## HARPER MANNING

*Appendix* Springer

Though in his own time Edward IV was popularly seen as an able and successful king who rescued England from the miseries of civil war and provided the country with firm, judicious and popular government, later historians cast doubt on his achievement. This classic study - now reissued with a substantial new foreword by R. A. Griffiths - places the reign firmly in the context of late-medieval power politics, assessing the king's relations with the politically-active classes, and evaluating the many innovations in government on which Edward's reputation rests. Revealing the king as an enigmatic character intelligent, active and forceful, but also pleasure-loving and, in his later years, increasingly arbitrary and avaricious, Ross endorses Edward as a ruler of substantial accomplishment, whose methods and policies carved the foundation of early Tudor government.

*The Future of Energy Use* Shanti Publication

Following the success of its predecessor, this second edition of The Future of Energy Use provides essential analysis of the use of different forms of

energy and their environmental and social impacts. It examines conventional, nuclear and renewable sources and technologies, using relevant case studies and providing a vital link between technology and related policy issues. The new edition has been comprehensively developed and updated, including new text, diagrams and tables, with entire new sections that reflect the significant changes that have occurred since the first edition. New material includes: a stronger focus on climate change policy and energy security; a discussion of the long run marginal costs of oil; coverage of the biofuels debate in both the developed and developing worlds; an outline of developments in the built environment (including transport issues); and the relationship between behaviour and energy use. It reviews policy shifts with relation to energy efficiency, carbon capture and storage, combined heat and power, and combined cycle gas turbines. There is new coverage of nuclear waste, storage and proliferation, and new material on microgeneration and biofuels, as well as essential new information on carbon markets and the hydrogen economy. The result is a unique introduction and guide to all the vital issues within energy for students, academics and professionals new to the field.

The four LNCS volume set 9175-9178 constitutes the refereed proceedings of the 9th International Conference on Learning and Collaboration Technologies, UAHCI 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCI 2015, in Los Angeles, CA, USA in August 2015, jointly with 15 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCI 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers of the four volume set address the following major topics: LNCS 9175, Universal Access in Human-Computer Interaction: Access to today's technologies (Part I), addressing the following major topics: LNCS 9175: Design

and evaluation methods and tools for universal access, universal access to the web, universal access to mobile interaction, universal access to information, communication and media. LNCS 9176: Gesture-based interaction, touch-based and haptic Interaction, visual and multisensory experience, sign language technologies and smart and assistive environments LNCS 9177: Universal Access to Education, universal access to health applications and services, games for learning and therapy, and cognitive disabilities and cognitive support and LNCS 9178: Universal access to culture, orientation, navigation and driving, accessible security and voting, universal access to the built environment and ergonomics and universal access.

The three-volume set LNCS 9186, 9187, and 9188 constitutes the proceedings of the 4th International Conference on Design, User Experience, and Usability, DUXU 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, in Los Angeles, CA, USA, in August 2015, jointly with 13 other thematically similar conferences. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences were carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 132 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 61 papers included in this volume are organized in topical sections on design thinking, user experience design and usability methods and tools, DUXU management and practice, emotional and persuasion design, and storytelling, narrative and fiction in DUXU.

The development of biotechnological innovations is quickly becoming a globalized phenomenon as emerging nations are making major strides to compete with more developed economies. Though efforts to bridge the gap between emerging and developed nations have been successful, there are still many barriers that need to be overcome. Comparative Approaches to Biotechnology Development and Use in Developed and Emerging Nations evaluates the importance of manufacturing biotechnological products around the world. Highlighting a comparative analysis of public policies, technological policies, innovations, and marketing capabilities of developed and emerging nations, this publication is a pivotal reference source for government officers, policy makers, academics, and practitioners.

[Congressional Record](#) Bloomsbury Publishing USA

Using compelling examples and analysis, *How We Use Stories and Why That Matters* shows what the New York Shakespeare Riots tell us about class struggle, what *Death Cab for Cutie* tells us about media, what Kate Moss's wedding dress tells us about authorship, and how *Westworld* and *Humans* imagine very different futures for Artificial Intelligence: one based on slavery, the other on class. Together, these knowledge stories tell us about how intimate human communication is organized and used to stage organized conflict, to test the 'fighting fitness' of contending groups — provoking new stories, identities and classes along the way. This book guides the reader through the tangled undergrowth of communication and cultural expression towards a new understanding of the role of group-mediating stories at global and digital scale. It argues that media and networked systems perform and bind group identities, creating bordered fictions within which economic and political activities are made meaningful. Now that computational and global scale, big data, metadata and algorithms rule the roost even in culture, subjectivity and meaning, we need population-scale frameworks to

understand individual, micro-scale sense-making practices. To achieve that, we need evolutionary and systems approaches to understand cultural performance and dynamics. The opposing universes of fact (science, knowledge, education) and fiction (entertainment, story and imagination) — so long separated into the contrasting disciplines of natural sciences and the humanities — can now be understood as part of one turbulent sphere of knowledge-production and innovation.

*Enhancing Evaluation Use: Insights from Internal Evaluation Units* offers invaluable insights from real evaluators who share strategies they have adopted through their own experiences in evaluation. Readers will learn about the challenges, solutions, and lessons drawn from the experience of evaluators working in a wide range of organizations. Referencing the latest literature, contributors discuss factors that help or undermine attempts to foster an evaluative thinking and learning culture within an organization. Applicable in a wide range of situations, their accounts demonstrate the initiative and innovative thinking they use to address challenges in various, sometimes complex, evaluation settings. Questions at the end of each chapter stimulate thought and discussions about the issues raised and allow readers to apply their findings to their own situations. "This book speaks to a cutting-edge topic, that is, the potential to generalize program evaluation expertise to larger organizational questions, and the cases from multiple international contexts represent a unique feature." —John Clayton Thomas, Georgia State University "The use of actual cases to highlight major concepts in evaluation in the public sector is a great feature." —Danica G. Hays, Old Dominion University "The text provides practical information from a variety of organizational contexts and the integration of international experiences provides for expanded discussion of evaluation theory and practice." —Kathleen Norris, Plymouth State University "The key strengths of this book lie in its national, supra-national and international organizational contexts, its consistency in insider perspectives, and the detailed examples provided." —Donna Haig Friedman, University of Massachusetts, Boston EVALUATION IN ORGANIZATIONS: A BOOK REVIEW by Robert Picciotto, UKES Council Member (Excerpted) "The book of essays reviewed here was edited by two eminent evaluators. It fills an important gap in the literature: in pursuit of improved quality of evaluation products, evaluation thinkers have lavished attention on evaluation methods, ethics and use but they have sorely neglected evaluation governance issues and have largely failed to probe the workings of evaluation within organizations. All contributors to the book are seasoned practitioners. They hail from national, supranational and international organizations and many of them have trespassed across these thematic and organizational boundaries. They all are equipped to draw on a vast reservoir of hands-on experience as evaluation commissioners, managers, internal evaluators or external practitioners. Given its pragmatic focus the book is bound to elicit broad based interest among evaluation practitioners. While it addresses familiar dilemmas and challenges (evaluation independence, evaluation utilization, organizational learning, nurturing of an evaluation culture, etc.) it does so from the distinctive perspective of "insiders" who have had to contend with a variety of organizational constraints and management pressures. [It] should be of practical value to teachers, students, professional evaluators as well as evaluation commissioners and programme managers. All in all, this is a book that belongs on your shelf if you are intent on enhancing the role that evaluation plays in your organization."
