In this book, Tatah Mentan explains that these cases were not merely a human catastrophe, nor an atavistic reversion to the barbarism of a past epoch, but rather an event produced by the unfolding of the logic of capitalism itself. This book therefore critically explores the essence of

capitalism as genocide in Africa and its consequences on Africans during their colonisation and incorporation into the European-dominated racialised capitalist world system in the late 18th century. It uses multidimensional, comparative methods, and critical approaches to explain the dynamic interplay among social structures, human agency, and terror to explain the connection between structural capitalist terrorism and the emergence of the

capitalist world system. Tatah Mentan proposes a genuine participatory democratic alternative to the unending genocide nightmares. Nurturing participatory attitudes, would facilitate and reinforce self-management, and educate and empower individuals and dispossessed and under-represented communities to seek self-determination and democratic participation in the political arena. Tatah Mentan concludes that the same fundamental

commitments that urge humanity to promote participatory political democracy should compel them to promote truly inclusive economic democracy as well. Political economists, historians, students, corporate managers and policy makers at national and international levels are invited to share the insights of this book. *Recent Analytical Developments* Bloomsbury Publishing One of the world's leading theorists of nationalism offers a new synthesis In

the history of modern political thought, no topics have attracted as much attention as nationalism, nation-formation, and patriotism. A mass of literature has grown around these vexed issues, muddying the waters, and a level-headed clarification is long overdue. Rather than adding another theory of nationalism to this maelstrom of ideas, Miroslav Hroch has created a remarkable synthesis, integrating apparently competing frameworks into a

coherent system that tracks the historical genesis of European nations through the sundry paths of the nation-forming processes of the nineteenth century. Combining a comparative perspective on nation-formation with invaluable theoretical insights, *European Nations* is essential for anyone who wants to understand the historical roots of Europe's current political crisis.

Since its emergence in

the 1920s, Iraqi-Kurdish theatre was used as a tool of national identity building and modernisation. It promoted literacy, education and women's rights and became one of the most visible forms of Kurdish cultural nationalism by exploring folklore, myths, legends and local history and by celebrating heroes of the past. As time went on, by staging anti-feudalist and anti-monarchist plays, theatre became engaged in representing and legitimising the wider

political movement in Iraq that ultimately led to the overthrow of the monarchy in 1958. Between 1975-1991, even under strict censorship during the Baath rule, Kurdish theatre continued to promote Kurdish nationalism and resistance through the use of Kurdish folk culture and literature. This book is based on dramatic texts from the period, interviews with Kurdish theatre artists, Kurdish theatre histories, historical documents, and journalistic accounts. It

illustrates the ways in which theatre participated in the Kurdish national struggle and how it responded to political changes in different historical periods. It is the first book dedicated to Kurdish theatre and complements the latest research that examines theatre in its wider socio-political context. *Secularism, Religion, and Culture in Comparative Constitutional Law* Routledge Recent collection of essays discusses the historical event and the

multifarious consequences of the 1867 Compromise (Ausgleich, Settlement), conducted between the Habsburg monarch, Francis Joseph and the Hungarian political ruling class. The whole story has usually been narrated from a plainly Cisleithanian viewpoint. The present volume, the product of Hungarian historians, gives an insight into both the domestic and the international historical discourses about the Dual Monarchy. It also reveals the process of how the

1867 Compromise was conducted, and touches upon several of the key issues brought about by establishing a constitutional dual state in place of the absolutist Habsburg Monarchy. The emphasis is laid not on describing and explaining the path leading to the final and "inevitable" break-up of the Dual Monarchy, but on what actually held it together for half a century. The local outcomes of self-maintaining mechanisms were no less obvious in the Hungarian part of the

Dual Monarchy, despite the many manifestations of an overt adversity toward it. The Creation of the Austro-Hungarian Monarchy will appeal to historians dealing especially with 19th-century European history, and is also essential reading for university students.
